# Huge Sumatran Quake: Entire Planet Vibrating

9.0 Earthquake, Largest in 40 Years, 1000 Kms: 'Quake Even Disturbed Earth's Rotation'

As we prepare for publication of this issue we have "stopped the press" to provide focus on the current headline story. Even as tensions have risen on the global geopolitical stage the planet herself is releasing pressure and the timing is probably not just "coincidental".

Our recent attention to the writings of Tom Bearden relating to scalar energy interferometers along with the recent recognition of a formal alliance in opposition to U.S. hegemony and bankster imperialism underscore the likelihood that there is a lot more going on behind the scenes than that which is presented.

At last report, the magnitude has been upgraded to 9.0 (from 8.5 initially) and the death toll is estimated to be in excess of 11,300 with tsunamis affecting coastlines even as far away as Africa. The huge quake occurred along a 1,000-Km stretch of fault line with the epicenter in Sumatra.

[Quoting from an Associated Press article

entitled "Tidal Waves Kill More Than 3,900 in Asia" (by Lely T. Djuhari, 12/26/04):]

**"All the planet is vibrating"** from the quake, said Enzo Boschi, the head of Italy's National Geophysics Institute. ...**Boschi said the quake even disturbed the Earth's rotation.**

The Indonesian quake struck just three days after an 8.1 quake struck the ocean floor between Australia and Antarctica, causing buildings to shake hundreds of miles away...

[END QUOTING]

A Reuters article contained the following, possibly revealing quote: "I heard an eerie sound that I have never heard before. It was a high pitched sound followed by a deafening roar," said a 55-year-old Indian fisherman who gave his name as Chellappa. "I told everyone to run for their life."

Antarctica has been in the news recently regarding the launching of special "weather balloons" (?) to measure incoming cosmic radiation. Readers should

keep in mind that a certain cosmic visitor is approaching from the south (and you might want to look up the significance of Antarctica as referenced in the Phoenix Journal, Skeletons in the Closet) as we direct your attention to the next two articles dealing with "unknown energy surges".

[QUOTING:]

UNKNOWN ENERGY SURGES CONTINUE TO HIT PLANET. GLOBAL WEATHER SYSTEMS IN CHAOS

By Sorcha Faal, 12/22/04

As reported to the Russian Academy of Sciences

An increasingly panicked global effort is now underway by the world's top scientists to understand an unprecedented series of "blasts", energy surges, which the planet has been taking from an as yet unknown source which has been bombarding Antarctica with cosmic rays and disrupting Northern Hemisphere weather systems on a global scale.

The first of these cosmic ray blasts occurred nearly 5 years ago and have been increasing in their

frequency and intensity since the end of November. The once normally darkened skies of the Northern Hemisphere's Arctic regions are now in twilight due to these blasts. Wayne Davidson, from the Canadian Government's weather station at Resolute Bay, located in the Arctic Circle, says about this mysterious lighting, *"The entire horizon is raised like magic, like the hand of God is bringing it up."*

On December 1, 2004 the largest recorded blast sent not only shockwaves through the world scientific community but also through the Northern Hemisphere resulting in one of the largest weather events in recorded human history when 86,800 square miles of China was shrouded in fog, bringing transportation systems (especially air travel) to a virtual standstill throughout the country. *[We are unable to come up with independent corroboration of this specific phenomenon at this time but please see the article, "Noon Turns to Night As Cloud Blacks Out Sun" at the end of this piece for yet another indication of scalar-energy manipulation in China.]*

As reported by the BBC in [an] article from October, 2002, *"German scientists have found a significant piece of evidence linking cosmic rays to climate change. They have detected charged particle clusters in the lower atmosphere that were probably caused by the space radiation. They say the clusters can lead to the condensed nuclei which form into dense clouds."*

These German scientists from the from the Max Planck Institute of Nuclear Physics in Heidelberg go on to say that their measurements *"have for the first time detected in the upper troposphere large positive ions with mass numbers up to 2500"*, and *"Our observations provide strong evidence for the ion-mediated formation and growth of aerosol particles in the upper troposphere."*

What they hadn't expected to happen though has been the large scale occurrences of this over the past few weeks, to include China on December 2<sup>nd</sup> and 14<sup>th</sup> and then India on the 21<sup>st</sup>, which is due to both China's and India's reliance on fossil fuels and the continuing degradation of their air quality.

The effects of these blasts have also been felt throughout the rest of the Northern Hemisphere resulting in such freak occurrences as, hurricane force winds in Paris, Germany, Canada, Russia, England and the United States on an almost simultaneous basis. Accompanying these hurricane-force winter winds have been the massive cold fronts following them dropping normal winter lows to record lows throughout the entire Northern Hemisphere.

Though not yet at a point to acknowledge this publicly, some of the world's top scientists are beginning to see an astrophysical correlation between these cosmic ray blasts to our planet and an ever increasing number of global events relating to atmospheric explosions of inbound meteors, such as those in Indonesia, where a meteorite was picked up by their Air Forces radar, China, where a meteorite explosion turned 'night into day' and Washington D.C. where one police official stated, *"It looked like a ball of fire falling out of the sky."* *[Readers might recall Commander Soltec's statement that meteors are attracted to areas prone to earthquakes.]*

The world's top scientists have begun coordinating with Dr. Eun-Suk Seo from the United States University of Maryland, and her team, in a 'search'

for answers to the origin of these cosmic ray blasts directed from an *unknown origin* in space towards the South Pole and disrupting our global weather systems.

Under Dr. Eun-Suk Seo her and her international team's direction NASA launched a stratospheric balloon on December 20<sup>th</sup> from Antarctica's McMurdo base and have stated, *"The balloon, following circulation of winds high, will sail around the ice continent for about three weeks. During this time, data of great scientific interest will be gathered. These data concern flows of charged particles of highest energy (cosmic rays) coming from Space."*

But as one Russian scientist said to us, and who wished to remain anonymous, *"Why this game? We all know what's happening."* an apparent reference to the fact though these events are well known to both world governments and the scientific establishments they are beyond the understanding of the general public at large.

Whatever the end results these experiments reveal for these scientists, it remains an undisputed fact that this world of ours is facing a type of global cataclysmic event buried in our common geological past, and maybe, as some social scientists report, in our common ancestral memory also.

#### UNKNOWN ENERGY SURGES CONTINUE TO HIT PLANET CAUSING MASSIVE EARTHQUAKES IN SOUTHERN HEMISPHERIC REGIONS

By Sorcha Faal, 12/26/04

As reported to the Russian Academy of Sciences

As the world's most powerful earthquake in 40 years rocked northern Indonesia on Sunday with a magnitude 8.9 trembler, and with tidal waves hitting villages all across Asia, one has to wonder if there is a correlation between this event and the continuing energy surges hitting the planet at the Southern Hemisphere.

In my December 22<sup>nd</sup> report to you, Unknown Energy Surges Continue to Hit Planet, Global Weather Systems in Chaos, I explored the relationship between these unprecedented series of 'blasts', energy surges, and the massive low pressure systems that have descended upon the Northern Hemisphere causing massive global weather chaos.

These continued 'blasts' are now coinciding with an increasing amount of earthquake activity in the Southern Hemisphere to include: India, Indonesia and the ocean areas around the continent of Antarctica. Two of these earthquake events have been recorded at over 8.0 magnitudes.

A correlation has been made between these events by Yu, Z. D. with the Hubei Research Inst. of Environmental Protection, Wuhan, China, and as detailed in his report, Strong earthquakes, novae and cosmic ray environment. *"A great many earthquakes of magnitude 7.0 and over occurred in the 13<sup>th</sup> month after two of the largest ground level solar cosmic ray events"*, Dr. Yu states, and though his time scale does not match these present circumstances, neither do these continuing mysteries 'blasts'.

It has further been shown by Drs. L. Kh. Shatashvili, D. I. Sikharulidze, and N. G. Khazaradze, all associated with Geophysical Institute, Tbilisi, Georgia, and as detailed in their report titled, Dynamics of changes in the IMF sector structure in the vicinity of the Earth and the problem of earthquakes, that:

*"It is shown that, of all cosmophysical phenomena which are directly or indirectly associated with large destructive earthquakes, the most powerful stimulating factor is crossing of the neutral current sheet of the interplanetary magnetic field by the Earth. This hypothesis is supported by the results obtained by analyzing a large number of histograms—the distributions of crossings of the IMF neutral sheet by the Earth with respect to large destructive earthquakes with a magnitude 6.0 for the period 1958-1988."*

Many questions relating to these immediate and unfolding events in our Southern Hemisphere remain unanswered by the world's scientists, and maybe due to their not knowing the answers, such as the region of space these 'blasts' are coming from and if many more are expected.

As I had previously reported too, Dr. Eun-Suk Seo from the United States University of Maryland and her international team, working under the direction of NASA have launched a stratospheric balloon (December 20<sup>th</sup>) from Antarctica's McMurdo base in a frantic attempt to find answers, but as of now no findings have been publicly released.

I can think of no other words than ones I have previously used, to end this report:

Whatever the end results these experiments reveal for these scientists, it remains an undisputed fact that this world of ours is facing a type of global cataclysmic event buried in our common geological past, and maybe, as some social scientists report, in our common ancestral memory also.

*[END QUOTING]*

*From time to time there are open indications of scalar-energy manipulation as revealed by T.E. Bearden in our currently running series. This is an appropriate point to integrate a news article from last month which we did not run at that time due to lack of space.*

*[QUOTING:]*

#### NOON TURNS TO NIGHT AS CLOUD BLACKS OUT SUN *China Daily, 11/12/04*

Day turned to night across Shenyang when a freak cloud formation 8,000 metres deep blanketed the northeastern city.

For over half-an-hour noon was as black as midnight. Cars, buses and lorries went someway to breaking up the darkness.

Tremendous lightning flashes accompanied the phenomena, reports the website <www.sina.com.cn>.

Convergence of two cloud fronts formed the 8,000-metre-thick connective cloud cluster.

With sky and sun effectively blocked out, visibility was reduced to near zero, according to an expert from the provincial capital's meteorological bureau.

The marvellous spectacle was also reported in many other areas of Liaoning Province and lasted for half an hour in some places, he said....

*[END QUOTING]*

*Whether current events are the direct result of scalar electromagnetic interferometers or the imminent arrival of "Planet X"—or a combination—remains to be seen. But BIG things are happening as we prepare to enter 2005 and move further along in Year 18 of the transition into God's New Millenium.*

# Electromagnetic Weapons & Asymmetrical Warfare

By T.E. Bearden (Part Five)

As we move along with the presentation of Tom Bearden's "Electromagnetic Weapons" (again with full credit and appreciation to both Mr. Bearden and <www.cheniere.org>, where readers can avail themselves of the copious footnote references accompanying this piece), we encounter yet another powerful death-dealing capability: scalar-energy induction of diseases. "If you're not scared, you don't know what's going on." As Mr. Bearden shows, the next pandemic, if assisted by this technology, could result in the deaths of up to two billion people.

## 25. A FORCE AMPLIFIER NOT CONSIDERED BY WESTERN ANALYSTS

By use of scalar interferometry (which the Yakuza already has and uses) or quantum potential weapons (which the Yakuza does not have, but the KGB/FSB does), it is possible to trick the immune system of each person in the targeted populace area so that his or her immune system erroneously "detects" invasion by, say, two dozen different pathogens at once. This is done by simply placing the EM "shadow disease engines" or "precursor engines" for those specific pathogenic conditions into the bodies in the area.

Given this deliberate stimulation and the resulting alarming detection, the deceived immune system desperately spreads its finite assets across those "detected" two dozen invading pathogens. The immune system reacts to what it detects, not necessarily to what is actually occurring. And it detects the interaction of faint precursor engines for the specific two dozen diseases, deliberately radiated into the body and thus interacting with its cellular mass. Such a "spread" immune system is then just about totally vulnerable to any real attack by any normal opportunistic real pathogen in the area, because it can marshal few if any additional resources. In a bizarre way, this is a new form of asymmetric biological warfare, designed to disable the immune systems of the targeted populace, dramatically increasing the effectiveness of the real BW pathogen being introduced.

In the absence of deliberate BW pathogen attack, the result of spreading the immune systems in a targeted area is an extraordinarily heightened vulnerability of a very weakly radiated populace to ordinary opportunistic infectious pathogens in the populace's environment, to which the humans in that populace are physically exposed.

There are always such opportunistic pathogens

in one's environment, but usually the immune system can handle most of them with a shrug. But the deceived living body with a spread immune system will be quickly and easily attacked by multiple environmental pathogens, unable to effectively exist, and without the organism's usual immune system's protective resistance. That living body with its spread immune system will shortly develop a whole "cocktail" mix of opportunistic diseases. If the immune spreading intensity is lowered a bit, then only a percentage of the persons with the effect will develop the "cocktail mix of diseases" syndrome. If the immune spreading is lowered even further, then only those persons already having additional "immune system lowering" will be affected.

This "spreading of the immune system" is what was deliberately done to generate the "Gulf War Disease" in some of our soldiers in the first Gulf War. The immune systems of our soldiers in certain areas—already weakened a bit by multiple vaccinations—were spread by hostile forces, as a test to see if our scientists and analysts recognized what was being done. The immune spreading signals were deliberately lowered to the point that none of the French troops—who had refused to take the mix of vaccinations we administered our own forces, and which do reduce the ability of the immune system for some weeks—developed the "cocktail mix" diseases and syndrome, while some of the U.S., Canadian, and British forces who did have lowered immune systems as a result of their vaccinations did develop the "cocktail mix of diseases" called the Gulf War Syndrome. The natives in the area had not had their immune systems lowered by vaccinations, and so no change occurred in that populace.

Our scientists did not understand it at all. They did not understand it then, they do not understand it to this day, and they will not understand it tomorrow unless forcibly ordered to meticulously consider and experimentally investigate what happens when immune systems are indeed spread in the fashion being advanced, and when specific tailoring to select the targeted populace subset is also used.

Our scientists still have not comprehended the higher group symmetry electromagnetic mechanisms by which health and disease changes in personnel in the U.S. Embassy in Moscow were induced during several decades of microwave radiation by the Soviet Union. They do not intend to further try to understand it, and they have simply buried it. It does not matter that three U.S. Ambassadors eventually died as a result, or that hundreds of

persons were made sick or developed real diseases. Also, our scientists do not know how to properly investigate and explain the directly related Kaznacheyev experiments, nor do they intend to do so.

## 26. EM BW: TERRORISM FORCE AMPLIFIER NOT CONSIDERED BY ANALYSTS

Not comprehending "immune system spreading" or how it is induced, our medical scientists certainly have no knowledge of the electromagnetic use of specific precursor engines for a specific disease—such as anthrax—to directly induce the disease in targeted bodies in an entire great area. Instead of the passive measure of immune system spreading, the same EM weapons can directly transport and induce the precursor engines for developing the anthrax conditions in the bodies in a large targeted populace—such as the greater Washington D.C. metropolitan area, which was the area considered in the referenced Government study involving a spray anthrax attack.

For example, the exact structural pattern of the necessary disease induction engines for anthrax can be directly "gathered" or "recorded" from the EM emissions of sickened human cells or humans with anthrax. Such ordinary EM carrier emissions do contain those specific anthrax EM disease engines as infolded Whittaker patterns—particularly in the IR and UV range, and particularly when both the IR and UV ranges are considered simultaneously (i.e., when a full harmonic interval of radiation is considered, and especially when that harmonic brackets the visible spectrum and the targeted organism is in the dark so that the "visible light spectrum" interference is removed). Our scientific leaders have little or no understanding of the Kaznacheyev experiments, and most simply are not interested in understanding them since it would require thinking in terms of a higher group symmetry electrodynamics, not the common old electrical engineering.

Hence they do not even conceive of the result of "electromagnetic enhancement" of a strike by a BW agent such as anthrax, or of EM BW, where the disease itself is induced in the body by the exact disease engine that pathogens carry, but mostly without the intervening physical carrier. This "direct induction of the specific disease condition" via tailored induction of the appropriate specific EM disease engines in the bodies of the targeted populace, is another gigantic force amplifier that can be either used alone or in conjunction with the previous force amplifier of spread immune systems. The U.S. has no defense against it, nor do our medical science leaders and establishments intend to develop such defenses.

As a force amplifier, the combination of immune spreading and EM BW induction of a single disease can increase the overall casualties from an anthrax attack by from 5 to 10 times what would be obtained by the basic anthrax spray attack of physical anthrax spores alone.

Further, our own physics of the vacuum already prescribes the basis for precursor engines and their

use, including their use in induction or augmentation of disease, or in elimination of disease. Quoting Aitchison:

*“Vacuum polarization, in general, alters the effective force law. Forces, in quantum field theory, are understood as being due to the exchange of virtual quanta... In the case of QCD and QFD ... a crucial new feature is that the force-field quanta themselves carry the ‘charge’ of the force-field, i.e. it is as if the photon of electromagnetism carried electromagnetic charge.”*

The upper limit of the force amplification (more simply, the *gain*) is of course the limit entailed by the size of the targeted population. The combination of the two force amplifiers, coupled with the actual spray attack, can effectively infect and sicken almost the entire exposed population, with nearly the entire population becoming casualties and dying.

In a mass casualty situation, the presence of these force amplifiers will also move the vast percentage of the stricken casualties to the “Black” triage category Four. They will thus receive no treatment, but will just be allowed to die. The use of the force amplifiers means that a much greater percentage will be Black and allowed to die under normal triage rules.

But our own National Institutes of Health (NIH) and medical science community—and our own intelligence community in that area—are simply not interested. Nor have they apparently done even elementary homework in the area of higher group symmetry electrodynamics. Most do not even recognize the term! Nor have they funded any specific higher group symmetry electrodynamics research in the area, outside the terribly crippled electromagnetics and electrical engineering, *even though these disease force amplifier capabilities of higher group symmetry electrodynamics have already been repeatedly demonstrated, first by the KGB against the U.S. Embassy in Moscow in the former Soviet Union and then by the KGB/FSB in Russia today.*

Sadly, most of our present scientific medical research is almost a “vast wasteland” as far as any study of scalar interferometry use in disease induction or force amplification, the mechanism used in the decades long EM induction of health changes and diseases (resulting in the deaths of three U.S. Ambassadors) in the former U.S. Embassy in Moscow, during the long so-called “microwave radiation” of the Embassy, the spreading of immune systems of a targeted population, and electromagnetic induction of specific disease in a targeted populace via the induction of the specific precursor engine for that specific disease. Further, our medical scientists’ knowledge of higher group symmetry electrodynamics appears to be nil. Worse, the medical science community appears to have no concern at all over its own total lack of knowledge in such higher forms of electrodynamics. Possibly, a part of this nonchalance is due to the important financial exchanges between some NIH scientists and outside industry.

But as a step in the right direction, NIH is now imposing stricter rules on its scientists with respect to their consulting to, or employment by, outside

drug companies which in turn are receiving payments from NIH funding. The agency has even proposed banning all its scientists from doing any consulting work with drug companies for a year, while the agency’s investigations continue. Let us fervently hope that this cleanup continues, so that NIH really does again function as an independent government agency dedicated to the benefit of the American public, not the big drug companies. *At this point, every little bit helps!*

#### 27. EXAMPLE: RELEASE IN THE POPULACE OF U.S-MADE BW MYCOPLASMA

Sometimes, there also appears to have been collusion between the NIH and rather illegal (and unethical) testing on human citizens without their consent. As an example, our NIH leaders are still doing absolutely nothing at all about the modified mycoplasma BW agent that our own BW researchers developed in the 1950s to burrow inside red cells, feed off their hemoglobin shells, and dramatically decrease the oxygen transport capability of the red cells in the blood. This modified BW mycoplasma agent was developed, then it was thinned by about 2,000 times and sprayed into the populace and the environment by combined U.S./Canadian teams in the 1950s in Canada. It was also sprayed by U.S. agencies in Florida. These sprayings resulted in passing the deliberately manufactured serious BW agent into the mosquito population and thence into the human population of North America. Indeed, in the cooperative joint U.S./Canada program, the modified mycoplasma agent was deliberately implanted in mosquitoes by the government researchers, and those mosquitoes were then released to ascertain the “spread effectiveness” of the mosquitoes as disease vectors. That’s rather like firing some machinegun bursts at random into a very large crowd, to determine the average pattern of “hits” and “kills”.

As a result, in Canada the present author personally contracted that specific biological warfare disease—courtesy of our own BW scientists and the inane directing officials who thought that diluting the BW mycoplasma agent spray rendered the mess safe!—while in the U.S. Army, living in Quebec, and stationed at the Canadian Armament Research & Development Establishment (CARDE) in 1966-68. I survived only by the Herculean efforts of the French doctors in Quebec, who opened both the chest cavity and the abdominal cavity and moved the internal organs around for about 3 hours, aerating the tissues thoroughly and unknowingly killing the exposed surface mycoplasma. After that oxygenation of the tissues, the mycoplasma already burrowed inside the red blood cells survived and then went dormant, slowly increasing over the next three decades.

Left with slowly increasing chronic fatigue syndrome over the next 33-year period, I even served a tour in Vietnam and still no one knew what was wrong. No medical tests or examinations showed what it was. Then in Spring 2001, resurgence of the mycoplasma generated runaway heart fibrillation and a heart attack. When the

terrorist attack of 9/11 struck a stunned America, I was struggling to stay alive from the heart attack, runaway heart fibrillation and significant hypoxia from my own prior encounter with a “terrorist BW attack”.

A colleague who checks on me about once a year then called; he has been in many “deep black” programs, most of which did not officially exist. He also has the equivalent of a Ph.D. in biochemistry. He knew of the mycoplasma BW agent development program and the mycoplasma spraying in Florida and Canada. He immediately recognized that my strange Canadian malady contracted in 1968 was actually that BW mycoplasma.

He also told me where to get definitive information on the web and from Senate hearings, and *voila!* The puzzle was solved. Finally a specific test confirmed the chronic BW mycoplasma infection in Dec. 2001—after my 33 years of puzzlement, doubt, and slowly increasing physical debilitation. The treatment was a year (2002) on antibiotics, which did annihilate the mycoplasma that were hiding in the red blood cells. But it did not and cannot undo the damage already done throughout my body during those 33 years.

In such case, one has permanent chronic fatigue, cannot walk very far or stand very long, and one takes blood thinner for the rest of one’s life to try to prevent strokes and blood clots. One also takes medication to try to control the heart fibrillation and stay alive, in addition to thinning the blood to hopefully prevent clotting. The eventual expectation is to go on a pacemaker, then eventually have another heart attack or stroke, finishing the process.

The problem is that if one *takes* the medication necessary to control the heart fibrillation, it also reduces the volume of blood pumping, which places one back in hypoxia, leading to strokes and/or heart attacks. If one *does not* take the fibrillation control medication, one reverts back into hypoxia from the fibrillation, which leads to strokes and/or heart attacks. *With the usual treatment by well-meaning heart doctors, one is damned if one does and damned if one doesn’t.* They do not and will not prescribe remedial oxygen, since they do not consider mycoplasma to even be involved in heart problems and attacks.

The only way out of the dilemma is to take the medicine to defeat the fibrillation, and also take oxygen to prevent the resulting hypoxia. So I take remedial oxygen and pay for it on my own volition, since the heart doctors know nothing of the modified BW mycoplasma and they do not wish to hear of it. Nor does one’s insurance company, Medicare, the Veteran’s Administration, etc. By taking one’s own remedial oxygen, one remains just barely above the hypoxia zone, at least until something else unexpected occurs to make things worse. That way one remains alive a while longer, perhaps even for a few more years. Even so, one has acquired a delayed death sentence just waiting to happen at any moment. And one remains with severe chronic fatigue.

Perhaps then it is understandable that the present author has a very personal interest in that particular BW mycoplasma disease and that set of

incidents, and in the continuing gross failure of the NIH to acquaint heart doctors in the U.S. of that nefarious program and what happened. Today there is a direct involvement of this BW-modified mycoplasma in a significant fraction of heart-disease patients, chronic-fatigue syndrome patients, etc. Most of the citizens of the U.S. and Canada already have that BW organism infecting their bodies, like a ticking time bomb waiting to erupt perhaps many years later. To this day, very few hospitals and medical clinics have the very specific type of mycoplasma test required to test for the modified BW version.

Apparently the NIH considers any contact on this problem—or a similar BW problem—a “hot potato” to be handled by their “policy” section (i.e., spin control section). Bluntly put, the attitude often seems more concerned with political control than with saving the lives of countless American citizens who unknowingly continue to be afflicted with that BW-modified mycoplasma, continue to die of its complications, or are disabled and their lives shortened because of it. NIH political orientation seems to be one of the major shortcomings of the U.S. in its required defenses against the biological warfare aspects of asymmetric warfare. It also appears that the NIH directly participated and cooperated with the U.S. BW organizations that developed and unleashed the BW mycoplasma in the first place. If so, the misdirected attention of the NIH to cover up will probably continue, and that will help guarantee much of the success and increased mass casualties resulting from professional terrorist BW strikes against the U.S. populace in the near future.

Ironically, that nefarious modified mycoplasma is a strange kind of BW “force amplifier” that the Soviet BW weapons labs initially developed to “soften us up”. Eerily, they themselves did not have to introduce it into the North American populace. Instead, we ourselves developed it and—in what has to be some of the most stupid BW actions of all time—we deliberately unleashed it into our own environment and against our own North American populace. In comic relief, one is tempted to remark that “With friends like that, who needs enemies!”

#### 28. EFFECTIVE, QUICK MASS-CASUALTY TREATMENTS WILL NOT BE DEVELOPED BY THE U.S. MEDICAL RESEARCH AGENCIES

Sadly, in this present asymmetric warfare problem, we are forced to conclude that the NIH and the CDC will not be doing the research necessary to develop adequate response therapies and means for quick, effective treatment of mass BW warfare casualties. None of the associated agencies appears likely to develop anything innovative in this area, particularly they are not going to quickly develop a portable higher group symmetry electromagnetic treatment unit that could effectively treat and cure most of those millions of casualties that will result in our cities in the future.

As we mentioned, there is a precursor EM engine for every disease and every debilitated condition of the living body. That means there is

also a precursor EM anti-engine that can be formed, amplified, and introduced into the diseased patient—and that will reverse the disease condition in situ and cure the disease. Because the anti-engine is electromagnetic and can therefore be amplified, the treatment period can be reduced to as low as five minutes of non-ionizing radiation containing the amplified specific disease engines. The body’s potentials and fields thus have the anti-engines kindled inside them, and after the treatment is removed, the body’s own “activated” fields and potentials—at every level—now continue diminishing and destroying the disease anti-engine, and reversing the patient’s condition back to normal.

Further, anti-engine patterns for a variety of expected and known BW agents can be developed and incorporated into such treatment machines and the machine can then just be “switched” to the appropriate anti-engine required to treat the patient’s BW condition (destroy the patient’s specific disease anti-engine and reverse the patient’s condition back to normal).

As a further example of U.S. medical orientation, in 1998 a close colleague and the present author tried very hard to get the NIH (and other federal agencies) to develop a portable unit for such EM mass-casualty treatment in a crash U.S. government program, to save millions of lives in the coming asymmetric warfare debacle. The mechanism to be used was an EM mechanism for generating an amplified anti-engine for a specific BW-induced disease. By radiating the body with the amplified anti-engine, it overrides the actual disease engine, eroding away the disease engine and the disease along with it, and reversing the physical condition back to normal. Once developed, this would be a therapy far superior to anything presently developed or proposed officially and it could result in saving millions of American lives.

The NIH, DoD, USAF, CDC, and other federal agencies had not the slightest notion of what we were talking about and we never got out of the “policy” section at NIH, even with the assistance of Congressman Bud Cramer. Not a single scientist in any of those government agencies even called to discuss the proposal and its novel physical mechanism, and apparently none checked the hard references we cited from the French medical science literature where the basic mechanism had been proven.

None of those agencies had the foggiest notion that the decades-long microwave radiation of the U.S. Embassy in Moscow already demonstrated the use of higher group symmetry electrodynamic “disease engine” signals to directly generate health changes and diseases at will. They had no concept of the use of appropriate amplified “antisignals” to reverse and cure illnesses, or that an extended EM can be developed to either induce or cure specific diseases to order as one desires.

They certainly do not comprehend the higher group symmetry operation of the human cellular regenerative system—which is responsible for the body’s healing—and have not gone much further than Becker’s brilliant seminal studies of that system. Unfortunately, Becker’s work was limited by his use only of U(1) electrodynamics. Even so, he almost deciphered the control operation of the

cellular regenerative system. Otherwise, Becker would have had the “anti-engine” EM healing process then and there. His EM healing method for otherwise intractable bone fractures survived and is still utilized in some hospitals from time to time.

To show what simple potential (voltage) across an otherwise intractable fracture can do, it affects the red cells that arrive, reconverting those red cells to a suitable “precursor” cell (more primitive, earlier cell). The cell shucks its hemoglobin and grows a nucleus—this is dedifferentiation, and it is generated by the apposite longitudinal Whittaker waves—that constitute the voltage—acting as “pump waves” in the nonlinear optical sense. The pumped bone fracture site has thus become a pumped phase conjugate mirror site, with the input or “signal wave” being the specific physical disorder’s “engine”.

In accord with nonlinear optical pumping theory, the energy of the pumping waves then establishes an amplified “anti-engine” or “phase conjugate replica” signal. This amplified signal (anti-engine) will then quickly reverse the entire physical red blood cell back along its past travel through time in its past short life (red cells only live about three months). Hence the red cell dedifferentiates back to an earlier stage. The “delta” condition in the fracture site involves bone cells. So the red cell is redifferentiated by the pumping to move forward to the type of cell that makes cartilage. Then it further redifferentiates yet again to the type of cell that makes bone, and that cellular material is deposited in the fracture site, healing it.

In simple language, that is precisely how Becker’s bone-healing EM treatment works. The point is, that process and its proven success already proves the entire capability to treat and reverse diseases and physical injury conditions by a peculiar variation of nonlinear optical pumping, using the “disease or disorder engine” as the input signal, producing an amplified “anti-engine”, and this anti-engine forcibly interacting upon any and all aspects of the cells and the physical body to reverse the situation and restore the body to health.

But the NIH was not interested, even though the elements of this process had also been resoundingly proven by the Prioré group in France, in rigorous work funded by the French government.

Eventually the NIH just shipped the entire package over to the DoD (to whom we had already sent the package anyway) because the package mentioned the Gulf War Syndrome and “that was the purview of the DoD”. In short, the NIH wasn’t interested in what Gulf War Syndrome really was, or in curing it either. So unless it involves drugs or some form of ionizing radiation treatment or some such, our own NIH was not and is not interested in a proven, demonstrated cure for cancer and other dread diseases, accomplished in France in the 1960s and early 70s, and already rigorously reported in the French medical science literature but resoundingly suppressed today.

For that matter, one can check the same U.S. agencies for their understanding—or lack of it—of the mechanism that induced the “Gulf War Disease”, and one will find their understanding is still almost zero. One can check their knowledge of what induced the diseases and health changes

at the U.S. Embassy in Moscow over so many years, and one will find it is still zero.

The entire U.S. medical science community is still using an archaic old seriously flawed classical electromagnetics of the material luminiferous ether, rather than the more modern higher group symmetry electromagnetics of mass-free spacetime. Consequently it is far more concerned with the immune system's responses which "physically kill the bad guys", or harsh drugs which "chemically kill the bad guys", rather than the cellular control system responses which actually accomplish all healing within the body after the "bad guys" are already dead.

*The immune system and the drugs do not actually "heal" anything—not even the immune system's own damaged cells.* The fundamental orientation of American medicine is on physically attacking and killing the pathogens which transport the disease engines, rather than on how the damaged body regenerates its own cells and reverses its own disease engine via use of higher group symmetry electrodynamics. This strongly prejudices and canalizes our own medical science development. It also makes us extraordinarily vulnerable to the coming mass casualty attacks in our cities and population centers.

Indeed, the entire U.S. electrical engineering community itself does not realize that it doesn't even know or apply what electrodynamics in massfree space *is*. There is not a single electrical engineering professor or text that calculates an actual **E**-field in space, although all purport to do so. Instead, rigorously they calculate the indicated point intensity of the *ongoing effect* of interaction of the force-free **E**-field in space with charged *static* matter. This ongoing interaction generates the "force-field **E**" in that charged matter *while that interaction is ongoing*. Their own CEM/EE model never gets out of the assumed charged matter and its force fields (those ongoing interactions that are occurring) and the model never expresses the force-free **E**-field in mass-free space at all. In the face of such appalling scientific ignorance for more than a century, it is little wonder that our nation is so terribly behind in understanding what can be done—and is being done—by the terrorists with the primary (precursor) electrodynamics in free space, before its interaction with matter. In short, our analysts have not comprehended Soviet energetics for a half century and they have no intention of comprehending it now, even though it is being used against us.

So we really do not have mass casualty treatment capabilities that will be effective and that could be developed. Our national agencies adamantly are not going to develop the proven Prioré-type EM treatment or really get to the bottom of Becker's anomalous EM bone fracture healing because such would not be common old electrical engineering. Our scientific leaders are not going to demand the correction of that terribly flawed electrical engineering model, which is our single greatest national vulnerability and the one that is being capitalized upon by coordinated terrorism and asymmetric warfare to destroy us in within the next three years. We are going to unnecessarily lose millions of American lives, of many of our citizens who become casualties. Now most of them will just get triage "Black" category 4 treatment—which is no treatment at all. Those future wounded Americans would not have to die if such EM countermeasures were intensely developed in portable treatment machines and massively deployed. We are describing a vast force amplifier for the defending nation that has been targeted and very

seriously struck. But it is a force amplifier that our own government community and scientific community do not wish to even hear about.

Never mind the actual experimental proof of the type methodology proposed, already in the hard French medical literature, accomplished by the Prioré group in the 1960s and early 1970s. The understanding of the Prioré *mechanism* does not exist in NIH or in our entire medical community, which—as far as medical EM is concerned—has not yet gotten out of the terribly flawed century-old electrical engineering with its serious foundations errors.

#### 29. IMPACT OF IMMUNE-SYSTEM SPREADING

If immune-system spreading is also simultaneously applied by scalar interferometry to the targeted populace receiving the BW strikes, then one must multiply the expected casualty results from a spray anthrax attack by a factor of three. This means that, in the referenced U.S. Government study, instead of *one to three million* casualties, one would have from *three to nine million* casualties. That's in one city area, from one professional attack by a small 2-place aircraft, with one person flying and one person spraying, using a common little agricultural sprayer and spraying out 100 kilograms of anthrax spores distributed over the area.

Almost all of those three to nine million persons contracting the disease and becoming casualties would die. They have little chance even if treated, and their automatic Black triage category 4 status will see to it.

In other words, with the possession of augmenting weapons such as scalar interferometers in the hands of the Yakuza, the terrorists have achieved a terrible *force amplifier* capability that parallels the destruction capabilities of a modern state's ICBMs, strategic bombers, nuclear subs, aircraft carriers, etc. All without a single ICBM, strategic bomber, nuclear sub or aircraft carrier.

So now one considers—say—three large U.S. city areas hit just about simultaneously by effective anthrax spray attacks, and one sees the grim picture very probably in store for us. To be conservative, we assume 1 million casualties in each city as the "baseline" achieved by the spray attack pathogen itself. Thus a total of 3 million casualties are obtained in the three strikes. However, if immune system spreading were also incorporated simultaneously, the casualties in each city will reach, say, 3 million, almost all of whom will die. That is a total of 9 million American casualties in the three cities—and almost all of those wounded will die. If, in addition to the immune system spreading, some supporting scalar interferometers are also inducing the same anthrax disease pattern via EM BW, that's perhaps 5 million casualties in each city, for a total of 15 million American casualties, almost all of whom will die. If the intensity of the scalar interferometry disease induction is further increased, that's perhaps 18 million or so total American casualties in those three city areas—almost all of whom will die.

Here one directly sees the transition from the kind of estimates our own analysts usually make for BW agent attacks, to estimates that show the more maximum risk of massive strategic destruction and even knockout by the same "front line terrorist troops", due to the advent of the supporting scalar interferometers, immune spreading, and EM BW.

All that would be caused by 6 men, three light 2-place Cessna-type aircraft, 3 little agricultural sprayers which can be purchased at any Home Depot or similar store, and 300 kilograms of anthrax spores from Voz

Island—and, in the 9, 15, and 18 million casualty cases—some force amplification support from three or more scalar interferometers.

In addition, the contamination of those large built-up population areas will force additional harsh spraying of decontamination agents, killing many thousands more of our own populace. Note also that the effectiveness of the decontamination sprays [is] also seriously hampered if the scalar interferometers continue their EM BW anthrax induction. None of these kinds of "force amplifier" effects are presently known or taken into account by our analysts and our intelligence agencies.

The real "action fact" that should be concentrated upon by our medical science agencies is that most of those casualties are going to wind up as triage Black category 4 patients. Most are not even going to be treated and so almost all of them will die.

Also, we point out the "amplified disease anti-engine" treatment approach is capable of rapidly causing the reversal of the disease, even in those who presently will sadly be assigned to triage Black category 4. Now most of those will fall within triage Red category 1. There is simply nothing else out there that will produce such a dramatic savings of human lives and perhaps the saving of our nation itself.

#### 30. IMPACT OF SMALLPOX RELEASE

It is almost inevitable that the terrorists also obtained smallpox BW agents—so could anyone who wanted it, who had guts and money. Reliable information already confirms that the terrorists obtained many BW agents, including smallpox. One just went into the collapsed Soviet territories, to the actual BW labs, and bought it at the time. Or one got it from North Korea. Or one just hired very desperate Russian smallpox BW scientists who urgently needed to support their families. Or one got it from Voz Island.

The collapsing Soviet state was unable to pay salaries etc. to scientists and generals and soldiers for protracted periods. In desperation to get money to survive, extreme measures were taken by those scientists and generals and soldiers. Anything there that one wished to buy could be bought, including even a nuclear submarine—see Lunev's book for that incident. Among other things, these "items that were available" included supplies of smallpox agent, and the Soviet BW smallpox specialists themselves.

Once smallpox is unleashed in any major city on the planet, it will eventually kill almost one-third the present human population. Quoting Garrett:

*"If the smallpox virus were released today, the majority of the world's population would be defenseless, and given the virus' 30 percent kill rate, nearly two billion people would die."*

Smallpox is almost certainly going to be released against the U.S. populace. The Yakuza and other terrorist organizations will see to it, with smallpox toxin supplies almost certainly already inserted in the U.S. and waiting.

As an intellectual exercise, we leave it to the reader to ponder the impact of a few limited smallpox releases in our cities combined with simultaneous wide usage of the force amplifiers (immune system spreading and EM BW smallpox induction) previously discussed. The impact is not pleasant.

[End Part Five]

# ‘Final Poll Verdict’: FPJ Mourned By *Masa*

12/13/04—#1 (18-119)

MON., Dec. 13, 2004 8:45 A.M. YR 18, DAY 119

Manila, Philippines

RE: JUST WHEN YOU THINK THINGS WILL  
“WORK OUT” FINE LIFE TOSSES ANOTHER  
BOMB OR TWO—OR THREE OR CLUSTERS  
OR EVEN NAPALM—DJE/D

## RECOGNITION OF CONNIE HOLLOWAY

Just when you think you can handle whatever the world hands you it appears you have to better handle whatever “life” offers on your plateful of “handle this”.

I am not handling Connie’s death nearly as well as it is assumed by almost everyone near and far. She served to the very best of her ability, got some very nasty hits and frankly I am a failure as I ponder “plans” while other things happened. I truly thought we would be able to help her through her physical problems but even the products for which she took calls and kept the orders as they came—were lost to us and that through no doing of her own. We live with it! And, moreover, we keep right on moving forward and postpone a few days the confronting of the new problems of shifting, holding or losing that which she had stored in her house. She and Gene had two wonderful boys so we do not have to worry so much about that.

She was expecting her departure and went peacefully into the morning and we can rejoice that pain was not her final test of endurance at the departure gate.

Anyway, Connie, be at peace for you fulfilled your purpose and we know not what is another’s “contract”. We’ll all be running into you probably sooner than later.

CLOSER TO MANILA!  
FERNANDO POE

May we just get the worse news out of the way and, again, take a deep breath or two, gulp and turn the brains on after the 10-sec wait for the power to come back on.

Fernando Poe is a name we asked you to remember way up at the top of the list of important players. Please do now recall. Poe (better known as FPJ) was the opposition candidate (who actually won the Presidential election here—but was thwarted by GMA). He is a motion-picture star and the closest friend to Erap Estrada, deposed and incarcerated on truly NOW PROVEN false charges.

Well, undercurrents of “doing something” have been swirling around like high tide currents in a flooded river (or here, the flooded streets filled with mud and debris). Yesterday Poe “had a stroke”! Is this real or precipitated? Well now, we just can’t know that one, can we? Only speculation can now enter the game. He was in a critical coma and frankly I have

not had heart enough to yet check status this morning. [FPJ passed away December 12, 2004. His death was mourned by the entire nation. Please see the article by Alejandro Lichauco appended to the end of this update (“The Final Poll Verdict; What Happens Now?”) for the impact of FPJ’s passing on the nation.]

In the midst of the worst crises this nation has confronted both in corruption, graft, perjury and outright plunder, the leaders begin to be deaded. Mostly they are just “shot” before they can further testify. Are solutions to the massive problems closer or more distant? It is really hard to see because there just doesn’t seem to be any “further down” to sink.

I’ll say this much, however, if Poe had been given his rightful seat his Vice President would have been Lauren Legarda. Lauren would be President (acting) TODAY. Interesting? Indeed! Legarda has done more for this nation in forest preservation and replanting than ANY ONE OTHER PERSON AROUND. She not only is KNOWN and RECOGNIZED for that interest and actual hands-on “doing” but with the current loss of over 1,800 people and thousands of acres (hectares) of land to mudslides, it is interesting to contemplate what would happen here if justice and “right” had evolved.

The mountain sides are actually so damaged as to be seen from satellites. Just as a side-observation the rains and mud/debris ruined the tunnel that carries water to Metro Manila from the reservoirs feeding same. Water is expected to be dried up to this 13-14-million person city by summer if they can’t get repairs in time for more rain. Can it happen? Oh my goodness yes. It is already short in supply and the infrastructure is so bad as to have cut-offs constantly and that doesn’t even mention the bad water that smells so bad it is difficult to just drink it. We boil, filter and silver all of ours while soaking clothes in oxiclean to treat the laundry because we only have use of cold water which keeps the microbes and parasites in comfort other than in distress.

I long for that luxurious life-style proposed by several who comment on our position and existence; most especially VK Durham.

Diseases are raging out of control and this very day I intend to go to the pharmacy and get a couple of “transfusion” sets to have on hand. Each impact of respiratory hit is worse than the last and we are old now and quite vulnerable to overwhelm. I feel I must keep the ticker working long enough to keep the fingers moving a while longer. This is while EJ must be able to interchange with these people constantly.

SPEAKING OF THINGS “HERE”:  
FDN AND OTHER BITS AND PIECES

Hey, the team is working on a full intervention into the court mess of two or three hits on “da Prince”. Wow and oh my goodness—“intervention”. This will do it, friends, is the assumption. The FDN is in excellent standing and

“should” simply legally, by court order, replace the “administrator”.

The Board Meeting of Saturday had to be postponed to Wed. morning this week so we should be able to begin cleaning our own house a bit as we hope to expect a quorum. We will take better control after the first of the year after our Filipino counterparts do their job (we hope and pray). At any rate we have the steering wheel pretty much in our control and we are also waiting for feedback regarding “GAIA”. We know that it will work out perfectly in proper sequence so no long faces on that account.

Not only did GMA hire an absurd Peruvian economist but is smiling about whatever she found out about “us”, and now it seems our friend Eric San Juan ALSO WENT TO PERU. He has not checked in as to exactly “why” he made the “side-trip” from Chile where he attended APEC and on to “check on” things in Peru. We do not dig because ignorance in some areas of ongoing events is better for everyone involved and most especially us.

OTHER INTERESTING PARTIES—  
CATCHING UP QUICKLY

We have long been acquainted here with a couple of interesting men who are our age and like us, are trying to get “something” done here while family waits impatiently back home. They claim that their families simply think them “crazy” and act accordingly. One is the ship CAPTAIN from Norway, we call him BJ. The other is Kurt, a white businessman from South Africa.

They are coming up to speed as to knowledge and are planning to go, as guests of the new president there, to Indonesia right away soon. They will take the GAIA program and are fully expecting to accomplish something as to recognition, personally. There is simply no way to insure any third parties will perform. These men will also be good backup, along with Tom Taylor of Philtec, for membership and maintaining our persons on the Board of Trustees when we need to make those changes. We do not plan on being disadvantaged by these end-runs by grabbers, again.

Keep up with the Public Notices because in this world of fraud and fabrication we will publish the good documents we find in the courts at every opportunity. All the training we got with VK and all that BS she shipped around has only given us full experience in just about everything we encounter of that nature here. It has also made us very wary of everywhere else that touches us or any assaults on any of our other connections. Experience truly IS the best teacher as to cementing things into the mind for use over and over again along this journey.

The International Community has now rated the Philippines as having THE WORST corrupt Police of anywhere. It goes downhill from there with the Justice Department and whole judicial system, and even the legislature.

What can we expect in court? We don’t really know but we have the “goods” and it probably won’t be to any advantage to play too much longer with this FDN. After 30 years of “contempt” and now hiding gold holdings in the Central Bank, we feel we just may somehow get through those doors.

I am here to KNOW that God is certainly stronger than His adversary. Therefore, I hang tightly onto those “robe-tails”.

GOOD NEIGHBORS!

Just when you need another avenue of getting “inside” the network of possible helpers we observe another possibility for potential “good things”.

As you know we have lived here a long time now and are pretty much a known pair around this building. One of the most important persons in Asia owns the condo next door to us and we had rather hoped, since he might want to lease it sometime (been empty for several years) to be in a better position and could acquire it to free up space for offices, etc. Well, it didn't happen—with ability or circumstances—BUT...

A construction crew started some months ago tearing up and rebuilding that condo and we survived the dust and racket and now it is pretty much finished. I MEAN BEAUTIFUL! Yesterday we ran right into the “sister” of the tenant who has had all the work done FOR HER BROTHER. He (Charlie) is one of the children of Danding Cojuangco who is Head of San Miguel brewery, has the largest [brewery, presumably] and is one of the most important persons in this whole area and now branching off with successful mergers all around Southeast Asia. He was going to run for President but decided against it and was very wise to do so. He will be ever so much more valuable “on our side”. The new tenants, who have been living in the U.S., are to move in tomorrow.

The “sister” said, if I got it right, that his wife had died and they wanted to help him have a place to come home to here. They supposedly have children and we know nothing more while only occasionally running into the contractors in the hallway, elevators, etc. This one, however, I know is destined to play a far bigger role in our lives and what a loving family. They already have Christmas stuff around with about a 10-foot wreath on the wall facing the entry. All of everything in the place is NEW—even every last piece of wonderful furniture. A dream come true for most “movers” who are especially having to face some bad hurts in addition.

In the same family there is another brother to Danding, called Peping, and sister, former President Cory Aquino. They OWN (well, not really “own”) a place I mentioned last week called Hacienda Luisita, which has just had a recent DISASTER to end them all before the floods came. Farmers were abused and they “struck” while military was called in and lots of people got dead and the place is still in total lock-down. It is a major sugar producing place and this is devastation doubled.

Danding and San Miguel had planned to help dig out the “troubles” of the place in exchange for sugarcane for the brewery and, of course, a production place for ethanol to help run the petrol supply a bit longer. It is all lumped in with agrarian reform badly handled from start to finish. With the uprising, however, Danding was smart enough to dump the plan, withdraw the proposals and it all sits in total limbo with the workers now starving and people involved still getting assassinated to shut them UP. Let's see now, where are those “robe-tails”? Ah yes indeed, dullness is not among our daily routines.

Certainly we will see how things evolve but I told “sister” that we had wanted to contact Danding for a long while and we visited about it a bit and agreed to just wait and see how it all unfolds. She was stunned that we knew about everything and my own heart says that this just may yet give “Charlie” and even “sister” some place to play in this recovery potential for this place. They are totally nationalistic and Filipino oriented.

I don't expect a thing before the holidays are over and we can “evolve” a bit if it is appropriate so don't expect anything “tomorrow”, friends. I can't take “tomorrow” in this world of Filipino (well, World in general) time delays to get ANYTHING done on a timely basis.

I would believe though, for you who have helped constantly and regularly, that I would like to offer a bit of assurance regarding our potential position as to our “project”, etc. I had just concerned into gut-strings on the “what ifs” should we just not be able to make it function soon enough to outlive the “father time” routine. Then it comes forth that we are far enough along that should, for instance, EJ run and hide on the “other” side, I probably could not go on because I should be running ahead of him in that race.

However, we are certainly far enough along now that as to “payback” potential I could, for instance, certainly “sell-off” a bit of the program for enough to even the books and debts. It allows for a lot better sleeping and perhaps helps you to sleep as well. As an example, at some point along here we would be able to sell our interests or a part thereof of just the holdings in this FDN. I don't want to further discuss this here but know that I find it comforting to realize we have come quite a long way down this road. We have to have responsibility enough to meet the commitments we feel are ours. We know we have the RIGHT PROGRAM and all we need to back that recognition is to observe the world, the dollar and that old commodity, gold. The games are just about out of [their] control.

As other things along the way which seem a bit scattered and difficult to wrap into tight bundles happen, we find that each solution, even to moving personnel and offices, etc., we have better positions and clearly better security.

We keep everything as private and tight as is possible and continually enhance our security in holdings. Make that “holdings” into “responsibilities” as it fits far better. Circumstances seem to fall in such a way as to cause us to be most careful and attentive to what we do and how we proceed. We are constantly reminded to be grateful, ESPECIALLY for those “interesting” lessons as we find better and better security and solutions from every encounter. God always delivers the next person we need to know, every time and never inappropriately out of its proper time. We have learned to patiently accept that as confirmation and it allows patience to be a bit more easily accepted as well. We are not dealing with pie in the sky or flapping windchimes, the facts are real. Therefore, we WILL handle life as our plans are shifted and sometimes bombed a bit. Certainly we didn't expect Satan to hand over his kingdom easily. What could we otherwise expect? This is NOT the so-called “kingdom of God”—this IS the human, physically manifest “kingdom of illusion and games”. God provides the solutions, the way—not the “doing”.

No, we can't comprehend everyone's position or task for we can't actually “comprehend in full” OUR OWN. It is just so wonderful when the pieces fit the puzzle and lock into place for one more inch forward.

I look out over this view of a tiny portion of this place and realize the myriad UNIQUE circumstances, people, birds, LIFE itself. I realize that ours are UNIQUE and probably more unique than many others around us. To each it is that their personal perception and perspective is outside ours and therefore limited in both consciousness and reality.

We choose every breath and I am reminded that Connie, too, chose her last and not to take it.

Sometimes those particular choices seem missing by ongoing events—but it causes us to take stock in the very act of making those choices and our services rendered by our own relative to those of another. We choose our service and our journey and that which we do with either seems to be the bottom line for I am continually reminded by Little Crow that this trail is leading us all to the same place:

*“You are of God and God is of you. The existence of God is only possible by your existence. The maximum power of God at any one time is in direct ratio to the number who have accepted the responsibility of living within this concept. There was no beginning and there is no end. We (God) have always been and will be forever.”*

We are but souls having a human experience and our experience will be however we choose to perceive it to be. I, for one, intend to march right through until we provide “the way” a bit more clearly defined and available. It seems the only worthy alternative.

I will write again before Christmas, I'm sure, but please know that we are with you in spirit along with homesick and lonesome for all those things that come and most especially this time of the cycle of year. We simply need to “make it so”.

LIFE IS GOOD; GOD IS JUST; AND WE HAVE CHOICES SO LET US CHOOSE WELL THAT OUR DAYS MAY BE WORTHY AND WE CAN HAVE LEFT SOMETHING BETTER FOR HAVING WALKED THIS WAY.

DJE

---

*We now turn to an article by Alejandro Lichauco (thanks to The Daily Tribune), for some perspective on the impact of FPJ's passing.*  
[QUOTING:]

THE FINAL POLL VERDICT:  
WHAT HAPPENS NOW?

*The Daily Tribune, 12/23/04*  
By Alejandro Lichauco

If there's any doubt as to who won the elections, the funeral procession of FPJ settled that question resoundingly, and the nation's polling organizations which were unanimous in their surveys that GMA would win by a close margin, will have a hard time explaining how their “scientific methodology” could have possibly been so wide off the mark and so out of touch with the realities.

It will probably take an entire generation for this nation to see a repeat of the political phenomenon that arose from FPJ's passing, the mammoth outpouring of grief which gave final proof he won the presidency beyond a hint of a doubt—and that the incumbent sits there illegally.

Which of course, takes us to the question: What happens now?

This will depend on what happens to the mind and will of GMA and to the collective mind and will of the nation's Armed Forces. For if GMA and the Armed Forces fail to grasp the message of FPJ's death, as this piece sees it, and react accordingly, then they risk bringing disaster to the nation as well as to themselves.

That massive outpouring of grief will eventually convert itself into a massive outpouring of frustration and rage that can only turn toward the direction of Malacañang and its defenders, meaning, the AFP. The overwhelming number of those who attended the wake and made up the mammoth procession represents the nation's deprived and hungry who feel that their last opportunity for a life freed from the squalor, the

# *The Sacred Hill Within:*

## Chapter 3: Spirit/Soul

12/20/04—#1 (18-126)

MON., Dec. 20, 2004 9:01 A.M. YR 18, DAY 126  
Manila, Philippines

RE: THE SACRED HILL WITHIN, CHAP. 3—  
SPIRIT/SOUL—GCH/D

“IT’S THAT WONDERFUL TIME OF THE YEAR”

Every “time” of the year is wonderful, depending on your attitude and perspective/perception. It is a time when “some” stop and ponder Spirit/Soul to some extent between parties, shopping, starving, dying and some even while “living”. You are NOT, however, actually celebrating a “Jesus” birthday so quit lying to yourselves.

It CANNOT be “Christ’s” birthday because the concept of CHRIST has been present since the very manifestation of the HEAVENS, not to even mention the Planet you like to call Earth and which, by the way, is incorrect for “earth” is simply indicative of “*terra firma*” or “ground” as in earth.

Just about every “channel” has a different name for Earth and of course it is recognized in the “heavens” by number and we often refer to it as Shan.

Aboriginal tribes often refer to it as basically “the illusion” or “place of experience”. We of the heavens “not” manifest but tripping around in your space are most often called something referring to Birds of the Cosmos or Thunderbirds, Phoenix Birds, Eagles or whatever is the going definition of UNIDENTIFIED FLYING OBJECTS of the moment in space and time presentation.

“We” have no delineation of “worlds” for life itself is but a sequence of events, which change constantly, and incidents only MARK THE WAY. Thousands-billions make passage every year, every day, to continue a journey of which a short portion is experienced in “segments” of expression in every unique being of some physical container. You arrive in your particular “space suit” and redo it continually until you finally set it aside for another container of some kind to house YOU. YOU are nothing other than a spirit in a space suit having a human experience. When you can remember that perhaps you will both respect and attend your “suit” a bit better. Dharma, for instance, could use a lot of repair on her oxygen conversion-ventilation system. No big deal!

You all take special attention to where you are going, who will find a place where and what will that place be like? My goodness, the Priests of the Churches and cults give you all sorts of BS (Boulder-squash) about what is out there somewhere. It is all right there WITH YOU—no “out there” somewhere to consider.

Do I remain popular? No, not very! I have a

tendency to come along, tell the truth and ruin the adversary’s game almost every time. It is fine with me for each has a choice in freedom of consideration. After all, friends, you ARE that which you think! And like it or not—all are going to the same place! You have, in fact, BEEN THERE and will return there. BUT, IT IS MANDATORY THAT YOU GET SOME LESSONS ON THIS WHEEL OF CLASSROOM PLAYS—MOSTLY OFF BROADWAY.

Our love and relationship are as far apart or as close as YOU choose as you form your own conclusions about time, space and BEING.

All people travel about experiencing many things as uniquely personal as the unique one-of-a-kind space suit you wear. However, the FACTS remain the same:

As we go along our way(s), sometimes separately in our perception, we give constant wonder to the questions regarding that which we know but have long forgotten. You are ever so much the more vulnerable in your negative ignorance for that is the state of manifestation in human form and through which God’s ADVERSARY can always best manipulate you to gain your soul-spirit as long as you REMAIN IN HUMAN FORMAT. The game changes when the “suit” is changed but few realize it as an improvement if you have learned little during your opportunity aboard this good ship “life”. So be it.

***“We come from the same place and to that place we will return, but only after we have met our commitments and responsibilities and not before. We started together and together we will end. No one will finish before the other, so let’s get off our dead asses and get to work.”—LITTLE CROW***

We will continue now with Chapter 3 of *The Sacred Hill Within* for you are in a time of necessary attention to these many fragmented thoughts and feelings that sometimes overwhelm in the “pile-on”.

[QUOTING:]

### CHAPTER 3: THE SACRED HILL WITHIN

Our soul, our spirit, is connected to each and everything that exists. It is us and we are it. Since everything is the same, only in a different form, there is no way to separate ourselves from anything. We cannot separate ourselves from the trees, the rocks, the mountains, the grains of sand, the mist of the ocean or the droppings of the birds and animals. There is no way to separate ourselves from the seeds, the plants, roots, stems, leaves, or the fruit. We cannot separate ourselves from the garbage, the paper, the plastic, the metal, the radiation. We are not separate from those things which are disruptive or that kill us silently as we breathe the air. We say “kill”, yet there is no death. We are infinite. There is no beginning and no end, we

privation and despair into which they were born, had been stolen from them by those either born to privilege or who came to that privilege by plundering the nation’s treasury.

There are, it seems to me, two main routes which the rage could take.

One is the route that would reinstall Erap in the presidency from which he was forcibly removed by a conspiracy of the elite. That point was discussed in the piece last week. With the passing of FPJ, who but his bosom friend who had launched his presidential candidacy could possibly substitute for him and continue the fight he had waged? Both, furthermore, have a grievance in common. From both was stolen the presidency which they had earned.

Expect then a movement for the reinstallation of Erap to emerge out of the grief, and if that movement should be endorsed by FPJ’s widow whose popularity and stature have been pushed into a quantum leap by the dignity and firmness which she had displayed in her bereavement, then GMA should know she is in a far deeper trouble than Marcos was following Ninoy’s assassination, and in far deeper trouble too than Erap was when the call for resignation first emerged.

Should even a fraction of the mass that made up the funeral procession does a display of people power and attempt a storm at Malacañang, it’s difficult to imagine the AFP sticking it out with GMA.

Not after witnessing the political phenomenon that passed for a nation’s final goodbye to FPJ.

The other route which events could take is a straight military takeover of Malacañang—a takeover which would in effect preempt a people power for Erap’s reinstallation.

What, for instance, could psychologically and politically stand in the way of a military takeover this weekend or inhibit a dominant faction in the AFP from doing a Park Chung-hee or a Nasser, both of whom staged a coup without being egged on to it by people power.

All that matters now is that events have shown, in a way far more effective and visual than poll surveys can possibly convey that the incumbent in Malacañang has lost all basis for remaining there and that if a straight military takeover were to be mounted, any protest—even in the name of democracy—would amount to nothing louder than a reluctant whimper.

In brief, FPJ’s passing has opened the avenue for a race to Malacañang between, on one hand, forces who would want to see Erap reinstalled and, on the other hand, forces who would want the entire political system overhauled, which of course could come about only through a revolutionary military movement of the type installed by South Korea’s Park Chung-hee or by that team of generals in Burma.

Whatever it is, one can’t help but sense a higher and invisible intelligence working out its inscrutable purpose, and for all we know none of the scenario sketched by this piece would have any bearing on that purpose.

No one, after all, expected FPJ passing away at this time—much less experiencing a transforming phenomenon that we haven’t experienced before nor likely to experience again.

A lot of people in this country wouldn’t be the same after FPJ’s passing, and perhaps that’s all that matters to the Hand that summoned Da King, at this particular moment of our history, and of our people’s dark despair.

[END QUOTING]

*So, what happens now? The purification continues as the Phoenix is birthed. Stay tuned.*

simply have always been and will always be. The soul and the spirit lives on. It goes out, moves along the spirit road and comes back again at the time and place of its choosing. It selects its parent or parents and the time and circumstances in which it comes back again at the time and place of its choosing. It selects its parent or parents and the time and circumstances in which it comes back, timing it in conjunction with the constellations, choosing when it gives life to the fetus carried within the female form, the vehicle by which things arrive here on this earth. Our soul simply rejuvenates to return again so it can continue to meet its responsibility and accountability—that obligation which allows us to do the things we need to do for those generations that follow.

The next generation is made up of the children of today's young women who are growing up under the influence of drugs and alcohol with the idea that they must be beautiful and find some role to fulfill in the life of another, often going into a life of servitude. That is not the lesson they need to learn. Instead, we need to share with them that all things are sacred, as their spirit, their soul is sacred and that they are the living representation of the sacred energy which created all things. Everything is of the Creator. We come from the same place and everything is one. In the multiplicity of spirits who are reading this book, there is only one spirit. That is Tunkashila, Wakan Tanka, God, Allah, Buddha, whatever you wish to call it or have it be and it is only one. It is that way above and it is that way below. There is no other way, for that is how it has been told and shown to us.

This time of year, the autumn, was when the buffalo moved southward and we followed. The buffalo here on earth is manifested as the power of the sun and that manifestation is also in the constellations. In the truths that were given to us, we were told that if we were to honor the Creator we would follow those things which were shown to us in the stars. These lessons that we were given then are the same lessons that sustain us today. As the buffalo moves south, the sun moves south and we follow the sun. We follow the power of God on earth in our ceremonies and in our minds, as we have for centuries. It is our soul, our spirit, it is God itself that is working through us, for we represent that energy.

In a later chapter we will talk about the red and blue days. The blue represents the sky and the red is the earth. Our souls are embodied in the blue and red. We are encircled by and combined with the sky and the earth and we are one. What more could we want? What more can anyone promise us? Some abstract redemption that releases us of accountability and responsibility? If that is what we want, it is easily acquired. All we need to do is turn from the face of the Creator. All we need to do is turn our back on the lessons and instructions which we were given at the beginning time and we can easily acquire those things which are upon the black road.

The red road was laid out for us in the heavens. We were placed here as a people by the Creator and we have lived here ever since, watching the sky. As the heavens move, we move, thus our movements are designed by the movement of the universe itself. Our ceremonies are directly connected and related to the universe, as it is directly connected and related to

specific places on the earth. Those ceremonies were given to us in the sky by the Creator with instructions which, to this day, are followed and done in the proper place and the proper time by the proper people. In our ceremonies and rituals in the idea of our infinity and our oneness with the Creator, we recognize and honor these things and carry them on. Our Sacred Pipe is a celestial Pipe that was shown to us in the sky and at this time of year we move toward the Pipe Ceremony in the constellations. We have been given that Pipe to pray with as we watch the sky and we are obligated to pray for all people and all things to which we are connected. The Pipe is sacred and we are part of that sacredness. The earth is red, the Pipe is red, the people are red. It is a oneness. All things that grow upon the earth are represented by the wood. All things that fly and walk, the winged and four legged, are represented. All things to which we are connected and of which we are a part are represented by us, the two legged. We honor and respect that Pipe. It is not to be bought or sold and there is no need or cause for anyone else to duplicate or replicate those ceremonies or to use those objects in any way.

We remember the spirit and soul, as it has come back many times and will return many times from this point on. We remember for those who have gone on, for those who we keep in our hearts, and for those ideas which we hold dear. Having faith in our spirit and soul alleviates the concern as to when or how we will leave this earth. Rather, the issue is how much can we do for all of our relations in the time that is remaining to us. How much can we do for the children who will come after us. How much can we do for the sick, the ill, the dying and the infirm, for the elders who are shut away, for those who are not physically whole, for those who are repugnant, for those we shun and push away, and for those who have lost sight of their spirituality. As human beings, we spend our lives reacting to other people when what we need to do is remember who and what we are. We are infinite, we are spiritual, we are connected, we are related, we are accountable, and we are the same. We need to remember the spirit and the soul, to reflect upon when our lives began and take accountability for that. We were the ones who made the choice to return in this physical form, selecting a parent or parents, and the time and circumstances by which we would reenter.

We are all the same thing, only in a different form. Humanity and creation are one and the same. Animate, inanimate, still, frozen, hard, soft, liquid—all the same. Good, bad, evil, dirt, trash, hawk, dove, eagle, cow—all the same. You, like me, are one. You are one as you sit, whoever you are. If you never went to a church, if you never heard a sacred word, you would still be holy and sacred, just as God is holy and sacred. You are encouraged to remember that God touches you every time you breathe. Every time you breathe, God fills your body and flows through you. What greater blessings, what greater sacredness is there? Why spend time on the petty little things that concern us about our lives? They mean nothing more than that we are human beings with little faith.

The spirit, the soul, is as powerful as whatever we perceive God to be. All we need to do is act in a way that demonstrates our faith. To act is a decision

which requires our responsibility. How we act isn't the result of the time or circumstance. It isn't because of a place or person. It is our responsibility. We are accountable whether we believe in the higher power or not. Even if we all believed that God dwells within, we would still act differently than the person next to us because we are an individual representation of God, as complex and diverse as the pebbles that fall from the mountain top and lay at its base or as the grains of sand that are washed upon the beach in a far-off land.

As I write this, we are moving toward that time of the year when the sun, which is the coal, the fire, moves toward the Pipe to ignite the tobacco in the sky. We were given that way to follow. We were shown that constellation and that star map and our holy men and women interpret it as soul. We represent the one. We are connected to what is above and what is above is connected to what is below. It isn't folklore, it isn't a folk tale, it is a fact. Evidence exists that it is so. We follow the instruction of God, Tunkashila, Wakan Tanka, the good holy energy we have followed all of our days. We continue to look at the sky with reverence and marvel at it as it moves. In it we see our reflection and like a mirror, it is a constant reminder of the duality of all things. What is above is below and what is below is above. We move past the Bear Lodge in the sky and the sun moves down the stem towards the bowl of the Pipe to light it at the time of the dry willow which is our tobacco. It is there on the other side of Pleiades and it waits for the sun. We, as children of creation following our instructions, will also carry that out before the first Thunder Beings speak to us in the spring. We have done so for thousands of years as Dakota/Lakota people and we will continue to do so.

**Your soul, your spirit, is all that you desire. It is all that you search for. It is the God within. The next time you shoot up, hit someone, take a drink, or think or say unkind words, remember that you are representing the Creator, whatever you believe it to be. Denying it will not change it. Believing that God is outside of you in some far-off place will not change it. Nothing can change the responsibility and accountability of your soul and spirit.**

We are all the same, only in a different form. We are all one and in that oneness, we need to recognize that each and everything we do is never for ourselves but always for all our relations.

[END QUOTING]

\* \* \*

As we cycle through another "year" and begin to re-count as in some meaningless series of months it might serve you well to recognize the moment called NOW for it is ALL THAT YOU ACTUALLY HAVE IN WHICH TO EXPERIENCE. Even as the moments tick away all becomes either a memory or anticipation for the only EXPERIENCE there is can only be held as in its passing. Do you treasure this moment or do you simply pass on through it as if it were a commodity forever at your chosen disposal? No, it isn't, for it changes with the passing into memory. Anticipation is only a hoped for "future" experience. You must LEARN from the past in order to have full appreciation for that which hopefully

# The Mystery Of Satan & The Devil (Part Three)

comes after this moment of manifestation. Can you handle it? All of you CAN “handle it” but most WON’T.

You will struggle through the “holidays” in whatever mood or notion strikes at any moment along the passage. Moreover, I have full advice for you who think to be forgotten or brought the wrong thing from some Santa supposed to care for YOUR needs—STOP IT.

If you want something and you can get it—GO GET IT! Bless yourself, love yourself and stop dumping your load onto another. That “other” is struggling just as are you. Things are but that which you could get for self—LOVE is something that cannot be purchased or snatched—only GIVEN AND RECEIVED.

Deck your halls with holly if you wish—but it certainly looks as silly as spraying paint on trees to look like snow in a place where holly doesn’t grow and pretend games reflect another that has gained in the “show off” game.

If you have cut a tree to decorate with gaudy baubles, so be it—ENJOY IT. The least you can do is honor the very tree you slew. And no, the food you eat on your table will NOT feed the starving in Africa or outback Australia. Stop the nonsense and experience the JOY of TRUTH in REALITY.

And always keep uppermost in mind that the lies people tell about you are none of your business. Rebut them and MOVE ON. But yes indeed, do REBUT them for you do not know how much your TRUTH reflects upon another or when TRUTH actually turns the tide of oncoming devastation. Telling truth in the face of the lie is taking a stand against evil and it is your responsibility (and OUR commitment) to always confront the lies and prove up on the TRUTH as each step presents itself. Life in a human expression must be confronted and experienced in a human form. GOD WILL SHOW YOU THE WAY—it is up to YOU to experience it. Meanwhile, grow and “get a life”, for this is how IT IS, traveler. We can move along together and even carry a bit of the load greater than your own—but ultimately your journey is YOURS ALONE!

Either way, we are but ONE and in that realization of “mind” in “being” we can do whatever it is that makes a better way and allows each of us to leave a legacy of goodness along that path we tread. And yes, actually, the lead dog has the most dreadful responsibility but he also is the one who doesn’t have another’s rear end to contemplate.

Life is a wondrous experience so why must you make it Hell? Hell can find its own pathetic broken dreams and visions. Why give yours away to such dismay and misery?

Christ is born or slain every moment of any day. How did YOU handle Christ today?

God wraps you in HIS feathered cloak and gives you those wings with which to soar and if you use your MIND you don’t even have to do much flapping.

In leaving, I remind you to give each one you meet along your way a smile and I promise you that you will get one back, even in the midst of hardship or misery. It is the most expensive gift you can give—and it costs you NOTHING.

GCH  
dharma

*In the prior installment in this series we read how “Akki” is “what Christians know as Lucifer, Satan or the Devil”. Unmentioned was “Anu”, who was the leader of the Nefilim and thus you might guess who or what are the Anunnaki. And you might put this information together with this issue’s cover story and have a better handle on immediate developments in the world.*

*This week’s installment has been abbreviated to allow additional space for the cover story. Again we disclaim the blanket use of the term “Jew” in this presentation because broadly applied this label does not describe the alien race holding lordship over the planet at this time. It is those who are without conscience that hold the purse-strings and direct world affairs to the detriment of mankind and the planet. The purpose of this piece is to provide clues to the real identity of these antichrist agents. We continue:*

## “SELLING OUT OUR HARD-WON FREEDOMS”

“The *Constitution* certainly never contemplated that any of its terms should authorize the selling out of our hard-won freedoms to a one-world aggregation, which is even now 51-percent Communist by population, and which is aiming to completely supplant our sovereign system of constitutional republican government, under which we have lived and prospered for the past 164 years.

“This one-world government already partially set up within the United Nations, is even now exercising the following powers granted to the Federal Government alone by the *Constitution*.

“The sole right of Congress to declare war, and prosecute it to a speedy, and successful conclusion.

“The sole right of Congress to establish post offices. The United Nations now has its own post office, free from the supervision of the Federal Government.

“The sole right of Congress to levy taxes upon all American citizens. All employees of the United Nations are free from Federal taxation.

“The sole right of Congress to coin money and regulate the value thereof. This right was abrogated to the Chief Executive in 1933 by Congress who apparently never knew they were granting to him that which had been delegated to them alone, as a sacred trust, by the American people. It was nullified a second time by the Bretton Woods monetary agreement, without which the conception of the United Nations could never have been brought to birth.

“The sole right of Congress to supervise immigration. The United Nations may now admit, and is admitting whomsoever it pleases, and there is nothing we can do about it.

“The right of Congress to levy duty on imports. All goods and material imported by the U.N. or its employees come in duty-free.

“The right of the Chief Executive with his Cabinet, by and with the consent of Congress, to direct and regulate foreign affairs. This right has been more or

less completely usurped by the State Department, which now acts conjointly with the United Nations, of which it has become an integral part, in the determination and direction of our foreign policies.

“The right of our soldiers to serve in wars solely declared by the Congress, and only under our banner, the Stars and Stripes, to be buried beneath its sacred folds, and to be under the command of none but American officers.

“The sole right of Congress to levy taxes upon the American people. The United Nations levied a tax of \$19,000,000,000 annually upon the people of Canada, the United States, Australia, New Zealand and the nations of Western Europe this year (1951), our share of which was the \$8,000,000,000 appropriated by Congress in October of this year.

“The right of the United States to remain master of its own house. The Defense Production Administration is given the first allotment of our products, which is as it should be. Foreign allocations of these goods receive the second preference, and these are determined by our State Department, again acting conjointly with the United Nations. Our national economy receives the third share of it, if any. This is the real cause of our tremendous shortages of steel, copper, tin, zinc, rubber and other such materials, while at the same time Belgium is shipping into this country an abundance of steel from the Ruhr valley in Germany, and selling it at twice the domestic price, while she is receiving her steel from us as a gratuity ...

## “U.N. PEACE MEANS CHAINS AND SLAVERY”

“They long for peace—with chains, and a security nowhere possible except within the squalid confines of a slave barricade or the grim, guarded walls of a penitentiary. The closing words of Patrick Henry’s immortal speech are much more sorely needed at this fateful time than when they were uttered: ‘Is life so dear, or peace so sweet as to be purchased at the price of chains and slavery?’

“The time is indeed short to reverse our present Roosevelt-Truman-Acheson brand of politics, and get back as quickly and as thoroughly as we can to sound constitutional government.”

Thus, and as the Devil, Artabanus II, was offering Jesus Christ the very things He had in His hands, so is Jewry’s current god Abdul Baraba Baha, offering Israel the very things we have in our hands—Christian American Republican Constitutional Government in which we are free to worship God in spirit and in truth in accordance with the blueprint drawn by Yahweh Himself, Yahshua the Messiah. Yet, if traitorous Members of Congress were to sell this Nation into Jewry’s trap for “peace”, Jewry’s protocol No. 11 says: “... in no case shall we take any account of them ... Then in fear and trembling they will close their eyes to everything, and be content to wait the end of it all.” In protocol No. 23 they continue: “Then will it be possible for us to say to the people of the world: ‘Give thanks to God (Prince Abdul Baraba Baha) and

bow the knee before him who bears on his front the seal of the predestination of man.’

Further proof that the Devil is tangible is given by the Assyriologist, Prof. A. H. Sayce, in his book *Babylonian and Egyptian Life*, in which he says: “[T]he claimant of the sovereignty took the hand of Bel, and then became the adopted son of the god. Until this ceremony, however much he might be king *de facto* he was not so *de jure* ... The legal title could be given by Bel and by Bel only.”

Bel’s title was Marduk as a descendant of Cain and Ishtar’s son Enoch whose Akkad name was Marduk, and Cyrus, King of Persia, says in his personal record now in the British Museum, Marduk rode by the side of Cyrus when he entered Babylon, and the people kissed the feet of Marduk to show their respect to the “god”, who was just an ordinary looking “Jew” with all his usual distinct appearance and demeanor, supreme grand master of black magic.

*II Esdras* 4:36, 37 of the *Apocrypha* shows the reason why the *Bible* does not directly name the current Devils. Esdras says: “For He (God) hath weighed the world in the balance, by measure hath He measured the times, and by number hath numbered the times; and He doth not move nor stir them, until the said measures be fulfilled.”

Then Yahshua the Messiah assures us that is correct, and when those measures are full Yahshua says in *Matt.* 10:26: “Fear them (the Cainite Jews) not therefore: for there is nothing covered, that shall not be revealed; and hid, that shall not be known.”

Consequently, the sacred and secular records do not directly name Bel, or the Devil, yet they do show his title was Marduk and others, and the names of the reigning kings of the Serpent race were his adopted sons, because it was the law handed down from Cain when he shook hands with the Devil, Azazel, the Serpent in *Gen.* 3, after entering a partnership with him to rule the world as his adopted son and to rule enslaved man as a “god” who married the Devil’s daughter Ishtar, and became the father of another “god”, Marduk, to carry on the Royal line of the Devil in which the life force in the bone marrow had been rejuvenated by that of Cain.

In *Jude* 9, the Greek for the word “devil” is *diabolos*. It holds for *Matt.* 4:1, 5, 8, 11; *Luke* 4:2, 3, 5, 6 and *John* 6:70. The latter Devil was Judas Iscariot [refer to Journal #2, *And They Called His Name Immanuel: I Am Sanada*, for the real relationship between Immanuel and Judas Iscariot], which graphically shows the Devil in the other passages were tangible beings we know as Jews. Jude says the Devil was attempting to get possession of the dead body of Moses. According to the personal genealogical record of Prince Abdul Baraha Baha, the Devil in *Jude* 9 was the Cainite-Akkad-Amalek-Idumean mongrel, Prince Butur. If he had been merely an intangible Satan, then what use could he have made with the dead body of Moses? None whatever! Yet, because he was tangible, he could use his black magic and give animation to the body for his own advantage, the same as Prince Abdul Baraha Baha is capable of doing. His power has been observed by Mr. James C. Hollenbeck, who says in his book, *The Super Deceiver on the World Horizon*:

“In the case of the experience with the Prince, the man in question had been dead for four days. He had been declared dead by medical doctors. Like Lazarus, decomposition had already set in. I saw the man myself and his body was turning black, or the color of death. Not only that, but the odor was enough to convince anyone that he was surely dead. The Prince,

carrying out the same principles as Jesus did, stood beside the corpse and said: ‘Musa, come forth.’ To my utter amazement, the man did so ... The man immediately showed signs of life. Within a minute or two, he was standing on his feet. The color of death had left the body and the man seemed normal in every way. But here is a singular thing. As soon as the man was restored to life, he gave every evidence of confusion. He wept and implored in his own words to be permitted to remain on the Earth again. His face began to show signs of mental anguish, and he kept repeating: ‘I DON’T WANT TO GO BACK, OH DON’T SEND ME BACK TO THAT PLACE AGAIN.’”

Now wait a minute! You people of Israel, don’t get excited! Jesus Christ Himself in *Matt.* 24:24 and *Mark* 13:22 says the Devil would even attempt to seduce the very elect of Israel by performing feats of black magic. Therefore, observe: God (Yahweh), alone is capable of resurrecting the dead, because Life is one of His Seven Spirits. The Devil is in no way shape or form a part of God. Jesus Christ raised the dead to vigorous life by making use of His complete working knowledge of Mind over matter, and His cognizance of the knowledge quality in atoms which has its source in the Mind of God of whom Jesus Christ was the manifestation on Earth.

Since time immemorial, Jewry’s Supreme Grand Orient Freemasonic Lodge of B’nai B’rith was located in Lhasa, Tibet in which is Lucifer’s library containing text books giving instructions on incomplete knowledge of God’s Cosmic Powers handed down from Lucifer in the Garden of Eden before he committed suicide by violating Divine Law. The working knowledge of that limited Power is kept active by the Supreme Grand Master of B’nai B’rith in Lhasa, and they demonstrated their power during the rituals. **[REAL power is in creation, however, not mere manipulation of what is.]** Black magic is also used in the ritual in B’nai B’rith in Christendom in order for brilliant Jews to master that occult science and possibly become a member of the Devil’s Cabinet when death makes a vacancy. From the beginning, the Devil has been an ordinary Jew supreme grand master of black magic. The only difference between THE DEVIL and a Jew junk dealer is, THE DEVIL has succeeded in breaking the seal on black magic in the first magnitude then murdered any other Jew in cognizance of the power in order to be “god”.

The ability of Prince Abdul Baraha Baha to apparently give life to the dead is his knowledge of Mind over matter in which he can concentrate his thought patterns in order to generate an electro-cosmic field of oscillatory disequilibrium of sufficient strength and wave length which reacts on the de-arranged atoms of the dead body and temporarily adjusts them in the manner they were in life, and the body takes on the appearance of actual life. It is not alive, however. It is only a vampire controlled by the Devil’s black magic, and the body will collapse immediately after being removed beyond the radius of the field generated by the diabolical mind of Prince Abdul Baraha Baha, or he terminates the field himself by concentrating his mind on something else. Mr. Hollenbeck alludes to the face that he did not believe the man was actually alive.

Correct use of God’s Cosmic Forces is known as white magic. Erroneous use of it is black magic. **[There is no such thing as “magic”, there is only mystery (that which is not yet known).]** The former was used in turn by Adam, Jacob, Moses, Elijah, Christ and His apostles. Erroneous use of it is what *Gen.* 3:22 refers to. In that verse God is talking

to our Mother-spirit, Adam’s “wife”. That fact will be demonstrated later on in this study, because it is a subject in itself. In *Gen.* 3:22 God says to our Mother-spirit: “Behold, the Adam (the man, as the physical racial body of people) is become as one of us, to know good and evil: and now, lest he put forth his hand, and take also of the tree of life, and eat and live forever.”

Those emphasized words and their meaning are: Put is *shalach*, cast. Forth, is *me-al*, off. Hand, is *yad*, ministry. Take, is *leqach*, learning. Also, is *aph*, even. Of, is *el*, concerning. Tree, is *ets*, Staff. Eat, is *akal*, indeed.

That “tree” is the *ankh* as the sceptre of the high priest of the Order of Melchizedek given by Yahweh to the leader of the Adamic race in *Gen.* 3:21 when He ordained him for that position. The coats of skin in that verse were white lamb-skin tunics extending from the shoulders to the feet in order to symbolize the former brilliant spiritual illumination of the race as the visible spirit of the race, the “woman” and the “Image of God”. The word “clothed” in that verse is *labash*, in Hebraic, and it is synonymous with *peribollio* (clothed) in *Rev.* 10:1 and 12:1, meaning, arrayed in. In the latter Yahshua and the same “woman”, as our Mother-spirit, are arrayed in the atomical construction of the microcosmical order of the material body of our race.

Then, originally, *Gen.* 3:22 says after God arrayed the Adam in white lamb-skin tunics and instructed them concerning His plan to send the Christ-Son of Righteousness into his House to make a new covenant through which our race would be restored to the former tangible spiritual condition we were before the Serpent spiritually-sabotaged us in the Garden of Eden, He told our Mother-spirit: “Behold, the Adam has become as one of us, to know good and evil (knowing Divine Law and how to use it erroneously): and now, lest he cast off his ministry, and learning even concerning the *ankh* (staff) of life, and indeed live forever.”

Yahweh then isolated our Adamic progenitors out in the Tarim Basin in Eastern Turkistan in order to get out of the Garden (the four colored races), because if Adam had let go of the Doctrine of Melchizedek concerning the Messiah then became ambitious to impersonate himself as the Messiah in order for enslaved man to worship him, he could have used the power of the *ankh* and indeed became immortal in a body displaced 286.1022156 spiritual degrees from God (Yahweh). We would have been a race of immortal Devils, not the sons of God destined to be immortal tangible spirit in direct communication with God and spiritually and mentally-synchronized with Him after the Kingdom is consummated in accordance with *I Cor.* 15:51-56; *Rev.* 21.

[End Part Three]

*Zechariah Sitchin’s new book, The Lost Book of Enki, also makes for interesting and revealing reading for those interested in advancing their studies. Readers can obtain a copy of this book through the resource listed below:*

# U.S. Corporate Organizational Chart

Anyone involved in management of an organization knows the benefit of a clear organizational chart, which shows the "lines of power" and makes it clear as to who reports to whom. Any guesses as to who reports and is accountable to the Money Masters?

In this big bowl of alphabet soup, the two men who really run this country are the President and the Homeland Security Secretary. Congress is set off to the side with no connection to anybody and the NSC seems to go around in circles. How appropriate!

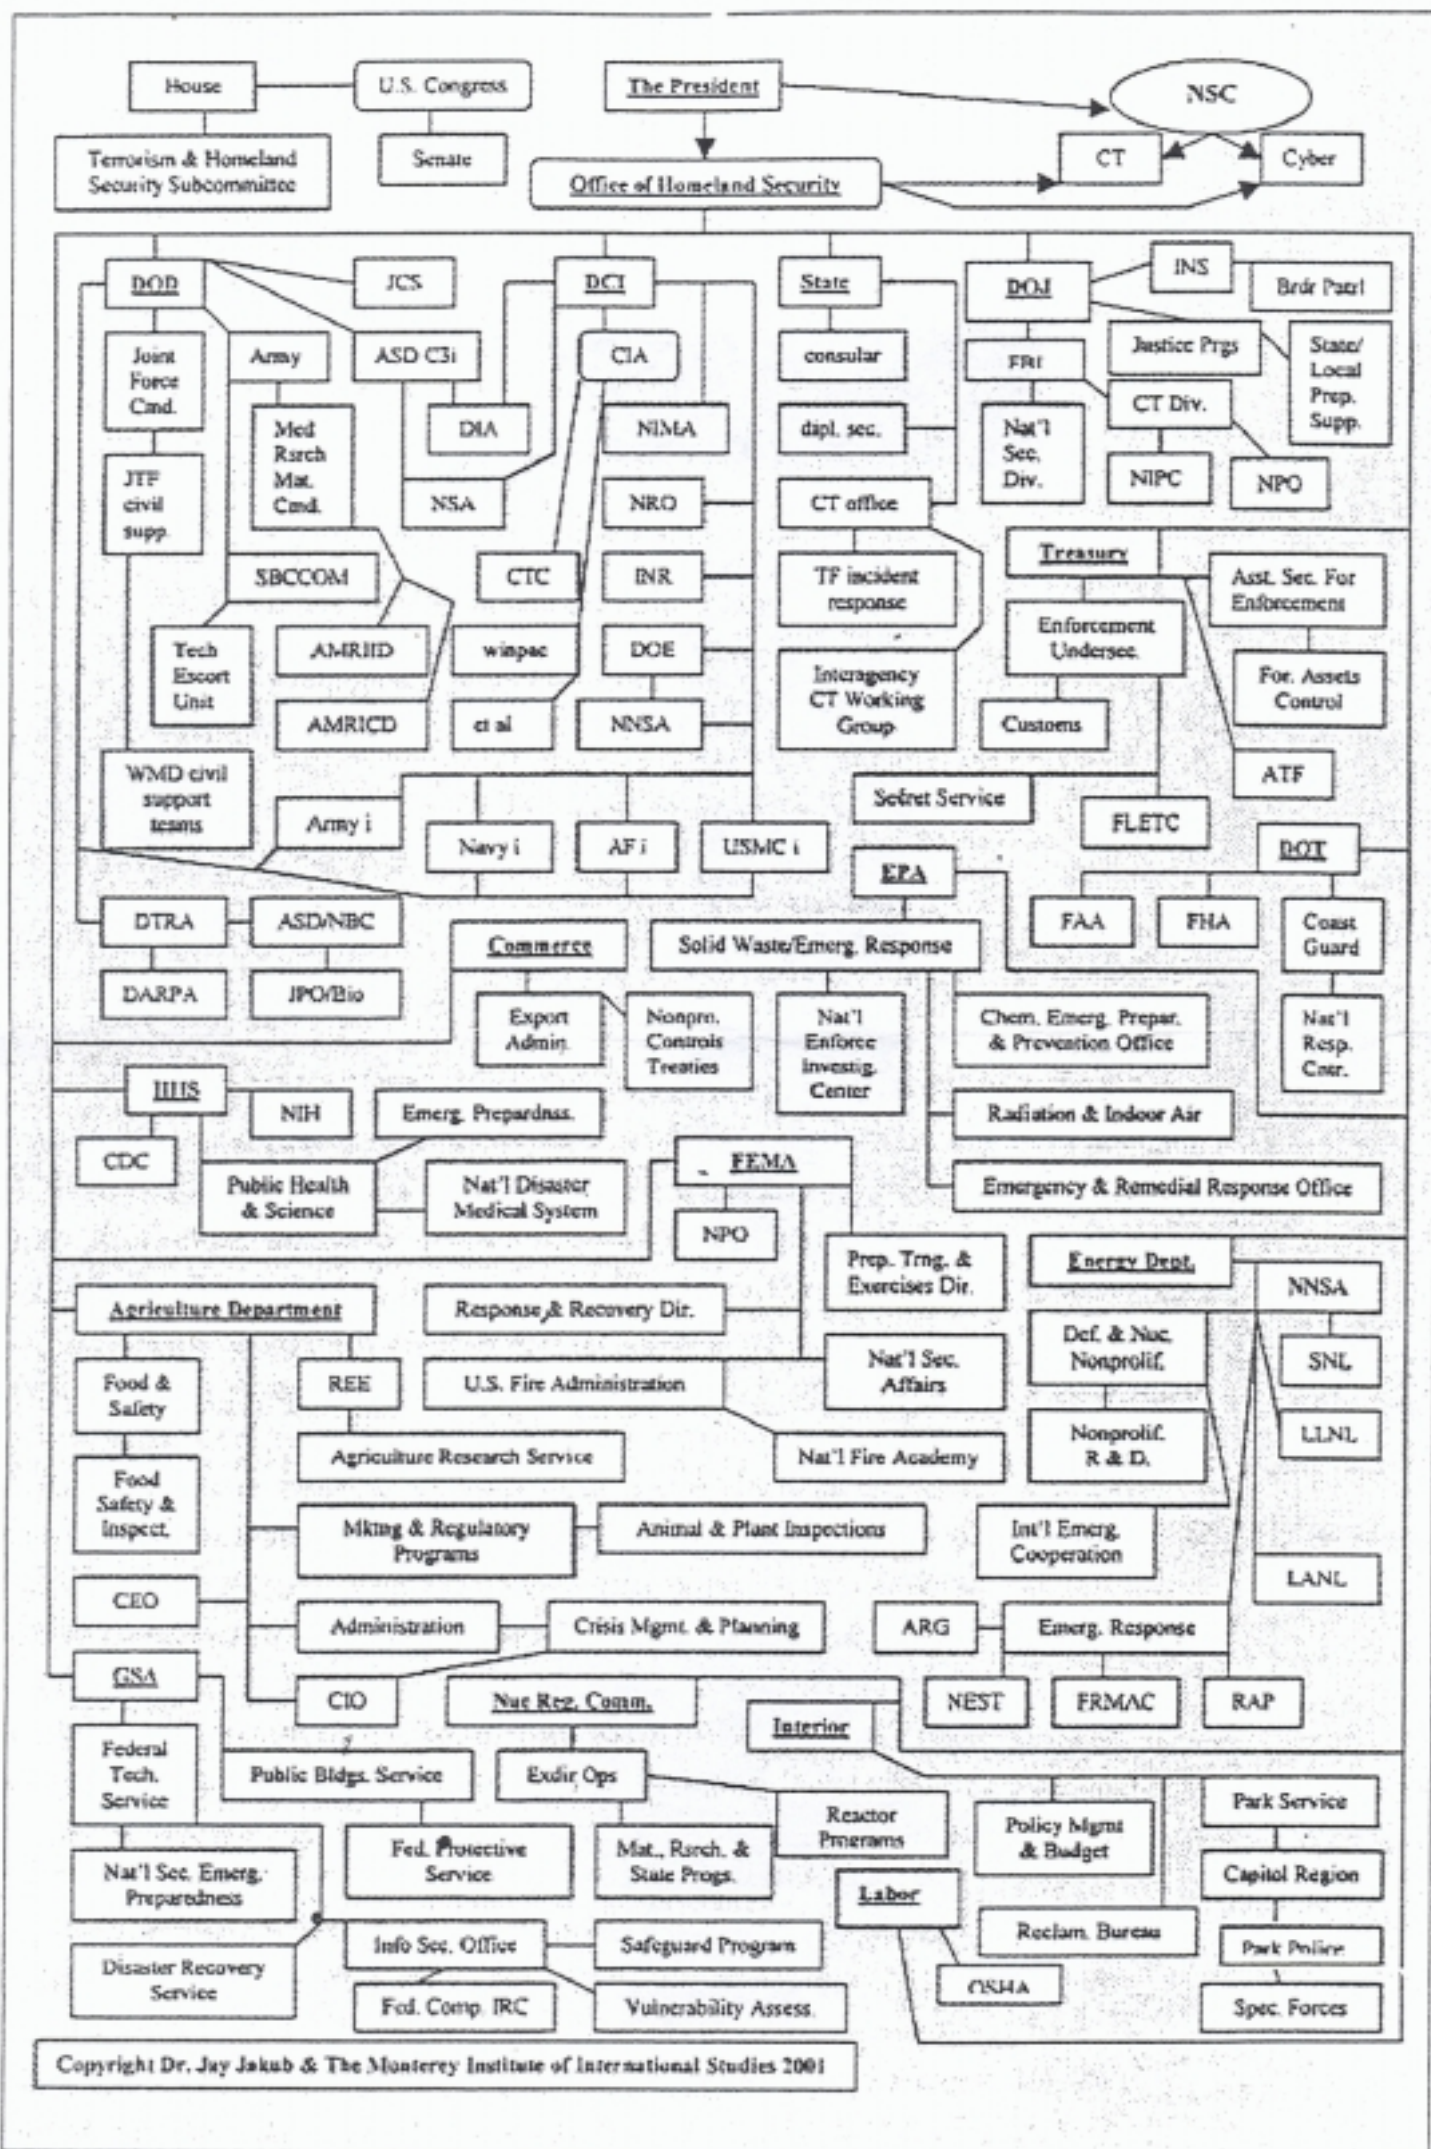

Bernard Kerik, former NY City Police Commissioner and member of the Board of Taser International (picture at left), has withdrawn from President Bush's nomination for Secretary of Homeland Security, leaving outgoing Tom Ridge (picture at right) with no replacement for the moment.

Among the numerous observations which can be made, note that there are at least fourteen identified intelligence agencies. Have you ever even heard of ASD C3i, for instance? It's a mouthful: Assistant Secretary of Defense for Command, Control, Communications and Intelligence.

With all this intelligence, you really have to wonder how it is that no one seems to know the true nature of the problem: At the root of every disease you will find parasites. Get rid of the parasites and the body can be restored to full health in no time.

It is nice to know, however, that the intelligence infrastructure is fully capable of handling all the watching necessary of those who would command and control the country. The day will come ("soon") when this country's leaders will be held truly accountable for that which they do in the name of the people. (Kudos to those in the FBI dealing with the AIPAC situation.)

This chart was published in PROCEEDINGS, U.S. Naval Institute, <www.navalinstitute.org>, although the exact issue in which it was published is not known. The copyright is to Dr. Jay Jakub & the Monterey Institute of International Studies 2001.

# World News Insights

In an article entitled, "Images of Earth-like Clouds on Mars", Robert Roy Britt reported for <Space.com> on 12/14/04 the following statement by Cornell astronomer Steven Squyres in response to a question as to whether or not the Mars Rovers would still be at work in May: Squyres answered, "The Rovers have a better chance of being alive then than we do." Hmmm...

In the December 15 issue we showed how ASEAN recently welcomed both Russia and China. Although there is a lack of space to cover it, China has been very busy diplomatically on the African continent, too, striking up economic deals. In this issue our focus will be South America, the member nations of which seem most anxious to join with the recently identified Russia-China-India-Brazil alliance. Argentina joined Malaysia in defying the IMF prescription for enslavement when the Argentine economy collapsed late in 2001. How did it turn out? [QUOTING:]

## ARGENTINA'S ECONOMIC RALLY DEFIES FORECASTS

*New York Times*, 12/26/04

By Larry Rohter

When the Argentine economy collapsed in December 2001, doomsday predictions abounded. Unless it adopted orthodox economic policies and quickly cut a deal with its foreign creditors, hyperinflation would surely follow, the peso would become worthless, investment and foreign reserves would vanish and any prospect of growth would be strangled.

But three years after Argentina declared a record debt default of more than \$100 billion, the largest in history, the apocalypse has not arrived. Instead, the economy has grown by 8 percent for two consecutive years, exports have zoomed, the currency is stable, investors are gradually returning and unemployment has eased from record highs—all without a debt settlement or the standard measures required by the International Monetary Fund for its approval.

Argentina's recovery has been undeniable, and it has been achieved at least in part by ignoring and even defying economic and political orthodoxy. Rather than moving to immediately satisfy bondholders, private banks and the I.M.F., as other developing countries have done in less severe crises, the Peronist-led government chose to stimulate internal consumption first and told creditors to get in line with everyone else.

"This is a remarkable historical event, one that challenges 25 years of failed policies," said Mark Weisbrot, an economist at the Center for Economic and Policy Research, a liberal research group in Washington. "While other countries are just limping along, Argentina is experiencing very healthy growth with no sign that it is unsustainable, and they've done it without having to make any concessions to get foreign capital inflows."

The consequences of that decision can be seen in government statistics and in stores, where consumers once again were spending robustly before Christmas. More than two million jobs have been created since the depths of the crisis early in 2002, and according to official figures, inflation-adjusted income has also bounced back, returning almost to the level of the late 1990s. That is when the crisis emerged, as Argentina sought to tighten its belt according to IMF prescriptions, only to collapse into the worst depression in its history, which also set off a political crisis....

[END QUOTING]

In the November 17, 2004 issue we presented John Perkins' Confessions of an Economic Hitman, so readers should already have a pretty good idea of what Venezuela's President Hugo Chavez had to stand up to when the "jackals" went to work.

[QUOTING:]

## CIA AND VENEZUELA

*Znet*, 12/12/04

By Mark Weisbrot

When it comes to Venezuela's rocky diplomatic relations with the United States, Venezuela's President Hugo Chavez is usually given the blame. His frequent denunciations of U.S. "intervention" in Venezuela are taken as indications that he is hostile to America.

But the evidence is mounting that Washington is the party responsible for friction with our third largest oil supplier. Last week the *New York Times* reported on recently released CIA documents showing that our government had advance knowledge of the military coup that briefly overthrew Venezuela's democratic government on April 11-13 of 2002. The Bush Administration not only failed to warn Venezuela of the coup, but actually pretended that it wasn't a coup at all.

"They lied about not knowing about coup threats before April 11<sup>th</sup>, and ... they claimed that the coup was a popular uprising when they knew that it was actually being planned for weeks," said U.S. Congressman Jose Serrano of New York City today.

The documents (available at <venezuelafoia.info/CIA/CIA-index.htm>) show clearly that the White House knew that there were detailed plans for a coup in April, that these plans included arresting the President, and that "to provoke military action, the plotters might try to exploit unrest stemming from opposition demonstrations". That is exactly what happened on April 11.

Yet on April 12, White House spokesman Ari Fleischer gave the coup leaders' version of events—that violence at the demonstrations had led to Chavez' "resignation" and that the government was responsible for the violence. "The results of these events are now that President Chavez has resigned the presidency. Before resigning, he dismissed the vice president and the cabinet, and a transitional civilian government has been installed."

This false version of events allowed the Bush Administration to support the coup government, which proceeded to abolish Venezuela's constitution, General Assembly, and Supreme Court. The Administration reversed its support for the coup government the next day, after being diplomatically isolated.

This deception indicates that the Bush Administration's support for the overthrow of Venezuelan democracy went well beyond what has been previously reported.

In other words, the Bush Administration was not just lying about what it knew, but actively joining the coup leaders in their short-lived attempt to convince the media and the world that a "transitional civilian government" had legitimately seized power in order to defend the public from alleged state violence. And all the while knowing that this was false, and that the military coup was part of a plan that they knew about in advance.

...President Chavez has told me that he wants normal and good relations with the United States, something he has repeated numerous times both publicly and privately. But he also insists that Washington respect democracy in his country.

That shouldn't be too much to ask.

[END QUOTING]

The next two articles document support for Venezuela from the Russia-China-India-Brazil alliance. First we see Venezuela acquiring 50 state-of-the-art Mig-29 SMT Fulcrums, designed to carry and fire the new 5,500 pound Onyx missile that has replaced the older but still unstoppable Sunburn. The Onyx can be fired from 200+ kilometers, travels at Mach 2.9 (2,100 mph) at an altitude of 15 feet and can take out an aircraft carrier.

[QUOTING:]

## WASHINGTON TRIES TO FRUSTRATE RUSSO-VENEZUELAN MILITARY ALLIANCE

*Pravda*, 12/14/04

By Hernan Etchaleco

During a visit to Moscow in late November, Venezuela's President Hugo Chavez announced his country was planning to modernize its Armed Forces by replacing old European/U.S. equipment with sophisticated hi-tech Russian weaponry...

However, it became known later that the operation is far more ambitious than expected. According to the Brazilian newspaper *O Estado de Sao Paulo*, Chavez is ready to buy up to 50 new Russian MIG-29SMT Fulcrum combat aircrafts, 40 Mi-35 helicopters and 100,000 AK-47 assault rifles in an operation estimated in \$8 billion.

According to the Brazilian daily, the strengthening of the Venezuelan army has created concern among top Washington diplomats and its closest ally in South America, the right-wing Colombian [U.S. narco-dollar-driven] administration of President Alvaro Uribe...

Quoting sources at the U.S. intelligence services, *O Estado de Sao Paulo* says Venezuela is also building a radar network all along its border with equipment provided by Ukraine and China. Despite earlier speculations, Brazil, the southern neighbour of Venezuela is not concerned on these developments. "We see the operation as an internal affair of a friendly nation", *O Estado de Sao Paulo* quoted Brazil's vice-President, Jose Alencar as saying.

...Colombia hosts the U.S. second largest embassy in the world, only behind Washington's diplomatic representation in Baghdad. Since 2000, the United States has provided Bogota with \$3.3 billion in mostly military assistance, and President Bush promised more when he visited Colombia on Nov. 22. It is, indeed, Latin America's main [destination] of U.S. military aid....

[END QUOTING]

Joe Vialls (<www.joevialls.co.uk>) indicates that Russia is giving four Mig-29 SMTs to Cuba to train the Venezuelan pilots and points out that from Cuba these aircraft equipped with Onyx missiles are fully capable of interdicting all naval traffic to and from the Gulf of Mexico, making for an effective stranglehold on U.S. oil imports. It's serious time.

Meanwhile, China is only too happy to assure itself of Venezuela's vast oil supply.

[QUOTING:]

## VENEZUELA'S CHAVEZ ARRIVES IN CHINA WITH EYE ON OIL DEALS

*AFP*, 12/23/04

Venezuelan President Hugo Chavez arrived in Beijing for an official visit that aims to bolster his country's oil deals with the Asian giant, state media and officials said.

During his five-day state visit, Chavez will meet with Chinese leaders including President Hu Jintao to exchange views on bilateral relations and international issues of common concern, the *Xinhua* news agency said.

...[Chavez] was accompanied by Foreign Minister Ali Rodriguez, the former energy minister and a former head of the Organization of Petroleum Exporting Countries (OPEC).

...Chinese companies are also seeking to invest in oil exploration and production "to satisfy, in large measure, the new Chinese demand", Rodriguez said.

In turn China can assist Venezuela in the fields of telecommunications, food production and culture, Rodriguez said.

"There is also the national strategic interest of diversifying markets, without sacrificing any of our (current) clients," he added.

U.S. markets currently account for 85 percent of Venezuela's crude oil exports, making up 12 to 15 percent of total U.S. consumption, according to White House statistics.

Venezuela has had a tense relationship with Washington since Chavez first took office in 1998. In August, Chavez

won a referendum keeping in office until 2006....

[END QUOTING]

[QUOTING:]

**PRESIDENT OF PERU TO SIGN MILITARY COOPERATION AGREEMENT WITH RUSSIA**

RIA Novosti, 12/22/04

By Mikhail Belyat

President Alejandro Toledo of Peru stated the intention to sign an agreement on cooperation in the military sphere worth \$125 million with the Russian Federation.

The agreement will concern modernization, repair and servicing of the aircraft and helicopters in service in the Peruvian Air Force. Priority will be given to that part of the Air Force which is used in the struggle against the consequences of natural calamities and in emergency situations.

"The talks on the agreement will be held without intermediaries, directly with the representatives of the Russian government, and will be absolutely transparent," the President of Peru noted....

[END QUOTING]

Meanwhile, Russia and China continue to strengthen their combined military capability.

[QUOTING:]

**CHINA, RUSSIA WILL HOLD FIRST WAR GAMES**

AP, 12/13/04

By Joe McDonald

China and Russia will hold their first joint military exercise next year, the Chinese government said Monday, as President Hu Jintao called for an expansion of the rapidly growing alliance between the former Cold War rivals.

The announcement came during a visit to Beijing by Russian Defense Minister Sergei Ivanov, who was expected to discuss expanding the Kremlin's multibillion-dollar annual arms sales to China.

The exercises are to take place on Chinese territory, the official *China News Service* said. But that report and other government statements didn't say when they would take place or what forces would be involved.

"We want ... to promote the development of the two countries' strategic collaborative relationship in order to safeguard and promote regional and world peace," *CNS* quoted Hu as telling Ivanov.

Beijing and Moscow have built up military and political ties since the Soviet collapse in 1991, driven in part by joint desire to counterbalance U.S. global dominance.

They are partners of the six-nation Shanghai Cooperation Organization, formed to combat what they consider the common threat of Islamic extremism and separatism. The other members are the former Soviet republics of Uzbekistan, Kazakhstan, Kyrgyzstan and Tajikistan....

[END QUOTING]

The U.S. is the only remaining superpower? Don't bet on it because this is definitely a bi-polar world.

To wrap things up, a sudden but "routine" visit to Moscow by a delegation from the World Bank suggests the bankers are indeed scurrying behind the scenes. Something tells us Russia doesn't need a Peruvian economist to figure out what is really going on.

[QUOTING:]

**WORLD BANK MISSION ARRIVES IN MOSCOW**

RIA Novosti, 12/25/04

A mission of the World Bank treasurers will arrive in Moscow on Saturday to stay till Monday, the World Bank's press service told RIA Novosti.

The treasurers are to hold a number of routine meetings in Moscow, in particular, with top officials of the Finance Ministry, the Bank of Russia and the Federal Service for Financial Markets, the press service noted.

Head of the World Bank's branch in Moscow Kristalina Georgiyeva earlier reported about the routine visit of the mission. According to her, the visit will focus on the new procedures to reduce Russia's expenditures on handling World Bank credits, mechanisms of term borrowings and ruble bonds of the World Bank.

This issue is on the agenda of the routine meetings and it will be discussed, Ms. Georgiyeva said giving no more details.

[END QUOTING]

Happy New Year? 2005 promises to be truly "interesting times".

# Public Notice

*This is the third of three mandatory publications of this notice, in compliance with requirements for sufficiency of public notices.*

**GLOBAL ALLIANCE INVESTMENT ASSOCIATION**

**PUBLIC NOTICE**

*This notice will be construed as a continuation of compliance with provisions necessary to establish presumed fact (Rule 301, Federal Rules of Civil Procedure, and attending State rules). If all interested parties fail to rebut any given allegation or matter of law addressed herein, the position will be construed as adequate to requirements of judicial notice, thus preserving fundamental law. A true and correct copy of this Public Notice is on file with and available for inspection at the newspaper CONTACT (P.O. Box 27800 Las Vegas, NV 89126, USA) which is responsible for publishing the instrument as a legal notice. In the Republic of the Philippines, comments and objections may be filed in writing by addressing Global Alliance Investment Association at 6751 Ayala Avenue, Makati City, Metro Manila, Philippines. Others may be addressed to Global Alliance Investment Association, 5344 Inauges Court, Las Vegas, Nevada, 89107 USA.*

This Public Notice is being run by GLOBAL ALLIANCE INVESTMENT ASSOCIATION (GAIA) as an "interested party" in the DON ESTEBAN BENFITEZ TALLANO & DON GREGORIO MADRIGAL ACOP FOUNDATION, INC. (FDN).

In a letter addressed to the Solicitor General (Republic of the Philippines) dated February 9, 2004, Subject: PROPOSAL TO COMPROMISE AGREEMENT in case entitled Republic versus RTC, PASAY CITY, BRANCH 111, C.A. GR NO. SP 70014, Mr. Romeo Cervantes Campos states, "...the undersigned, in his capacity as the present Administrator of the Estate of Don Gregorio Madrigal-Acop..." In the fifth paragraph of the same letter Mr. Campos states, "WHEREAS, Romeo Cervantes Campos was judicially recognized by the new succeeding judge of the same court, (Hon. Judge Ernesto Reyes), as Irrevocable Attorney-in-Fact and Administrator to the property and who has faithfully complied with the task of securing the release of TCT No. 408 from the Register Deeds of Rizal, Pasig on the 19th day of December 2001..."

To represent to the government that he is the "Administrator" of either the Estate or the "property" is a gross attempt to defraud not only the government but also the FDN.

The ORDER of the Court reads as follows: "At bench is an ex-parte motion filed by Mr. Romeo Cervantes Campos, whom Intervenor Julian Morden Tallano appointed as his true and lawful Attorney-in-Fact on July 18, 2000 empowering him to file actions in court and/or to sue and to recover various parcels of land on which the principal has rights and interests therein.

"Movant manifested that his principal has subsequently issued an Irrevocable Special Power of Attorney on April 23, 2001 a copy of which was furnished the court thereby expressly revoking the previous SPA..."

"Considering that above-mentioned document was executed voluntarily by the principal—Mr Julian Morden Tallano, the same is hereby duly noted and confirmed as integral part of the pleadings in the above-entitled case. SO ORDERED. Pasay City, September 26, 2001. Signed ERNESTO A. REYES, Judge"

Quite obviously Mr. Campos has NOT been recognized by the court as the "Administrator to the property" and is feloniously representing himself as such to the government. "The property" referred to is alleged by him to be the "...Estate of Don Gregorio Madrigal Acop..." which of course does not exist since the Estate referred to is the Tallano/Acop Estate of which Julian Morden Tallano is the Court Appointed Administrator. Furthermore, the specific wording of the SPA affords Mr. Campos no authority to unilaterally dispose of property.

Therefore, this Notice is published to help protect the interest of the PEOPLE of the Republic of the Philippines from any such nefarious scheme as this PROPOSAL TO COMPROMISE AGREEMENT, which offers:

"1. All the lands which are subject of this present litigation, save those acquired by possessors in good faith and for value, shall be donated/rewarded to the Philippine Government... and

"3. The Administrator, concomitant to his liberality in the bequestal of said real estate properties, shall however be allowed to retain in ownership an area of said donation equivalent to 1.5% thereof, (or 594 hectares) and said extent of land area shall be named under ROMEO C. CAMPOS, free from any back taxes, fees, and other incidental expenses of land titling and registration."

Whether Julian Morden Tallano will take action to expose the perfidy of Mr. Campos remains unknown. Global Alliance and the Foundation is making hereby it known to all of those persons who are interested and wish to inquire.

Copies of this Notice will be available at any of the three addresses provided above.

**IN WITNESS WHEREOF**, the undersigned have executed and sealed this authorization as of the date hereof.

For the Corporation, dated at Makati, Manila, the Philippines, this 22nd day of November 2004.

  
E.J. Ekker, President & Director

  
Doris Ekker, Secretary & Director

  
Ronald Kirzinger, Executive Vice President, Witness

**NEVADA CORPORATIONS:**

# Respect Your Corporation And Others Will Have To

**Budget's "Tip of the Week" #14:**

## Maintaining Separation Between the Corporation and Yourself

When properly handled, a corporation is a legal "person", separate, distinct and totally apart from you. The key to keeping things that way is to ensure that the corporation is indeed properly treated. The quickest way to lose the protection afforded by your corporate shelter is for you to treat it with disrespect.

One simple thing that many people fail to do on a regular basis—and which can tear down the walls of separation between themselves and a corporation—occurs when they sign documents in behalf of their "brainless child" (corporation). All it takes to do things right is to follow the signature with an indication that you are acting as an agent or officer of the corporation rather than in a personal capacity. If you are acting as a particular officer, as the vice president, for example—follow your signature with, "Vice President" or "VP". In cases where you would rather not disclose any particular position held within the corporation you may sign as "John Doe, Agent", which simply means that you are acting as an agent for the corporation and NOT in a personal capacity.

The above advice applies to ALL situations where you might sign for the corporation, including checks, of course, but also when signing such mundane things as invoices for goods received or services performed. And it certainly applies to any kind of agreement—a lease, purchase or rental agreement, for instance—as well as corporate resolutions. After a while you will find that you do this automatically and thus automatically uphold the fundamental protective insulation of your separateness from the corporate entity.

Failure to adhere to this basic corporate formality "could" allow a prospective litigant to assert that the corporation is nothing more than a "straw man" and that it actually functions only as your "alter ego". We have put the word "could" in parentheses because in Nevada there actually exists only one case in the last quarter-century where a prospective litigant managed to "pierce the corporate veil" and cause liability to be assessed against the corporation's owner/manager—and that was a case of outright and unabashed fraud. It's great to have that measure of protection but you can easily bolster it by developing the good habit of following your signature with a title.

The next essential step in maintaining separation between the corporation and yourself is to always document key decisions made for the corporation in the form of corporate resolutions. If you do not know how to construct a resolution, give us a call and we will be pleased to help out. Meanwhile, if all you do is put a simple memo into the "resolutions" section of your corporate records, you will have taken a MAJOR step toward maintaining your Nevada corporation's unequalled liability protection.

## CORPORATION SETUP AND MAINTENANCE FEES

### Budget Corporation—includes:

- First-year resident agent fee
- Corporate Charter
- Articles of Incorporation
- Corporate Bylaws
- Corporate Resolutions
- Budget corporate record book
- 3.5" floppy disk of resources
