A PERSPECTIVE ON AIDS

TIME SUBJECT

00:00 A Perspective on AIDS

This tape is a discussion about AIDS, how it came to be a tool of population control, the social implications and treatment. Hatonn interacts with a guest in the audience who is a physician (no name given).

Everything is Light, everything is illusion. There must be desire to give up the condition of illness. Tones, colors, frequency patterns. Bruce Cathie's work. Dealing with replication also an issue.

Responsibilities of AIDS carriers and the general population are discussed, along with information on methods of infection, right to work, and privacy laws. Enforcement of reporting criteria brings forth the big question of "HOW".

Hatonn speaks about the Laws of God and Creation, homosexuality, the secret antidote, how AIDS creates weakening of the immune system and brings forth all manner of disease including syphilis.

Hatonn closes with the spiritual implications of human behavior.
