From Russia, Perplexed At Americans' Indifference

FROM RUSSIA: WHAT DOES IT MEAN?

Americans have begun to feel the “iron fist in the velvet glove” but through clever Hegelian “crisis management” (fabricate the crisis, then offer “the” solution) still find selves caught firmly in the trap that is closing upon them despite their ineffectual protests, for while a few hundred thousand might protest, the vast majority DEMAND the heavy hand of the government’s involvement, even to the extent of demanding military forces in the streets of the cities.

Don’t think it can or will happen in “your” place of residence just because you are not in an area where a “natural” disaster is likely? THINK AGAIN—for the PLAN is extend military control over the entire populace. All it takes is a new kind of crisis and your fellow “man” will be most demanding of government “protection”.

In the pages of CONTACT and its predecessor publications we have ‘told you how it would be’

for a very long time. Now we present the confirmations, so you might prepare as well as you can, in the many ways we have covered in this paper and associated Journals: colloidal silver, food-grade hydrogen peroxide, parasite cleansing and other health-oriented resources (which, unfortunately, must now be obtained through separate resources due to the choices of formerly trusted associates); food resources such as spelt grain and red lentils; safer locations; how to protect yourself in an earthquake (re-presented in this issue); 72-hour emergency-preparedness kits; Nevada corporations for economic survivability; and many other protective measures aimed at helping the remnant survive as well as possible in THIS environment.

The populace has been conditioned to accept as true only what is presented through mainstream news sources and those sources are part of the diabolical plan to control the people, so to gain some perspective on the significance of unfolding

events we find it necessary to review news presentations from a variety of non-Western sources. One of the best such resources available today is to be found at <WhatDoesItMean.com> in the presentations of “Sorcha Faal”—and whether or not this is a real individual should not detract from the value of what is presented by the “enemy of our enemy”.

BIRD-FLU VACCINATIONS: ‘LARGEST MASS-INOCULATION IN HISTORY’ 150,000 NATO TROOPS ON ‘STANDBY’

The first piece we will review is an article entitled “United States Prepares for Mass Bird Flu Vaccinations, Quarantines and Requests November to January ‘Standby’ for 150,000 NATO Troops for North American Duty”, by Sorcha Faal of <WhatDoesItMean.com>, October 26, 2005.

that the beleaguered Military Leaders of the United States are preparing for the largest mass inoculation of human beings in history and for which testing ... is about to begin, and as we can read as reported by *The Union Leader* News Service in their article titled “Flu shot blitz planned” and which says:

Three New Hampshire communities are making plans to give out a single blast of flu shots—5,000 in one day—as part of a drill to prepare for a widespread epidemic. The effort is being undertaken to test the state’s ability to render emergency mass inoculations as the threat of avian flu unfolds. The drill will test the ability of health officials to issue mass vaccinations, the capacity of the state health laboratory, surge capacity of hospitals, internal operations at the state level, and judicial issues involving quarantine and isolation, officials said.

New Hampshire will be the first state in the country to undertake such a drill, he said. The U.S. Department of Homeland Security is paying for the flu shots, and an outside firm will monitor the drill and report on it. Logistics, crowd control and traffic problems will be tested, Portsmouth officials said at a news conference yesterday. Fifty hospital staffers will be on hand for the practice session, in addition to numerous volunteers.

“Most hospitals around the country are at close to capacity right now,” said Dr. Don Albertson at Portsmouth Regional Hospital. “The reality is, with a larger number of people that would come with a disaster, we have to learn to think out of the box.”

[See also the Associated Press article of October 28, 2005 entitled “Exxon-Mobile employees Got Fake Flu Shots”. The story says that approximately 1,000 employees at a health exposition were injected with something that was “definitely not the flu vaccine” by an unidentified doctor in what was termed “the first use of an outside contractor” instead of company medical staff. Make no mistake: The plans for dealing with this next crisis are well advanced and being tested already.]

To this article’s comment of ‘thinking out of the box’, these reports suggest that the U.S. Military Leaders have thrown this ‘box’ out altogether as they are inoculating their citizens with a vaccine that is not only not proven but has been banned in the rest of the world because of its experimental nature, and as we can read as reported by Britain’s *Liverpool Daily Post* in their October 11th article titled “Liverpool scientists in bird flu breakthrough” and which says:

Clinical trials will begin within weeks on a Liverpool-produced vaccine for the deadly bird flu virus which it is feared could kill millions of people worldwide. Experts at the Chiron plant, in Speke, have spent several months working on a vaccine for the H5N1 avian flu virus. A spokeswoman for the company told the *Daily Post* last night that thousands of doses would be shipped to the U.S. in the next few weeks when scientists will begin testing it on humans.

What is most absurd about these mass American inoculations, and according to these reports, is that ... the Avian Flu Virus, H5N1, has not mutated, as of yet, to its expected human-to-human transmission form. Leading these reports to question as to what exactly are the U.S. Military Leaders inoculating their citizens with, as a vaccine cannot be produced for a virus that doesn’t yet exist?

But perhaps a ‘clue’ can be found in these most strange of actions occurring in America in light of their request to their NATO allies this week for the authorization of putting on ‘standby’ over 150,000 NATO troops for their expected use in the United States to control quarantine zones and the vast inoculation camps being currently set up in America, as it is expected that upon the outbreak of the bird flu that the United States Military will be in full control of their country, and as we can read as reported by the *Rocky Mountain* News Service in their article titled “Proposal would use military in disasters: Admiral suggests total authority for Defense Department” and which says:

Adm. Timothy Keating, head of the military’s defense command for the United States, on Tuesday said he’s proposing that the Department of Defense be given complete authority for response to rare, catastrophic disasters like Hurricane Katrina. In that deadly storm, emergency response floundered, and more than 1,000 people died. No one person or agency was in charge—or is today. A general commanded the military units, a civilian ran the Federal Emergency Management Agency and governors were in charge of the states.

Keating runs the U.S. Northern Command based in Colorado Springs, which provided the military response to Katrina. He told a homeland defense conference in the Springs that the proposal calls for the president to give clear command-and-control to the active-duty military in responding to the most devastating catastrophes.

To the American people themselves not protesting the use of Foreign Military Forces on their native soil was already proven by their Military Leaders in the aftermath of the Hurricane Katrina Superstorm, and to which Military Forces from Mexico, Canada, Ukraine, the Netherlands and Great Britain were seen by these people as ‘lifesavers’, rather than potential occupiers of their homeland that they soon may become.

As the world too is being continually assaulted by massive geological and weather catastrophes, these reports further outline the American Military Leaders’ plans to ‘deal’ with their citizens under what they believe is the only way to ‘control’ them, through the imposition of a Total Police State and keeping from their people the direness of the world’s situation, and as we can read as reported by the *Newsweek* Magazine News Service in their article titled “The Last Word: Preparing for The Worst” and which says:

On Oct. 12, the United Nations’ official day of Disaster Preparedness, scholars from the UN University’s campus in Bonn issued an appropriately gloomy statement. If nothing is done to cushion the blow of natural disasters, they declared, by 2010 some 50 million people around the world could be driven from their homes annually.

Janos Bogardi, director of the UN University’s Institute for the Environment and Human Security, spoke with *Newsweek*’s Mac Margolis about the mounting toll of natural disasters and what the world needs to know in order to cope, [and who stated] “There are absolutely clear signs and compelling statistics showing the situation is getting worse. We now are experiencing 2.5 to 3 times as many extreme events of climatic or water-related emergencies per year as we did in the 1970s. At the same time annual economic losses have increased six-fold.”

... To the United States Militia Forces, called the

National Guard, and [of] which each of the 50 U.S. Regions (States) have contingents ... Russian Military Analysts report that fully 80% of them have been removed from the United States to their overseas war zones, along with their vast armories and equipment, so as to not allow their use against foreign military forces being used against their families.

The removal of these Militia Forces has proven to be catastrophic to many Regions of the United States as these were the forces first to be utilized during catastrophic emergencies, but due to their absence has also created the opportunity for the introduction of NATO forces.

To those few American people able to see in its monstrous scope the demise of their once great Nation being planned there also appears to be a U.S. Military solution for them as their Health Authorities have caved in to the demands of their President and his advocates in preparing a whole new generation of psychiatric drugs for them, and as we can read as reported by the *Washington Post* News Service in their article titled “U.S. Alters Test Policy On Psychiatric Drugs” and which says:

The government will back down from a plan to require long-term studies of new psychiatric drugs before allowing them on the market, regulators said yesterday. The panel’s vote came after it heard a barrage of complaints from industry executives, academic researchers and patient advocates. The new plan, which the Food and Drug Administration had begun to implement over the past six months, called for companies to conduct studies for as long as half a year before seeking approval of new drugs. Like many other medications, psychiatric drugs are typically approved on the basis of positive results from two short-term studies, each of which may last only eight weeks.

As in the darkest days of our country under Soviet Communist rule, so America is today. Where a citizen daring to voice their opposition to the loss of their freedoms is proof to the State of their mental illness, and the justification for their being forced into camps for ‘treatment’ with psychiatric drugs, and in the case of these Americans, with new and dangerous mind-altering drugs that have been tested for only 8 weeks.

In the South American country of Bolivia last month tens of thousands of people protested their right to a single road. In the United States today, not only do they not protest the loss of their freedom, the loss of their Nation, but as events will soon prove to be true, they will like sheep being led by a cruel shepherd follow their fellow citizens into the vast camps being prepared for them.

As the world watches in horror, one can only wonder if any of the Americans had ever heard of Nazi Germany, for if they haven’t, they will soon begin to relive what the world had once thought could never happen to the human race again.

HURRICANE WILMA MAKES MEXICO PAY FOR CHALLENGING UNITED STATES

There exists substantial evidence in the public domain (though entirely absent from mainstream media reporting) to confirm the technical capability of manipulating weather systems. A “real” question one might ask is why there has been NO effort to apply this technical ability to mitigate the effects of the storms we have been experiencing. The answer, of course, is that these storms are having EXACTLY the intended effect,

“like it or not”.
It is NOT “only” the United States where this true “weapon of mass destruction” has been employed, as we recall the devastation inflicted on South America subsequent to Venezuela and other nations in the region getting “uppity” with the would-be World Masters within the last year. Mexico has partially aligned itself with the growing Alliance of nations opposed to the “Western”, “first world” powers, recently declaring its intentions to back the International Criminal Court, which could examine the issue of “war crimes” and “crimes against humanity”—and obviously was in need of a demonstration by and of those powers.
Let’s review what Sorcha Faal presents in “‘Manipulated’ Hurricane Makes Mexico Pay Dearly for Challenging United States as U.S. Military Preparations for South American Invasion Continue”, October 27, 2005.

[QUOTING:]
As reported by Russian Military Analysts ... there appears to be strong circumstance that the Military Leaders of the United States have utilized their weather manipulation technology to ‘augment, steer, [and] control’ one of the latest Super Storms to hit these areas in what they are describing as their worst hurricane season on record, and to which just today another storm has formed, and as we can read as reported by the Reuters News Service in their article titled “Tropical Storm Beta gathering force off Nicaragua” and which says:

Tropical Storm Beta formed off the Caribbean coast of Nicaragua on Thursday and was forecast to strengthen into a hurricane and drench Central America with potentially flooding rain, the U.S. National Hurricane Center said. Beta was the 23rd named tropical cyclone of the unrelenting and record-breaking Atlantic-Caribbean hurricane season. No. 22, named Alpha, broke the record for the number of storms set in 1933 and made 2005 the most active hurricane season since records began 150 years ago. Weather forecasters switched to the Greek alphabet for storm names after using up their annual list of 21 names for the season with Wilma, which was at one point the most intense hurricane ever recorded in the Atlantic basin.

To the exactitudes of the United States being able to technologically manipulate hurricanes has long been suspected as the technologies for achieving such goals is attainable, and to which one American dissident group has reported on, and as we can read as reported by the <CuttingEdge.Org> News Site in their article titled “A Terrifying Look at the Control of Weather Warfare: A Look at HAARP” and which says:

In a nutshell, this is the nucleus of the expertise just recently acquired to control the weather. By pouring measured energy that has been focused into certain parts of the ionosphere, scientists can create all kinds of storms like hurricanes, thunderstorms, floods, tornadoes and drought. In NEWS1198, “U.N. Treaty Proves Weather Control Is Real”, we report news articles that Malaysia actually contracted with a Russian Weather Modification company to create a hurricane that would be directed close enough to clear the smoke and smog from Malaysia’s cities without actually coming on to land to create devastation. This Russian company delivered, and Malaysia had clear skies.
Our information also tells us that, not only can

hurricanes be created, they can be dismantled should scientists so desire. And, they certainly can be driven on the ocean much like we drive our cars on roadways. Therefore, one has to ask why American scientists have allowed unprecedented hurricanes, like Andrew, to ever come on shore. Why are American scientists allowing extensive damage and lives lost to recent unprecedented storms, since they have the capability to keep these storms away from us?

To the United States’ current confrontation with Mexico we can read as reported by the Knight Ridder News Service in their article titled “U.S. aid threatened by global court pact” and which says:

Mexico’s declared intent to join the International Criminal Court is setting up a potentially critical showdown with the Bush administration, which refuses to subject U.S. personnel to the ICC’s powers.
Washington has informed Mexico that joining the ICC would lead to the cut of an \$11.5 million program to help its justice system deal with drug trafficking, according to human rights groups that support the Dutch-based court, designed as the prime venue for trying war crimes. That amounts to almost 40 percent of the U.S. economic aid Mexico receives.
Mexico could avoid the loss if it signs an immunity agreement with Washington, but has so far refused to do so. Widely known as an Article 98 agreement, such a deal bars a country from handing U.S. nationals to the ICC without U.S. permission. Mexico is hardly alone. Washington already has cut aid to 11 Latin American nations for refusing to sign the immunity agreements, making it the region of the world hardest hit by ICC-related sanctions.

But Mexico’s ratification of the court is being monitored especially closely by human rights groups and members of Congress because the country is so critical to Washington’s strategic interests. It ranks as the second biggest U.S. trading partner and the biggest entry point for illegal migrants and cocaine. A growing number of U.S. defense and congressional officials fear such a move will cost Washington influence in a region already vulnerable to political instability and are pushing President Bush to issue a first-ever waiver of the sanctions.
Human rights activists say most nations probably would agree to Article 98 deals if they covered only U.S. military personnel, but reject the broader pacts the State Department is pushing to cover all U.S. citizens and even third-country foreign contractors working for the U.S. government. “We respect the right of other nations to become parties to the Rome Statute, but ask other countries (to) respect our right not to do so,” said a State Department official who asked for anonymity in keeping with department rules.
So far, 101 nations have inked such deals, including Colombia and the Dominican Republic. But other Latin Americans have responded angrily to the U.S. pressures. Costa Rican Foreign Minister Roberto Tovar last month called the U.S. immunity proposals “offensive” [LITERALLY, in the case of guided storms] and added: “One can be poor, but dignified.”

Following Mexico’s refusal to bow to the pressure being exerted upon them by the United States Military Leaders there ‘appeared’ this most strangest of Hurricanes, Wilma, and which became the strongest

such storm to ever form in the Atlantic and Caribbean Regions and intensified at a rate never before seen by research scientists and defied all normal behaviors of storms of its type ...
In an even greater humiliation to the Mexican Nation by the U.S. Military Leaders has been the United States’ refusal to assist with the humanitarian evacuation of thousands of mostly American tourists, and even though Mexico was one of the first countries to rush aid to America after Katrina had struck, and as we can read as reported by the Associated Press News Service in their article titled “Tourists frantic to leave Cancun” and which says:

Thousands of desperate tourists stranded by Hurricane Wilma besieged airports and tour offices Wednesday as officials faced the challenge of evacuating 22,000 visitors with only 6,000 airline seats available out of Cancun. Though most of the flooding had receded and electricity was slowly returning, frustrated tourists who had gone nearly a week without showering said they could relate to those who survived Hurricane Katrina.
“Now I know how those people in New Orleans felt,” said Angela Benites, 48, Mexico City. “Several days of desperation is no way to live.” As Cancun’s half-million people struggled to clean up their flooded and wind-smashed homes and workplaces, crowds of tourists surrounded airline offices. Some wept for joy when told they could leave.

To the question of if these latest events will be changing the position of the Mexican Government it is not to our knowing. What is to our knowing though is the United States Military Leaders continuing plan to fend off the growing power of China in their South America Regions by the planned invasion of many of that Region’s sovereign nations, one of which, Bolivia, has reported yet another outrage by American Military Forces’ destruction of their air-defense capability, and as we can read as reported by the Prensa Latina News Service in their article titled “Doubts Persist on Removal of Missiles from Bolivia” and which says:

[Bolivian] Military experts, who asked not to be identified, denied Gen. Marcelo Antezana’s assertion that the missiles were obsolete, and maintain that the weapons are similar to those used in present conflicts, including by U.S. forces in Iraq and Afghanistan, and were the only ones of this type to defend Bolivian airspace.
Presidential candidate Evo Morales, of MAS (Movimiento al Socialismo), Evo Morales, declared he had been informed by patriotic soldiers about the removal of the missiles by air to the United States on October 2, in what he denounces was an illegal operation with U.S. troops in violation of national sovereignty and dignity. The missiles were supplied by the People’s Republic of China in 1993, with other materiel at a cost of four-and-a-half billion dollars, which still has not been paid.
MAS has demanded clarification of the case from Defense Minister Gonzalo Mendez, who met Wednesday with Antezana and President Eduardo Rodriguez before the general’s press conference. Morales declared this could result in an eventual treason trial against the president in his condition as Captain General of the Armed Forces, whose approval should have been necessary for withdrawing the missiles.
Evo Morales said the operation directed by the U.S. Embassy is a provocation and threat against MAS, which leads the polls for the December

elections. Bolivia’s major union (COB) leader, Jaime Solares, went further, warning of the danger of a military coup to prevent progress of social forces. A few days ago news commentator Amalia Pando revealed premature changes in army units and staffing, which she said was worrying given the serious national-political situation.

Long has it been known that the United States’ preferred plan for South American nations not bowing down to them has been to use the tactics of assassination of popularly elected leaders and the installation of puppet dictatorial regimes [see the *John Perkins book*, *Confessions of an Economic Hitman*], but to which the nation of Venezuela has stopped with the help of both Russian and Chinese Intelligence sources, even to the capturing of American-backed Columbian rebels, and as we can read as reported by the *United Press International* News Service in their article titled “Venezuela sentences Colombian conspirators” and which says:

Venezuela has sentenced 27 Colombians to six years in prison for conspiring to overthrow the Venezuelan government, *El Nacional* reported Wednesday. More than 100 Colombians were arrested last year at a farm outside Caracas, where they maintained they were there to work. However once they got there, the defendants claimed, they were forced to take part in an anti-Chavez plot. The Venezuelan leader has repeatedly accused the United States of trying to usurp his authority by aiding ant-Chavez opposition groups. The White House has denied the accusation.

As events from the United States show their peoples’ attention once again riveted to those events inside of their country, they remain not knowing, or even not caring, about the most important events critical to their future. For as history has often shown to those who see, a brutal Fascist Military Regime such as exists in the United States is never more dangerous, to the world or its own people, than when it is wounded. And today the Military Leaders of the United States are indeed wounded, who knows where they will strike next?

[END QUOTING]
The answer to the rhetorical question above just might be, “Everywhere,” as in everywhere a flu bug might be propagated—or more simply, “Closer to (your) home.”

EARTH CHANGES ACCELERATING

In an October 19, 2005 article entitled “Massive Underwater Landslide Reported off California Coast as Volcanic Activity Increases in American Northwest, World’s Oceans Continue Heating at Record Pace and Methane Level Rise Continues Unabated”, Sorch Faal reminds us to pay attention to Mother Earth’s birthing pains. May we all do what we can to mitigate the intensity of the “contractions”, for Mother SHALL have relief.

[QUOTING:]
Russian Scientists are expressing concern today over reports from North America showing that the island regions off the California coastline have experienced a massive underwater landslide due to volcanic pressures increasing in this plate-boundary region, and was so powerful that it registered as a moderate earthquake, and as we can read as reported by the *Associated Press* News Service in their article titled “Temblor Hits off San Diego

Coast” and which says:

An earthquake has struck off the Southern California coast more than 70 miles off the coast of San Diego. An underwater earthquake struck off the Southern California coast on Sunday more than 70 miles off the coast, according to the U.S. Geological Survey and the California Institute of Technology. The 4.9 magnitude temblor was centered about 17 miles southeast of San Clemente Island and 74 miles west of San Diego, according to the agencies’ preliminary report. It hit at 2:11 p.m. PDT.

Volcanic forces in this California Region have also continued this week, and as we can read as reported by the *Washington Post* News Service in their article titled “Second Quake Rattles Palm Springs Area” and which says:

A light earthquake rattled the desert around Palm Springs early Tuesday just hours after a smaller temblor hit the area, authorities said. There were no reports of damage from either quake, police said. The 4.4 magnitude quake struck at 12:31 a.m. PDT about 19 miles northwest of Palm Springs, according to the seismology lab at the California Institute of Technology. The rolling quake lasted about 30 seconds, said Sgt. Dan Rose of the Palm Springs Police Department. A 4.0 magnitude quake occurred at 9:08 p.m. Monday in the same location, according to CalTech.

But to the greatest danger, and according to these reports, facing the North American Continent remains their Northwest Regions, where American Scientists are becoming increasingly alarmed over their Oregon Region, and as we can read as reported by the *Los Angeles Times* News Service in their article titled “Geologists say ‘bulge’ may turn into volcano: 100 square miles of Oregon terrain rising 1.4 inches each year” and which says:

Half an hour west of this mountain town in central Oregon, in an area covered by forest, is a growing bulge in the terrain that scientists say could be the beginnings of a volcano. The bulge covers 100 square miles and is rising at a rate of 1.4 inches a year. The shape resembles a dome, with the highest point about three miles west of the South Sister volcano in the Cascades.

[At this point, repeating the contents of prior advisories, Sorch Faal reminds us of the thousands of small earthquakes experienced just last month in the Cascade Mountains; the many reports of smelly ‘outgassing’ experienced at numerous locations around the North American tectonic plate and the tens of thousands of small quakes registered in the New Madrid fault zone recently. Due to space constraints and to avoid repetition we will not detail these phenomena again at this time.] ...

While Russian Scientists, and Government Officials, have been preparing for more catastrophic earth upheavals, Western Scientists continue their attempts to blame human beings for the horrific changes to our world occurring now on an almost daily basis, and as we can read as reported by Australia’s *Mail & Guardian* News Service in their article titled “Scientists to search for greenhouse evidence” and which says:

An Australian scientific team set off for Antarctica on Tuesday to search for definitive

proof in the polar ice cap that human activity is responsible for rising levels of greenhouse gases. The team from the Australian Nuclear Science and Technology Organisation will drill 250m below the surface to obtain cylinders of ice containing trapped bubbles of methane dating back to 1750. Expedition leader Andrew Smith said while there was no doubt that levels of methane were rising, there was considerable debate over whether the increase was naturally occurring or linked to human activities that have taken place since the industrial revolution.

These actions by Western Scientists also stand in contradiction to their own scientific studies, and which also accurately describe the underwater landslide that occurred off of California’s coastline and as we can read as evidenced by the United States Geological Survey Marine and Coastal Geology Program’s report titled “Gas (Methane) Hydrates—A New Frontier” and which states:

USGS investigations indicate that gas hydrates may cause landslides on the continental slope. Seafloor slopes of 5 degrees and less should be stable on the Atlantic continental margin, yet many landslide scars are present. The depth of the top of these scars is near the top of the hydrate zone, and seismic profiles indicate less hydrate in the sediment beneath slide scars. Evidence available suggests a link between hydrate instability and occurrence of landslides on the continental margin. A likely mechanism for initiation of landsliding involves a breakdown of hydrates at the base of the hydrate layer.

The effect would be a change from a semi-cemented zone to one that is gas-charged and has little strength, thus facilitating sliding. The cause of the breakdown might be a reduction in pressure on the hydrates due to a sea-level drop, such as occurred during glacial periods when ocean water became isolated on land in great ice sheets. Methane, a “greenhouse” gas, is 10 times more effective than carbon dioxide in causing climate warming.

Methane bound in hydrates amounts to approximately 3,000 times the volume of methane in the atmosphere. There is insufficient information to judge what geological processes might most affect the stability of hydrates in sediments and the possible release of methane into the atmosphere. Methane released as a result of landslides caused by a sea-level fall would warm the Earth, as would methane released from gas hydrates in Arctic sediments as they become warmed during a sea-level rise. This global warming might counteract cooling trends and thereby stabilize climatic fluctuation, or it could exacerbate climatic warming and thereby destabilize the climate.

The United States Geological Survey in their reports further state, “Sudden explosions of methane gas occur frequently near the edges of active lava flows. Methane gas is generated when vegetation is covered and heated by molten lava. The explosive gas travels beneath the ground through cracks and fills abandoned lava tubes for long distances around the margins of the flow. Methane gas explosions have occurred at least 100m from the leading edge of a flow, blasting rocks and debris in all directions.”

To the Russian Scientists’ correctness in both the warning of these events, and to their catastrophic outcome for all of earth’s people, is evidenced in the simplicity of their findings that only in Massive Earth

Core Instability, and its associated tectonic pressures leading to massive releases of methane, can be explained the rising of world’s temperatures due to rising ocean temperatures, and which in turn are fueling massive storms all around the world and causing the earth’s greatest ice masses to melt at an ever-increasing accelerated rate.

But to Western Scientists, instead of the planning and preparations needed to protect their citizens, they instead continue their fruitless searching for other answers, and as we can read as reported by the *Reuters* News Service in their article titled “Antarctic ice melts as sea warms: Scientists” and which says:

Antarctica is melting, adding to the inexorable rise in global sea levels, endangering millions of lives and whole economies, scientists said yesterday. But while the effect is well known after years of monitoring from land and space, the reasons for the sea warming are not.

“We know sea levels will rise. We need to know by how much and why,” Anthony Payne of the University of Bristol and one of the organizers of a major scientific conference in London, said on the sidelines of the meeting at the Royal Society, Britain’s national academy of science. “This has implications for the whole world—most people and industries are in coastal areas,” he added. Payne said there was a net loss of mass in Antarctica as the snowfall in the centre of the frigid landmass was more than offset by sea ice melting around the edges.

As we have reported on many times, however, it is not to the protection of their citizens that is the concern of the Western Nations, but instead their actions are towards controlling them under totalitarian conditions and without freedom or rights, as each day brings more news of shocking and draconian laws being enacted to strip away from these unsuspecting peoples all rights to normal living.

But perhaps no country on earth is closer to achieving its goals of totally subjugating its peoples than the United States, and where their Homeland Security has announced that their [country’s] Concentration Camps are near completion, and as we can read as reported by the *Associated Press* News Service in their article titled “U.S. security chief strives to expel all illegal immigrants” and which says:

Homeland Security Secretary Michael Chertoff said his department aims without exception to expel all those who enter the United States illegally. “Our goal at DHS (Homeland Security) is to completely eliminate the ‘catch and release’ enforcement problem, and return every single illegal entrant, no exceptions.

“Thousands of Mexicans who are caught entering the United States illegally are returned immediately to Mexico. But other parts of the system have nearly collapsed under the weight of numbers. The problem is especially severe for non-Mexicans apprehended at the southwest border,” Chertoff explained. “Today, a non-Mexican illegal immigrant caught trying to enter the United States across the southwest border has an 80 percent chance of being released immediately because we lack the holding facilities,” he added.

“Through a comprehensive approach, we are moving to end this ‘catch and release’ style of border enforcement by reengineering our detention and removal process.”

And as amazing as it is for the rest of the world

to see, the American people themselves still fail to either see or understand that the ‘problem’ of illegal immigration in their once-great nation has served their Military Leaders’ goal of being able to build massive Concentration Camps, and without protest, but are far from designed to hold illegal aliens, but have instead been built for the purpose of containing the American people themselves ...

[At this point Sorcha Faal re-presents information on the “Camps of ICE”—special holding facilities for Immigration and Customs Enforcement which appear to be intended for BROAD application in the containment of troublesome individuals of all nationalities, possibly including that category of Americans who may be denied rights as “domestic terrorists”—and probably including sorted victims of “natural” disasters. Again, we will not re-present the information at this point due to space constraints.]

As to who these ‘threats’ are that these ICE Secret Police Forces will ‘remove’ should not come as a surprise to these Americans as their own President has already stated that those who do not support their Global War on Terrorism are themselves terrorists. As history has all too often shown, the Leaders of Fascist Nations are never more popular to the masses than when they shout of war and protecting the ‘Homeland’. And all that remains to be done by these American Military Leaders is to provide the final ‘cataclysmic event’ that will galvanize their citizens to relinquish what little remains of their freedom, and to which the plans have already been put into place, and as we can read from the *NewsMax* News Service in their article titled “FEMA’s Plan for Mass Destruction Attacks” and which says;

On June 19, [2003] FEMA posted a special bid notice for one of the agency’s largest contract awards ever—offering contracting firms \$300 million for a five-year contract to simply prepare plans to create temporary housing on a scale never before imagined, and then stand by. This is reportedly one of the largest contracts ever awarded by FEMA for a disaster preparedness program. The name of the program is entitled ‘Standby Technical Assistance for Disaster Related Operations’. FEMA officials met with the representatives of firms seeking the bids. Approximately 100 people attended the meeting. FEMA officials made very clear that the purpose of one of the most massive undertakings in the agency’s history was to prepare for potential mass destruction attacks on U.S. cities. Sources who attended the meeting tell *NewsMax* that most of the meeting dealt with how the firms should handle biological, chemical and nuclear disasters.

Today another dark day dawns, but perhaps nowhere on earth is it darker than in America, who while its children sleep, its leaders plot their total destruction.

ON THE BRINK OF TOTAL ECONOMIC COLLAPSE

Perhaps the ONLY way to really wake up the vast majority of sleepy, sheep-like Americans is to hit them where it really hurts—in their pocketbooks, bank accounts, real estate values, investments and retirement accounts. As we KNOW, an economic collapse IS COMING.

We do not put forward this information in order to propagate FEAR—but only preparedness. Anyone going into this collapse with debt will wish things were different. The “anyone and everyone

can make money in real estate” fantasy world is going to come unglued at the same time world financial markets fall apart.

At that point, some very “lucky” individuals might be very thankful for their “hedge fund” loans to the GAIA Program. Meanwhile, those who have listened regarding the benefits of properly operated Nevada corporations can continue to appreciate the value of reduced income and taxation along with incomparable asset protection—and possibly control of a “nest egg” out of the reach of vexatious litigants. And for those with both a GAIA Program “investment” and Nevada corporation shelter—think “golden” and smile a little.

We turn to Sorcha Faal yet again, in an article from October 31, 2005 entitled “World Markets on Brink of Total Collapse as Hedge Fund System ‘Broken’, United States Coup-Forces Counter Israeli Nuclear Bomb Smuggling Ring”.

[QUOTING:]

Russian Intelligence Analysts are reporting today that the World’s Financial Markets are on the ‘brink’ of total collapse due to the over \$1 trillion (U.S.) imminent failure of the World’s, mostly controlled by Israel, Hedge Fund industry, and to which European Markets are now sounding warnings, and as we can read as reported by the Britain’s *Evening Standard* News Service in their article titled “Gartmore warning sparks hedge fund fears” and which says:

Fears of a financial fallout in the hedge fund industry were fuelled today by a warning from Gartmore, one of London’s biggest fund groups, that ‘something is broken’ in European equity markets. The ominous statement—in a letter to investors from Gartmore managers Roger Guy and Guillaume Rambourg—comes as the firm calculated October has been its worst ever investment month.

This new European Union warning follows these past weeks’ total collapse of the Israeli-British-United States controlled Hedge Fund Operation named Refco, and to whose collapse is causing even more imminent failures, and as we can read as reported the *Business Online* News Service in their article titled “Refco debacle widens and now involves Austrian bank” and which says:

Austrian bank BAWAG is set to file lawsuits against Refco, as the widening scandal involving the U.S. futures trader has prompted a former Refco executive to cooperate with U.S. authorities trying to get to the bottom of the affair.

Austrian regulators last week also launched an investigation into the Refco debacle and expect to release a first report in a fortnight on BAWAG’s role in the accounting scandal. BAWAG is Austria’s fourth-largest bank. It was listed as Refco’s biggest creditor in papers filed by Refco in the U.S. bankruptcy court this month. BAWAG is owed E350m (\$424m, £238m) by Refco’s former chief executive, Briton Phillip Bennett, as well as E75m by Refco itself.

To the first warnings of the total collapse of the World Markets came with the United States’ arrest of Phillip Bennett, and as we can read as reported by Britain’s *Guardian Unlimited* News Service in their article titled “World’s hedge funds face crisis as Refco suspends trading” and which says:

A crisis in the world’s hedge fund industry was in prospect last night after one of the world’s

largest derivatives brokers was forced to freeze trades potentially worth billions of pounds.

The move by Refco, which acts for many leading speculative investors both on Wall Street and in the City, followed the discovery of accounts irregularities at the firm earlier this week and the issue of fraud charges against its former chief executive Phillip Bennett. Mr. Bennett has been charged with defrauding investors by using a hedge fund to hide \$430m (£250m) of debts owed to the firm. A British banker who has lived in the U.S. since 1978, Mr. Bennett has been released on bail of \$50m secured on a house in New Jersey, a Park Avenue penthouse apartment, \$5m in cash and funds raised by six co-signers of the bail bond.

The implications of the 15-day trading moratorium on the company's Refco Capital Markets subsidiary may be felt across the world financial system, depending upon the size of the funds caught up inside Refco and the types of institutions which are unable to remove their money from the operation.

Combining with the collapse of the World Hedge Fund Markets is the drastically rising inflation rates in the United States due to the combined stresses of their war spending, repeated natural disasters that have caused to date losses this year over \$500 billion (U.S.) and the unstoppable rise in fuel costs, and which are at an over 50-year high and are seeing the world's major investors fleeing the U.S. Capital Markets, and as we can read as reported by the AME Middle East Financial and Economy News Service in their article titled "4.7% US inflation: buy gold, sell U.S. treasury bonds!" [*keeping in mind that inflation is simply another hidden tax, reducing the value of savings over time*] and which says:

Last week the U.S. posted its highest monthly figure for energy price inflation in almost 50 years. Annual U.S. headline inflation is now 4.7%, the highest for 14 years, so U.S. Treasury-bond holders are losing money in real terms.

Let us look at those inflation figures a moment. The September rise in U.S. inflation of 1.2% was the biggest rise in 25 years; the annual inflation figure of 4.7% the worst since 1991; and the 12% surge in energy inflation was the highest since 1957. Economists drew comfort that inflation outside the energy sector was still very low. But are these guys not able to spot a trend when it is staring them in the face? Inflation is up, and it is up very substantially.

To the Americans being able to see what is 'staring them in the face' though it is almost too insane to believe the truths behind their machinations, and as reported by our Russian Economists the scheme operates like this:

The American workers do not enjoy state pensions but instead put portions of their wages into what are called 401K retirement plans. To date the total of these 401k retirement investments are over \$5 trillion (U.S.) and which are utilized for the protection of the United States' collapsing markets while their richest citizens and corporations [withdraw] their savings. American corporations under their laws also contribute towards these 401K plans, but to which they have not paid and when their debt to these plans become insurmountable they are then in turn allowed to declare their portions bankrupt, and as we can read as reported by the *New York Times* News Service in their

article titled "The End of Pensions" and which says:

Earlier this month, Miller and Delphi gave in to the pressure and sought protection under the bankruptcy code—the largest such filing ever in the auto industry. It followed by a few weeks the Chapter 11 filings of Delta Air Lines and Northwest Airlines, whose pension promises to workers exceeded the assets in their pension funds by an estimated \$16 billion. The three filings have blown the lid off America's latest, if long-simmering, financial debacle. It is not hedge funds or the real-estate bubble—it is the pension system, both public and private. And it is broken.

As incredible as it is to believe, it is nonetheless true that the American people themselves are not allowed to [withdraw] their 401K savings, even under their total collapse of worth, at the same time that their corporations are not required by their laws to even pay their promised share.

'PLAMEGATE' TO DISMANTLE ISRAELI SPY OPS?

There is little doubt that certain key pieces of information which have been released into the public domain through mainstream sources has come as a result of efforts by truly patriotic intelligence members outraged by the outing of one of their own. This backlash is having sweeping repercussions and could result in the removal of some of the hooks, rasps and suckers of a certain parasitic nation which has grown accustomed to feeding off its American host.

We cite again from Sorcha Faal's October 31, 2005 article entitled "World Markets on Brink of Total Collapse as Hedge Fund System 'Broken', United States Coup-Forces Counter Israeli Nuclear Bomb Smuggling Ring".

[QUOTING:]

... [R]eports from the United States are ... showing that the American Coup-Forces, led by their President's 'avenger' against the perpetrators of the September 11, 2001 Terrorist Attacks, U.S. Federal Prosecutor Patrick Fitzgerald, is continuing the dismantling of the vast Israeli Spying Operation in their country by reaching into the highest layers of the American government to target one of Israel's top U.S. spies named Irving [I. Lewis "Scooter"] Libby, and who holds like many other top American Government Officials dual United States/Israeli citizenship ...

In the aftermath of the September 11, 2001 Terrorist Attacks U.S. Federal Prosecutor Patrick Fitzgerald was the head of the United States' most important Anti-Terrorist Organization comprising elements of the American CIA, FBI and Defense Departments, and ordered by the American President to 'bring to justice' the 'true' organizers of this attack, 'both within and outside of the borders of the United States', according to Russian Intelligence reports.

The most vital of the intelligence assets provided to Prosecutor Fitzgerald was the oversight of the American CIA's most important operation for protecting the [United] States from smuggled nuclear weapons, the CIA operation named "Brewster Jennings & Associates" and of which we can read [*drawn from Wikipedia, the free encyclopedia*]:

Brewster Jennings & Associates was a front company set up by the CIA for Valerie Plame, an operative for the Agency whose identity was publicly disclosed in 2003.

Plame's status was revealed by Robert Novak (based on leaked information) in a 2003 column.

In an interview on CNN, he said "Wilson's wife, the CIA employee, gave \$1,000 to Gore and she listed herself as an employee of Brewster-Jennings & Associates. There is no such firm, I'm convinced." It later turned out that BJ&A did exist for all intents and purposes, listed on the Dun & Bradstreet database of company names.

Since NOCs (CIA agents under nonofficial cover) usually work at companies set up by the CIA itself as fronts, it has been speculated that other employees of BJ&A may also have been NOCs, doing work similar to Plame. If that were true, the damage done by leaking Plame's name would be vastly multiplied, as all the other NOCs would be compromised.

A spokeswoman for Dun & Bradstreet Inc., a New Jersey operator of commercial databases, said Brewster Jennings was first entered into its records on May 22, 1994, but wouldn't discuss the source of the filing. Its records list the company, at 101 Arch St., Boston, Massachusetts, as a "legal services office", which could mean a law firm, with annual sales of \$60,000, one employee, and a chief executive identified as "Victor Brewster, Partner".

101 Arch St. is a multi-tenant, class A, high rise, 21-story, 389,000 square foot (36,000 m²) office building located in the Boston financial district that houses a number of law firms, though there was no visual indication of Brewster Jennings being centered there. "All it was, a telephone and a post office box," a former intelligence official was quoted as saying, although the company was listed in an online database of law firms. Intended to infiltrate ties between groups involved in smuggling nuclear weapons, it was apparently named after the late Brewster Jennings, who served as president of a predecessor company to Exxon Mobil Corporation.

To the damage done to the United States' most important intelligence asset for the protection of their Homeland against attack by smuggled nuclear weapons has caused those American Coup Forces still loyal to their President to issue the sternest warnings to their citizens that an attack upon them is imminent, and in an action unprecedented in their country have been sending to all of their citizens at no cost a DVD movie about what is going to happen, and can be obtained by them by going to the website <LastBestChance.Org>. [*The website indicates that this DVD shows a probable scenario for a nuclear weapon to be smuggled into the country by a terrorist group.*]

But, and as even this week's recent events show once again, even with over two weeks warning of a catastrophic hurricane about to hit their country, the peoples living in the Hurricane ravaged Florida Region of the United States did nothing to heed their government's warnings, nor those of common sense. So, yet again, the spectacle of these strangest of people queuing for food, ice, water and fuel, in spite of the many warnings to prepare, once again shows their unwillingness to either believe, or even listen, to the warnings of their fates.

Not to true things are they able to hear anymore, even as their Nation enters what could very well be its final hours upon the world stage, and not to hearing the truth are they able to do, but only to the banning of truth from their eyes and ears are they now capable of. There truly must be no other people in this world today like these Americans, not even sympathy can they earn from the world anymore, only pity.

Save Your Life in a Major Earthquake

The following writing was presented earlier this year but is worthy of attention again at this time. If you cannot define what is a “triangle of safety” please study this information much more carefully this time around.

RE: SAVE YOUR LIFE IN A QUAKE AND STOP THE DUCK AND HIDE NONSENSE—GCH/d

* * *

STOP THE WRONG INFORMATION AND SAVE YOUR LIFE AND THOSE OF YOUR CHILDREN

If your first intention is to toss this input I suggest you immediately reconsider, re-read, and go complain to your local school, church and preschool-childcare center. This information is being distributed to all dwellers in the more central locations of Manila, Makati and places where people gather and might be caught in a major quake. This is ultimately one of the most important survival bits of information you will ever get so get it scattered and STOP THE NONSENSICAL DRILLS SET FORTH TO INSURE YOUR CHILD’S POTENTIAL FOR INJURY.

Ducking and hiding UNDER something is a truly sure way of not surviving if you are in a building collapse circumstance. Get into (within) the “triangle of life” BESIDE the strongest thing in your immediate room—and that is NOT the doorway.

I don’t need to explain this for it is nicely covered in the following emergency information to this hi-rise building. You are going to note this deals with immediate living circumstances but is ever so much the more important if you are at a mall so look around and check out the most sturdy ways to have a life-triangle in the event of being caught in a building collapse or major quake.

For you who would try the same in tornados I suggest you reconsider your circumstances for the situation is entirely different in those events where flying debris of actual “lift-off” is more crucial to consider. With that in mind we offer these suggestions and hope that you will clip them from the paper or make copies and PASS IT ON—especially to those in position of school instructors. If it doesn’t make sense to believe this then I suggest you study it again—more critically. I also suggest if you know anyone in the Fire Rescue Service or other Rescue personnel (i.e. Eric and Audrey in local Tehachapi), get them better informed and take an interest in your own family’s security since you are in Earthquake Country! This is

an approximately 27-story condominium building and since quakes are hitting again and again in more frequent intervals it is necessary to have everyone plan for such contingencies.

Total collapse of well-constructed buildings is not as likely as is falling debris shaken loose within the units themselves. In schools, however you find that you are dealing with, usually, single story buildings with some having two floors. The weight of overhead collapsing ceilings and roofs is your potential problem and if you or a child is under the desk they are most likely to get squashed fatally.

[QUOTING, *The Makati Tuscany NEWSLETTER*:]

This is in line with our safety and security program, and we would like to share with you information that we feel will help you prepare in emergency situations.

SURVIVING AN EARTHQUAKE

My name is Doug Copp. I am the Rescue Chief and Disaster Manager of the American Rescue Team International (ARTI), the world’s most experienced rescue team. The information in this article will save lives in an earthquake.

I have crawled inside 875 collapsed buildings, worked with rescue teams from 60 countries, founded rescue teams in several countries, and I am a member of many rescue teams from many countries. I was the United Nations expert in Disaster Mitigation (UNXO51-UNIENET) for two years. I have worked at every major disaster in the world since 1985, except for simultaneous disasters.

In 1996 we made a film, which proved my survival methodology to be correct. The Turkish Federal Government, City of Istanbul, University of Istanbul, Case Productions and ARTI cooperated to film this practical scientific test. We collapsed a school and a home with 20 mannequins inside.

Ten mannequins did “duck and cover” and ten mannequins I used in my “triangle of life” survival method. After the simulated earthquake collapse we crawled through the rubble and entered the building to film and document the results.

The film, in which I practiced my survival techniques under directly observable, scientific conditions, relevant to building collapse, showed there would have been zero percent survival for those doing duck and cover. There would likely have been 100 percent survivability for people using my method of the “Triangle of Life”. Millions of viewers on television in Turkey and the rest of Europe have seen this film, and it was seen in the USA, Canada and Latin America on the TV program *Real TV*.

The first building I ever crawled inside of was a

school in Mexico City during the 1985 earthquake. Every child was under its desk. Every child was crushed to the thickness of its bone. They could have survived by lying down NEXT TO THEIR DESKS IN THE ISLES. It was obscene and unnecessary, and I wondered why the children were not in the aisles. I didn’t at the time know that the children were told to hide under something.

Simply stated, when buildings collapse, the weight of the ceiling falling upon the objects or furniture inside crushes these objects, leaving a space or void next to them. This space is what I call the “triangle of life.” The larger the object, the stronger, the less it will compact. The less the object compacts, the larger the void; the greater the probability that the person who is using this void for safety will not be injured. The next time you watch collapsed buildings on television, count the “triangles” you see formed. They are everywhere. It is the most common shape, you will see, in a collapsed building. They are everywhere.

I trained the Fire Department of Trujillo (population 750,000) in how to survive, take care of their families, and to rescue others in earthquakes.

The chief of rescue in the Trujillo Fire Department is a professor at Trujillo University. He accompanied me everywhere. He gave personal testimony: “My name is Roberto Rosales. I am Chief of Rescue in Trujillo. When I was 11 years old, I was trapped inside of a collapsed building. My entrapment occurred during the earthquake of 1972 that killed 70,000 people. I survived in the “triangle of life” that existed next to my brother’s motorcycle. My friends who got under the bed and under desks were crushed to death (he gives more details, names, addresses, etc.). I am the living example of the “triangle of life”. My dead friends are the example of “duck and cover”.

TIPS FROM DOUG COPP:

1. Everyone who simply “ducks and covers” WHEN BUILDINGS COLLAPSE is crushed to death—every time, without exception. People who get under objects, like desks or cars, ARE ALWAYS CRUSHED.

2. Cats, dogs, and babies all naturally often curl up in the fetal position. You should, too, in an earthquake. It is a natural safety/survival instinct.

You can survive in a smaller void. Get next to an object, next to a sofa, next to a large bulky object that will compress slightly but leave a void next to it.

3. Wooden buildings are the safest type of construction to be in during an earthquake. The reason is simple: the wood is flexible and moves with the force of the earthquake. If the wooden building does collapse, large survival voids are created. Also, the wooden building has less concentrated, crushing weight. Brick buildings will break into individual bricks. Bricks will cause many injuries but less squashed bodies than concrete slabs.

4. If you are in bed during the night and an earthquake occurs, simply roll off the bed. A large void will exist around the bed. Hotels can achieve a much greater survival rate in earthquakes simply by posting a sign on the back of the bottom of the bed

during an earthquake. [Yes, we are still carefully quoting.]

5. If an earthquake happens while you are watching television and you cannot easily escape by getting out the door or window, then lie down and curl up in the fetal position next to a sofa, or large chair.

6. Everybody who gets under a doorway when buildings collapse is killed. Why? If you stand under a doorway and the doorjamb falls forward or backward you will be crushed by the ceiling above. If the door jam falls sideways you will be cut in half by the doorway. In either case, you will be killed.

7. Never go to the stairs. The stairs have a different “moment of frequency” (they swing separately from the main part of the building). The stairs and remainder of the building continuously bump into each other until structural failure of the stairs takes place. The people who get on the stairs before they fall are chopped up by the stair treads. They are horribly mutilated. Even if the building doesn’t collapse, stay away from the stairs. The stairs are a likely part of the building to be damaged. Even if the stairs are not screaming, fleeing people. They should always be checked for safety, even when the rest of the building is not damaged.

[H: THIS IS NOT TRUE IN TORNADO OR HURRICANE DISASTERS BECAUSE THE INNER CENTER STAIRS ARE THE BEST PLACE ABOVE GROUND TO FIND PROTECTION IN SUCH STORMS. IN SUCH STORMS YOU NEED AS MUCH SPACE, WALLS AND DISTANCE FROM FLYING WINDOW-GLASS AS IS POSSIBLE. IT IS ALSO WHERE THE STRUCTURE HAS THE MOST SUPPORT IN ALMOST ALL INSTANCES.]

8. Get Near the Outer Walls of Building or Outside of Them if Possible: It is much better to be near the outside of the building rather than the interior. The farther inside you are from the outside perimeter of the building the greater the probability that your escape route will be blocked. [Use your head, though, in case the shaking causes the walls and “sidings” to topple “off”.]

9. People inside their vehicles are crushed when the road above falls in an earthquake and crushes their vehicles: which is exactly what happened with the slabs between the decks of the Nimitz Freeway. The victims of the San Francisco earthquake all stayed inside their vehicles. They were all killed. They could have easily survived by getting out and sitting or lying next to their vehicles, says the author. Everyone killed would have survived if they had been able to get out of their cars and sit or lie next to them. All the crushed cars had voids 3 feet high next to them, except for the cars that had columns fall directly across them.

10. I discovered, while crawling inside of collapsed newspaper offices and other offices with a lot of paper, that paper does not compact. Large voids are found surrounding stacks of paper.

* * *

I suggest you truly take this information into your CONSCIOUS attention. When you teach yourself, your children and your friends WRONG ways of survival—good luck!

A BOOK WORTHY OF RE-PUBLICATION
WHEN APPROPRIATE
SIPAPU ODYSSEY

[End times? Revelations? The truth? A bit of fiction? It is all there for the serious reader. Like all of the Journals, a new revelation with each reading. See “Special Edition” of October 26 for complete reprint of this timeless Journal.]

FIRST, A LOOK AT THE ERRONEOUS
“BIRD-FLU” TERROR

Oh, indeed it is a serious matter to confront and do not think otherwise. It is NOT, however, the flu in either birds or people that is the problem and yet, depopulation IS a working program to bring you not only to less population of useless eaters but to begin to remove your very food resources. Even “eggs” come from birds, my vegan friends.

Cheese comes from those nice cows who now get both “mad” and can harbor H5N1—THE RECENTLY DEVELOPED CROSS-BREED VIRUS.

Well, we are a bit of a way from reintroducing the Drias BUT we can give you some insight into the care and tending of your food where you have people with facilities to protect yourselves—which, in fact, leaves out the majority of mankind.

Where you can do so, have a “freezer” and one as large as you can afford to stock and pay the electric bill. If you first wrap well even your flour and freeze it for a while it will get rid of bug larvae which ALWAYS come in ORGANIC, untreated grains FIRST. Store it in the freezer until needed if you have room for a FULL freezer will hold best.

The better you package your freezer food the longer it remains palatable—but that is not the point. The virus under discussion is rendered quite harmless by deep-freezing. Indeed it CAN be if defined through DNA research from tissues later but is quite harmless unless tampered.

Therefore good cooking methods that raise the temperature of the product itself will prevent the virus from remaining functional. Remember that when the Spanish Flu was killing everyone there was no common use of freezers and the BS about its being found in permafrost or spread from dead soldiers or chicken workers is just that, BS. The virus has to be TAMPERED to even present a “head cold”.

This is also a way to increase the costs to overburdened consumers into high gear right at Christmas time where fowl are the customary product for dinner. Culling fowl is the most atrocious thing I have witnessed since the slaughter of cows and sheep. Mankind does not, it appears to me, deserve to survive much longer as now experiencing. That virus, friends, moves right through a bird’s intestinal tract and if it dries on grain in a field, spreads far more rapidly than plucking feathers in a chicken barn.

Ah but yes indeed, you WILL SURELY DEMAND that you lose more freedoms, follow instructions according to the controllers and be thankful on bended knee that they have somehow “saved you”.

I suggest, further, that you are playing Russian Roulette with your own life and future immune system to participate in the garbage hits now offered by drug and chemical houses. I would discourage unprotected handling of any dead ANYTHING but proper disposal of said dead object is certainly sufficient.

To you who remember some of our old suggestions: I continue to suggest that, where you can, protect selves and stock with silver properly processed for at this “go” it is sufficient for the nerds can’t figure out how to make a virus without the necessary “neck” to hold on its “cap”.

No, we do NOT have obligation to supply it FOR YOU when our own colleagues have deliberately and with full intention of having us arrested and convicted, done what they could to penalize us in such a way. Even VKD sent all manners of lies and accusations to such as the FDA and called for a Grand Jury (Federal) to investigate our little people for mailing out a brochure, etc. We owe no one further “saving” for our immediate program truly must come first at this time. And no, you will NOT get proper Drias from other resources—anywhere—for, like our other “solutions”, we have no intention of giving permanent “creation” to anyone until we can give it to EVERYONE.

As to colloids? Silver is available [in health-food stores] and when we again clear the way for legitimate offering of such products we will offer that which is sufficiently high in frequency as to address every confronting microbe and viral life form.

The lessons are painful and our people are STILL PAYING THE VERY HIGHEST COST OF ALL while you are simply inconvenienced—but might well be getting a bit notably terrorized over probable impacts developed for use against you.

Yes, we have fully developing Drias now growing which could be freeze dried for restarting incubation solution. This is also true for mitochondria but is such that we don’t work too much on that because it simply requires alteration of the basic structure/DNA-RNA Drios/Dria cells. No, you do not know which are which. We do not tell you of these things to keep secrets and disallow you having same—we have to work “in the system” the same as do you and we will

not serve up these things before their time. Moreover, tampering with solutions is not a wise game, my friends, as neither is anything that tampers with “stem cells”. What YOU think might be good and “healthy” can actually mutate the very cells you need to have clear and clean. We have been there and done that with games and “assisting” God in his presentation and it is unacceptable. It is not likely “harmful” as is nothing God offers in natural form for proper use—including poison come from overdosage. At this time, moreover, we have no facilities for “flash freeze drying” nor the time or inclination to take on more loads.

So, back to the topic: Please just consider safety and comfort in using your friendly appliances properly and buy your food products from reputable sources and that DOES NOT mean special sources for the more acceptable the source the more apt you are to get BETTER products, frankly.

Do not avoid chicken on menus at say, KFC, for just the processing will clear out the crystalline nits. This will hold true of dinners in the freezer section of your markets and, frankly, you will find the products at the meat counter quite adequate in a good market as well as getting stocked up RIGHT NOW if you can—before the prices sky-rocket and, for instance, turkeys for holidays become extinct.

Do I think it important, really? Yes, I have even asked that Ekkers gets a small freezer to keep the spelt free of pollution for it must come from overseas and, as well, protect grains but mostly to have a few things on hand, frozen for immediate needs while possibly unable to get out.

WE ARE SO GRATEFUL TO NORM TWO-BY who so generously sent enough pesos to allow for that addition. It is not a big one but then, remember, these people are only TEMPORARILY in this place and can’t take it “with” them. Yes it IS important that they “make it through”.

May we now turn to again address some current foolishness from VK whose postings speak for themselves IF YOU KNOW TRUTH. Otherwise you are whistling Dixie in a HURRICANE and you might note such are getting larger, stronger and [more] massively destructive as are all upheavals of so-called “natural” events.

AND IT CAME TO PASS THAT
FOOLISHNESS FILLED THE ETHERS
[COULD THIS BE MADE INTO
A BOOK WORTHY OF PUBLICATION?]

Truly it is difficult to have to confront, every day, the absurdities of such as VK Durham, CEO of chaos, disinformation and outright LIES. It is, however, necessary for ultimately it is mandatory that we will have done the building of a solid and yet flexible FOUNDATION for the fulfillment of GOD’S WORK.

Do “I” enjoy the necessity for constant rebuttal and correction of such idiocy? Yes, for the evil Empire goes down quite annoyingly in an effort to attend itself. This is our responsibility to YOU to simply put corrections to print and then YOU DO THAT WHICH YOU WILL. We have no intention of reprinting everything VK publishes on her net but only the ones most representative of outright gibberish and fabrication.

One thing that VK continually presents is that somehow “we” do all these offerings and thieving while demanding a “50-50” split and somehow something of more atrocious fabrication “up-front” even to the outrageous unlimited amount of \$400 TRILLION just to China. No, nothing to China—YET. We do, however, keep “hoping”.

This is in addition to all those Islamic Banks which VK claims we have stripped along with YET NOW, the Federal Reserve, IMF, ALL the banks into infinity, not to mention the Muslims, Hindus, Prince Bandar, Saudis and the Tribes of Papua New Guinea, and on and on and on.

Let us first address “50-50” as an example of building on a lie and a REFLECTION OF HER OWN TRIALS AND ERRORS.

We have NO DEAL WITH THE FED WITH 50-50 AS EXPRESSED. READ OUR PROGRAM—AGAIN.

We get NOTHING UP-FRONT AND WILL, IN FACT, “BORROW” FUNDS AGAINST A LINE OF CREDIT FOLLOWING ANY TRANSACTION CONTRACTS OF ANY KIND.

HOWEVER: VK Durham has published [posted] and we have in our first affidavit REPEATED her very words as she gave multitudes of ways by which Bonus came into her hands. But it is the next that I want you to pay close attention to as it is from the person herself:: “...whereas on June 12, 1991 CSEML offered a 50-50 split with the U.S. Treasury...”. Please check it out for yourselves, we have added emphasis only. [CONTACT 1/30/2002, column 1, page 14]

It seems VK does something and then later claims that somebody else “did it”. This is the very thing with NESARA (NESRA) that she claimed for herself and now that it is a lot awkward to stomach responsibility for atrocious destruction, she claims it is our bag of awful tricks.

The current game of let’s plant a game came in a major writing VK posted on 10-18-05, “CROOKS & CRIMINALS IN THE HIGHEST OFFICES IN THE LAND, AND LAWS TO VIOLATE OUR RIGHTS TO PRIVACY?”

Please look at the tactics:
PARAGRAPH 3: *Recently while reading the latest publication of the GAIA-EKKER’S the statement was made: “We have loaned gold to the Federal Reserve” was discovered.*

Poppycrack—full blown!
The remainder of the entire document refers to that statement as IF TRUE.

It is NOT TRUE but, rather, a full-blown LIE.
There is no, never has been, any suggestion of LOANS to the Federal Reserve FOR ANYTHING, ANYTIME, ANYWHERE—FROM US!

There is no such statement in CONTACT to which she might be referencing but that publication IS NOT “GAIA-EKKER’S” ANYTHING!

REPEAT: **THERE IS NO SUCH STATEMENT SO SHE COULD NOT HAVE “DISCOVERED” IT IN ANY WAY, SHAPE OR FORM.**

For one simple basic fact, READERS, the Federal Reserve DOES NOT NEED LOANS OF GOLD OR ANYTHING ELSE FOR ITS PROCESS. The Federal Reserve presents baseless currency and thereby needs no SUPPORT of any kind. That’s

what its all about. Alpha!
The posting goes on with repeat after repeat of the nonsense and sometimes partial “sense” from the warped mind of one VKD as she presents visitors to Russell in his dying days and pours more and more idiotic claims to her stock of fabricated and fraudulent accusations.

I will point out a few so that you don’t miss it if you haven’t kept current on reality involving assets considered as our holdings.

VK DURHAM HAS NO CONNECTION, IMPACT OR TRUTH INVOLVING BONUS 3392-181 OR WITH SAID RUSSELL HERMAN—PERIOD. HOW LONG DO LIES CONTINUE TO BE FOSTERED BY IGNORANT AND FOOLISH PERSONS LOOKING FOR A GOOD TALE FOR “ARABIAN NIGHTS”?

VKD IS A PROVEN AND RECOGNIZED PATHOLOGICAL LIAR WITH A FANTASY MIND OBSERVED AS A DIAGNOSIS OF BI-POLAR SYNDROME (multiple personality disorder). It is not acceptable to continue to allow her to get away free and clear of the damages she inflicts on those about her and who associate, or associated in the past, with her.

Named personalities are as they present and if they don’t object to her antics then why might we? She does, however, go on into a major contradiction of her own as regards:

TIAS 12087
Please indulge me with a bit of wasted space in that this is a very sore spot in the series of lies and deceptions presented by what the Filipinos would refer to as the “Dragon Lady” of “smoke and mirrors”. This might actually be considered a compliment in the world of magical tricks and misperceptions.

This next appears on page two of four of this writing in point and leaving out the “run-in” we will pick up where even Greenspan, *et al.*, are named:

My Goodness!, Gosh, Gee, Gracious & GOOD GOSH GERTY WHAT A GASH IN “CRIMINAL LAW” and especially.. 18 U.S.C.’S “RICO STATS!!!” This, if TRUE makes GREENSPAN & ACCOMPLICES an accomplice to the murder..before, during and after the fact...

Of course the CRIMINAL CODES do not apply to CORPORATE AMERICA such as FED CORP’S or UK CORPS.. or those who indulged in putting the verbiage in TIAS 12087 I.E., THE CONTRA MONEY & DRUG LAUNDERING ARM of the Federal Reserve, Bush, Baker, Bentsen, Kissinger, North and others involved in the BCCI & S&L MESS of Neal Bush and Charlie Keating.

According to Russell “Greenspan, Bush and North visited his in his hospital room at Marion Illinois VA Health Care, and were trying to get him to ‘sign off on the documents..’ just days prior to Russell’s murder Bye the way: I was not the only witness to this statement of Russell’s.

While on the other hand; COMMANDER HATONN admits to be present as “Russell drew his dying breath and told then what he wanted

them to do with his portion of BONUS CERTIFICATE 3392-181...” [H: That’s a fact! However, Ekkers were not and never claimed to be present or ever to having met Russell Herman OR VK Durham personally in physical fact. VK did give some silly romantic statement at one time but couldn’t verify that she gently closed his eyes (assuming death) and said he should go now to be with Donny, etc. SHE WAS NOT PRESENT WHEN RUSSELL EXPIRED! Neither were there any others, including 9-ft lizards at his bedside while VKD was too busy working her grabbit games at the time. Now allow us to skip a paragraph and move on and pick up with:]

“Hoooo Boy! Here we have 11 Grand Juries investigating the WHITE HOUSE... which, in all probability will find some way to wiggle out of all these CRIMINAL ACTS... I say they will “WIGGLE OUT” because Patrick Fitzgerald is taking too long to make the statement “THE OLD BOYS ARE GUILTY AS SIN... They used and abused their Powers of Offices of Public Trust for PERSONAL GAIN and indulged in the most heinous Acts of Deception, Malfeasance, Moral and Legal Turpitudes, Misprision of Felonies, Stacking the Federal and State Legislatures making illegal acts “Legal”..., and then there are the allegedly, reported current matters of Espionage, Sedition and Treason and influenced Acts of Congress to set forth and Treaties international agreements other than treaties section 12087 back in the years of 1984 through 1986 to give them immunity from all prosecution, which will be protected under the VIth Amendment’s Sec. 2.”

Ok, what about those things regarding 12087?

If any one of you took time to read the basic structure of what VKD wanted in her TRUST (in 1997) you will find SHE COPIED THOSE ARTICLES TO FIT HER OWN SELF AND PROTECT HERSELF FROM ANY IMPACT WHATSOEVER AS SHE TOOK “DIRECTLY” FROM INTER-AMERICAN INVESTMENT CORPORATION FOR WHICH SHE THEN ACCUSED US OF STEALING.

Furthermore, SHE TOOK THE VERY ATTACHMENT OF “TIAS 12087” AS PART OF HER “TRUST” NAME.

Do I take a “stand” in behalf of “those crooks and criminals”? No, but VK should not be allowed to get away with worse subterfuge and disinformation.

We incorporated IAIC for the SPECIFIC reason of keeping VKD from being able to butcher and confound that very entity and it remains in full incorporated protection. We do not have any input to any of Bush’s further dealings with such a corporation or what the Federal people might be up to using and certainly that does include the Federal Reserve. We have no interaction with the Federal Reserve.

Please just run the posting and let us keep on this until it is clear and properly presented.

GCH

[P.S.:] I am quite “real” so perhaps at some point you can get comfortable with that FACT! Moreover, when you recognize that most “humans” are NOT “humanitarians” as accepted by definition, perhaps you will begin to get the BIG picture.

The New Jerusalem

Part 9: Jewish Power Lists

With ongoing appreciation for permission to reprint, we continue with the serialization of daring author Michael Collins Piper’s The New Jerusalem: Zionist Power in America.

[QUOTING:]

PRO-ISRAEL COLUMNISTS AND COMMENTATORS

Writing on MSNBC.com on April 2, 2003, Jewish-American writer Eric Alterman provided a fascinating overview of the preponderance of pro-Israel commentary that appears amongst columnists and commentators in the American media, not all of whom (obviously) are Jewish, but who—in most cases—work for media outlets that, in many cases, are either owned outright by Jewish financial interests or which are heavily influenced by the Jewish community.

The list provided by Alterman follows, although a considerably smaller list of other columnists who are critical of Israel—including such obvious names as Pat Buchanan—has not been included. Please note that the prefatory descriptive material preceding the various lists of names is Alterman’s terminology, although we have noted those columnists who are not known to be Jewish by rendering their proper names in italics. In brackets we have also added additional material of our own, that is clearly noted as an editorial insertion.

many Jewish families in New Orleans during the 18th and 19th centuries. This may well be the first time that Trohan’s revelation may have ever been committed to print. However, for expediency’s sake, we will list Buckley here as being “non-Jewish”, his reported ancestry notwithstanding—Ed.]

- Avishai Margolit, *The New York Review of Books*
- David Remnick, *The New Yorker*
- Eric Alterman, *The Nation* and MSNBC.com
- *The New York Times* Editorial Board
- *The Washington Post* Editorial Board

Clearly, Alterman’s lists are very instructive indeed, demonstrating beyond any question that—when it comes to the issue of the media’s reportage of the Middle East question—a predominant Jewish and pro-Israel bias is in place.

The names on Alterman’s lists are virtually the “cream of the crop” of the elite media in America. Anyone who would suggest that there is not a pro-Israel bias on the part of the elite media commentators is speaking from an agenda and therefore to be dismissed.

Needless to say, not all of the names on Alterman’s lists are Jewish by any means, so it cannot be suggested that “Only Jewish columnists are pro-Israel.” In fact, there are many non-Jewish writers who have adopted a slavish, pro-Israel stance and, if truth be told, it’s been quite good for their careers. And that, of course, might well be the best explanation as to why otherwise intelligent and balanced folks suddenly seem to lose all common sense on the sole issue of Israel. In short, promoting Israel is a lucrative

business—even if the results are often bad for America!

THE JOE LIEBERMAN EFFECT (IN THE 2000 ELECTION) JEWISH CAMPAIGN MONEY ‘HIDDEN FROM PUBLIC’

No one knows for sure how much of the Democratic Party’s money comes from Jewish contributors (“We don’t even have statistics like that,” the Democratic National Committee says), but estimates from knowledgeable sources—none willing to speak on the record—start at 30 percent and go up from there.

According to the Center for Responsive Politics, Jews account for more than one-third of the DNC’s largest individual donors (\$100,000 and above), based on reports released by the Federal Election Commission [in August 2000] . . .

If anecdotal evidence is to be believed, the DNC could take in \$5 to \$30 million (up to 75 percent more than Jews have given in previous election cycles) above its anticipated fund-raising goal of at least \$130 million. An additional \$30 million would equal almost the entire sum the Democrats spent on advertising this summer [of the year 2000].

In a tight race where Republicans enjoy a slight financial edge, extra Democratic money could make a difference, probably more of a difference than even the most dramatic swing by Jewish voters

Potentially more significant is the way the Connecticut senator’s selection is turning fund-raisers for Jewish causes into fund-raisers for Gore-Lieberman ... Will the Jewish community’s remarkable financial effort on the Democratic ticket’s behalf make a difference? Not, it hardly needs saying, in the way Pat Buchanan might imagine.

Gore and Lieberman’s Jewish donors are not trying to make the ticket beholden to “Jewish interests”, whatever those are. They disagree among themselves on many questions of policy, and their support is more an act of communal pride than an investment in future behavior. But the donations could affect the election nonetheless.

And so, in an odd historical footnote, the most important electoral effect of Joe Lieberman’s selection may remain largely hidden from a public that seems otherwise obsessed with his candidacy’s every detail.

KEEPING JEWISH AFFLUENCE A SECRET

Max Geltman, a reactionary identified with the *National Review*, revealed in his book, *The Confrontation*, that: “It’s by now an open secret that in 1957 the American Jewish Committee interceded with the Bureau of the Census in Washington and besought it not to ask questions about income related to national groupings in the 1960 census, for fear that the comparatively high income levels of the Jewish minority would lead to anti-Semitic outrages. The Bureau complied.”

‘THE RICHEST ETHNIC GROUPING’

If [the Jews] are 2.54 percent of the population, they take in approximately 5 percent of the national income. Jews are almost 7 percent of the country’s middle and upper classes, taken together. In 1972, almost 900,000 Jewish families out of two million were middle and upper class, while only 13.5 million out of 53 million American families were so classified. According to [Gerald Krefetz, writing in *Jews and Money*], 43 percent of all Jews earned \$16,000 plus, in contrast to only 25.5 percent of all Americans.

And while only a little under 5 percent of the Jewish population is in millionaire families, Jews

constituted a fluctuating 23-26 percent of the 400 richest Americans between 1982 and 1985, and perhaps more of the taxpaying millionaire population, which was estimated at 574,342 in 1980.

There is no doubt that, on average, American Jewry is the richest ethnic or religious grouping in the country. According to the June 1984 *American Demographics*, the average annual Jewish household income is \$23,300, compared to \$21,700 for Episcopalians.

Presbyterians received \$20,500, religiously unaffiliated took in \$17,600, Catholics made \$17,400, Methodists \$17,000, Lutherans averaged \$16,300. White fundamentalists and Southern Baptists earned a piddling \$14,000 plus. Statistics show that Jews have been earning more than Episcopalians and Presbyterians, the archetypal WASPS, since the late 1960s ...

No longer a pariah elite, the modern American Jewish rich are the full partners of their Christian equivalents.

A WHO’S WHO OF THE JEWISH ELITE ...

What follows is list of wealthy American Jews, the sources of their wealth, and the estimated wealth (in 1986 dollars) as assembled by Jewish-American writer Lenni Brenner, based in part on the famous *Forbes* 400 list of the wealthiest Americans. Obviously, as we’ve noted, the names and dollar amounts are constantly subject to change, and later in these pages [*next issue*] we take a more up-to-date look (as of the *Forbes* 400 list for the year 2004) at those among the Zionist elite who have made the list of America’s—and indeed the world’s—wealthiest.

What, of course, the *Forbes* 400 list does not include are those families and individuals who fall below the top 400 in ranking, and it should be pointed out that such a listing—of the top 1,000 richest, for example—would be quite revealing.

And since *Forbes* does not list the names in rank order, but only in alphabetical order, it is often hard to determine, at first glance, how predominant Jewish names—or Irish or Italian names for that matter—appear in the list.

Nonetheless, the *Forbes* rankings are most instructive and demonstrate beyond any question that

Zionist families have achieved immense wealth in America today.

Although we hear much about “hate crimes” and “the rise of anti-Semitism” and how horrible were the crimes against the Jewish people in the past, that same media which tells us of all of this does not seem eager to point out that the Jewish people in America have riches beyond most people’s wildest imagination.

But let us proceed . . .

WHAT JEWISH LEADERS BELIEVE . . .

The most important study of the younger [Jewish community activists] leadership is Brandeis professor Jonathan Woocher’s “The ‘Civil Judaism’ of Communal Leaders”, in the 1981 *American Jewish Year Book*. He looked at 309 middle and upper middle-class participants in leadership development programs of the United Jewish Appeal and the community federations. According to the professor . . . “[N]early 65 percent deny that Jewish values are basically the same as those of all religions, and more than three-quarters acknowledge a ‘special’ Jewish responsibility to work for justice in the world ... “Nearly 60 percent ... view the Jewish contribution to modern civilization as greater than that of any other people ... 70 percent ... claim that they feel more emotion listening to ‘Hatikvah’ (Israel’s anthem) than to ‘The Star Spangled Banner’ ... a majority reject the proposition that an American Jew owes his/her primary loyalty to the United States.

“Further, while all but a handful ... are glad to be Americans, only 54 percent are strongly so, compared with 86 percent who strongly assert that they are glad to be Jews ... 63 percent ... explicitly affirm that Jews are the chosen people (and only 18 percent actually disagree).”

POLITICAL INFLUENCE EXCEEDS NUMBERS

... [T]he Jews being the richest grouping in the country, it is only to be expected that, as Will Maslow, general counsel of the American Jewish Congress has written [in *The Structure and Functioning of the American Jewish Community*]:

“The percentage of Jews ... who involve themselves in party affairs as policy-makers and fund-raisers, is probably higher than that of any other racial, religious or ethnic group. The result is that Jews play a role in the political life of the country whose significance far transcends their proportion of the total population.”

JEWS IN THE U.S. HOUSE OF REPRESENTATIVES

Gary Ackerman (D-N.Y.); Shelley Berkley (D-Nev.); Howard Berman (D-Calif.); Eric Cantor (R-Va.); Ben Cardin (D-Maryland); Susan Davis (D-Calif.); Rahm Emanuel (D-Ill.); Eliot Engel (D-N.Y.); Bob Filner (D-Calif.); Barney Frank (D-Mass.); Jane Harman (D-Ca.); Steve Israel (D-N.Y.); Tom Lantos (D-Calif.); Sander Levin (D-Mich.); Nita Lowey (D-N.Y.); Jerrold Nadler (D-N.Y.); Steve Rothman (D-N.J.); Bernie Sanders (I-Vt.); Jan Schakowsky (D-Ill.); Adam Schiff (D-Calif.); Debbie Wasserman

Schulz (D-Fla.); Allyson Schwartz (D-Pa.); Brad Sherman (D-Calif.); Henry Waxman (D-Calif.); Anthony Weiner (D-N.Y.); Robert Wexler (D-Fla.)

VOTING POWER NEARLY TWICE THE NUMBERS

Jews are 10.6 percent of New York State’s population. They are 5.9 percent of New Jersey with 100,000 in Bergen County and another 95,000 in Essex County. Jews are 4.8 percent of the District of Columbia. They are 4.7 percent of Florida, with 225,000 in Miami alone. They are 4.6 percent of Maryland with 100,000 in Montgomery and Prince Georges County and 92,000 in Baltimore, 4.3 percent of Massachusetts with 170,000 Jews in Boston.

They may be only 3.2 percent of Californians, but there are 500,870 Jews in the Los Angeles area and 75,000 Jews are roughly 10 percent of San Francisco. There are 295,000 Jews in metropolitan Philadelphia and 253,000 in greater Chicago.

As the Jews are the most educated stratum of the electorate, they vote in greater proportions than any other ethnic or religious grouping. Ninety-two percent of all Jews vote in national elections compared to only 54 percent of the people as a whole. Jews may only be 10.6 percent of New York State, but they are between 16 percent and 20 percent of the voters.

More important, they were 30 percent of the voters in the April 1984 New York State Democratic primary, when they made up an estimated 41 percent of Mondale’s vote. They are customarily nearly 50 percent of the Democratic primary voters in mayoral contests.

JEWS ‘MAGNIFY THEIR VOTING POWER’

Although Jews are a small minority, they exercise their right to vote and thus magnify their voting power. About 80 percent of eligible Jews in the United States are registered to vote, compared to about 50 percent of all voting-age adults. In addition, registered Jews are twice as likely to vote. Combining the two multiplies Jewish voting power by a factor of three. Furthermore, 81 percent of Jews live in only nine states, making them a significant political bloc, especially on the national level. In presidential elections, those nine states cast 202 of the 535 votes in the Electoral College. Thus, the Jewish population could provide the swing vote in any close presidential election.

JEWISH POPULATION CONCENTRATION AND PERCENTAGE OF TOTAL ELECTORATE

	% of Jews	% of Electorate
New York	9.0	18.3
New Jersey	5.5	9.9
Florida	4.7	8.2
Massachusetts	4.5	8.3
Maryland	4.3	8.1
Connecticut	3.0	6.2
California	3.0	6.2
Pennsylvania	2.7	4.9
Illinois	2.3	3.9

JEWISH POLITICAL ACTION COMMITTEES (PACS)

What follows is an illustrative, but by no means complete, list of political action committees (PACs) operating as part of the American Jewish sphere of influence today. Virtually all of them have names which are quite innocuous and which do not reflect either their Jewish or pro-Israel bias. In fact, most (if not all) of these PACs are geared toward the election

of pro-Israel candidates, and their combined influence points toward an amazing conglomeration of both financial and political power.

While, initially, it may seem a terrible waste of the printed page to list this seemingly unending listing of names, which, on their face, mean very little, bear in mind that these PACs—so broadly based across America—have long had the capacity to work together in order to elect candidates of their choosing. Of course, they all say that they are “independent” of one another, but anyone who believes that will believe anything!

National PAC (Washington, DC); Joint Action Committee for Political Affairs (Illinois); Citizens Organized Political Action Committee (California); Desert Caucus (Arizona); Delaware Valley PAC (Pennsylvania); 24th Congressional District of California PAC; Hudson Valley PAC (New York); Capital of Texas Committee; East Midwood PAC (New York); Balpac (Illinois); Connecticut Good Government PAC; City PAC (Illinois); Gold Coast PAC (Florida); Elections Committee of the County of Orange (California); South Bay Citizens for Good Government (California); Icepac (New York); Topac (Illinois); Long Island PAC (New York); Government Action Committee (Texas); Kings County PAC (New York); Ocean State PAC (Rhode Island); Tennesseans for Better Government; Americans for a Better Congress (Illinois); South Carolinians for Representative Government; Silver State PAC (Nevada); For Integrity in Government (Texas); Badger PAC (Wisconsin); South Florida Caucus; Suffolk PAC (New York); Young Americans PAC (California); Seattle PAC (Washington State); Fund for Freedom (Washington, DC); Chaipac (Missouri); Walters Construction Management Political Committee (Colorado); Garden PAC (New Jersey); Northern New Jersey PAC (New Jersey); Americans for Better Citizenship (New York); AG PAC (Iowa); South Texas Area PAC; Northeast Penn PAC; Heritage PAC (Massachusetts); Chipac/An Illinois Not for Profit Organization; Mississippians for Responsive Government; Florida Congressional Committee; St. Louisans for Better Government; Roundtable PAC (New York); San Franciscans for Good Government; Americans for Good Government (Alabama); National Action Committee (Florida); National Bipartisan PAC (Washington, DC); Hollywood Women’s Political Committee; Mid-Manhattan PAC; Citizens Concerned for the National Interest (Illinois); Arizona Politically Interested Citizens; Mopac (Michigan); Garden State PAC (New Jersey); Pacific PAC (California); Massachusetts Congressional Campaign Committee; Congressional Action Committee of Texas; Multi-Issue PAC (Illinois); Louisianans for American Security PAC; Women’s Pro-Israel National PAC (Washington, DC); Georgia Citizens for Good Government; Committee for 18 (Colorado); Chicagoans for a Better Congress (Illinois); San Diego Community PAC (California); Heartland PAC (Washington, DC); Tx PAC (Texas); To Protect Our Heritage (Illinois); St. Louis PAC; Sacramento Area Good Government Association; Religion and Tolerance Committee (Washington, D.C.); Adler Group, Inc. PAC (Florida); RRD and B Good Government Committee (Washington, D.C.); Baypac (Florida); Maryland Association for Concerned Citizens; Campaign for America (New Jersey); Five Towns PAC (New York); Cap PAC (Washington, DC); Lower Westchester PAC (New York); Freedom Now (California); Southwest Political Action Caucus (New Mexico); Barbary Coast (California); State Pac (New York); Pennsylvania PAC; Wilamette PAC (Oregon); South-Brook PAC (New York); Mobilization PAC (New York)

And believe it or not, but this list isn’t even complete! But it is certainly a representative sampling which demonstrates how the Zionists have cleverly disguised their PACs under innocuous names.

PACs come and go, but the Jewish-oriented PACs have proven among the most durable and the irony is that such politically-influential organizations actually emerged after the Watergate scandal during the period when “reform” was very much in the air.

In fact, as we can see from the burgeoning influence of such PACs, the effect of the post-Watergate “reforms” was the effective institution of Jewish political power on the American scene, perhaps in a fashion as it had never been seen before.

ISRAELI IMMIGRANTS AND ORGANIZED CRIME

Between 1950-79, 96,504 Israeli citizens received legal immigrant status here. An estimated 23,000 are estimated to be illegals. Native-born Israelis have been the majority since 1966, and about 75 percent since 1978. The emigre stream increases by about 10 percent each year. A little fewer than one out of 50 Jews in America are now ex-Israelis.

Three-quarters live in New York, New Jersey, Illinois or California, with most living in areas with high concentrations of Jews. More than 70 percent are professionals and white-collar employees, but about 5 percent are in services, notably as taxi drivers, and sometimes owners of fleets.

The high visibility of these has given the public the illusion that the bulk of the migrants are lower class. There is one element, however, that has deeply prejudiced many Jews against them. The April 29, 1984 *Jerusalem Post* reported that a U.S. Senate Judiciary Committee study estimates that “approximately 1,000 individuals” are involved “in a myriad of organized criminal activities.”

Their activities are growing in New York, California and elsewhere, and include “insurance frauds, fictitious billing, bankruptcy fraud, extortion, narcotics deals, illegal immigration and homicide ... these Israelis are heavily involved in the importation and distribution of narcotics, especially cocaine and heroin.”

JEWS AND THE COMMUNIST PARTY USA

There is no exact figure, but certainly the Jewish proportion of the Communist Party of USA exceeded that of any other ethnic community. An educated estimate would be that between 40 and 50 percent of the party was Jewish between the late 1930s and mid-1940s.

JEWISH WOMEN TOP NON-JEWISH WOMEN

[A] 1990 study found that 78 percent of Jewish males twenty-five and older had at least some college education, compared to only 42 percent of all white males: 65 percent of Jewish men graduated, compared to 57 percent of all white males; 32 percent did some graduate work, compared to only 11 percent of all white males. Jewish women have also had a great educational advantage over non-Jews, with a 60 percent college attendance record compared to 34 percent of all white females. That might explain why so many Jewish women were among the pioneers of the feminist movement. ... According to the April 1999 issue of *Biography magazine*, 50 percent of the “25 Most Powerful Women” were either Jewish or had Jewish parents.

NEVADA CORPORATIONS:

Maintaining Privacy Of Corporate Records

Budget’s “Tip of the Week” #2:

NRS 78.257—Right of stockholders to inspect and audit financial records; exceptions

Last week we discussed *NRS 78.105* and how it appears to have been written specifically to provide access to the corporation’s records by the corporation’s *stockholders*. What about a case where the stockholder’s interest in accessing the records has nothing to do with the stockholder’s interest in the corporation? And what about other parties who might want to access the corporation’s private records? *NRS 78.257* holds the answer to those questions, though the answers are, no doubt, NOT what such parties might wish to hear!

After defining who is entitled to inspect the corporate records and the notice that must be given for doing so in paragraph 1, then specifying that the inspecting party bears the costs of extracting such in paragraph 2, *NRS 78.257*, paragraph 3, states (emphasis added):

3. The rights authorized by subsection 1 may be denied to any stockholder upon his refusal to furnish the corporation an affidavit that such inspection, extracts or audit is not desired for any purpose not related to his interest in the corporation as a stockholder. **Any stockholder or other person, exercising rights under subsection 1, who uses or attempts to use information, documents, records or other data obtained from the corporation, for any purpose not related to the stockholder’s interest in the corporation as a stockholder, is guilty of a gross misdemeanor. ...**

A gross misdemeanor conviction is punishable by incarceration for up to one year in the county jail and a \$2,000 fine. Note that this statute spells out rights of the *stockholders* to inspect corporate records—the *stockholders*, not “just anyone”. **There is no mandate of any kind for non-stockholders to ever inspect any corporate records. It is a gross misdemeanor for any non-stockholder to even attempt to use information from the corporate records in any way contrary to the interests of the stockholders.**

Next week, we’ll look at a method of owning a corporation without owning its stock—and yes, the answer to that riddle can also be found built right into the *Nevada Revised Statutes*!

I am quite “real” so perhaps at some point you can get comfortable with that FACT! Moreover, when you recognize that most “humans” are NOT “humanitarians” as accepted by definition, perhaps you will begin to get the BIG picture.
