Regaining Balance While Planet Shaken AND Stirred

1/16/05—#1 (18-153)

SUN., Jan. 16, 2005 8:14 A.M. YR 18, DAY 153

Manila, Philippines

RE: LOTS OF SHAKING GOING ON! BALANCE LOST AND STRUGGLE TO REGAIN—SOL/DJE

* * *

WHEN ON EARTH—AS IN “WHEN IN ROME”

In LIGHT I AM. Geophysics-Geology Professor Cohan Anthonious Soltec, guest lecturer at your service. I am present to convince you of NOTHING but rather to explain some of the things upon which you “hang-up” and want revelations, i.e., the “end is near—or here—or there”.

NO, THE END IS NOT! THERE IS NO “END” EXCEPT AS YOU PERCEIVE, IN IGNORANCE, THE VERY STRUCTURE OF YOURSELF AND THE ENVIRONMENT WITHIN WHICH YOU BUILD YOUR PERCEPTIONS

AND OPINIONS—AND FAIL TO DO YOUR “LESSONS”.

I have written very little for this crew since my very being was usurped by the “enemies within” while at least half our “crew” went with the sinking ship and back into misperception, blame games and ignorance—BY CHOICE.

“I”, Soltec—and yes, please, just call me Soltec for I have no egotistical perceptions regarding my position or authority of responsibility. It is simply a term of identification and what you believe is none of my business—ONLY YOURS.

I was, personally and without truth, removed to the category of serving manipulators and outright thieves who claimed my services. This receiver has human overload and the focus of this service MUST BE TO THE IMMEDIATE TASK AT HAND IN THE “WHAT’S IN IT FOR MAN” CATEGORY OF ACTIVITIES—I HAVE TIME; SHE DOES NOT. So, over the years you end up with NEITHER. That is called “consequences” and nothing more. I was turned into some

perception of an inner-light/self-examination “projector”. NO, THAT IS NOT THAT WHICH I AM.

This having been said I will address some of the directly confusing items in the most current events of geophysical “relocation” of landmass and water displacement, which is easy enough to understand in a bowl of water or that proverbial kitchen sink.

OCEANS HAVE TIDES

You always have to consider the most SIMPLE explanation in order to know TRUTH. You can play with gravitational pull of moons and stars and other astrological phenomenon but it is basically hogwash. Just as with the word “tsunami”, it is now abused to the point that within a very short while it will have NO MEANING whatsoever.

You just witnessed, or experienced, a “tsunami” (a huge wave consequential to a trembler of “great” magnitude as described in your mostly non-scientific community). Since the scale of measurement has no

other alternatives for YOUR CONSUMPTION, so be it. Even the magnitude on the R-scale was adjusted to meet whatever political means (ends) were desired for the response to “consequences of such a shaker”.

Then the next question comes with “why not Malaysian wipeout”? Why indeed! Points south of Aceh, Indonesia fared very well and simple “deduction” with “reason” would bring you answers galore in correct assumptions.

The magnitude of the quake is NOT the determining FACT, no matter what is told to you about moon-glow and starlight. It is displacement or frequency change of massive scale of the contained WATER that presents larger than ordinary waves.

The problem is not even in the waves hitting the shore—but the consequences in damage of MAN BUILDING ON THE BEACHES WHILE EXPECTING THE GOVERNMENTS AND “GOD” TO REMOVE HIM THEREFROM IF THE WATER GETS TOO DEEP. NOW, IS THAT DIFFERENT FROM ANY OTHER CIRCUMSTANCE YOU MANUFACTURE FOR YOURSELVES?

As to the “Straits” in question, let us look at the geophysical arrangements of Seabeds. These, by explanation, would be nothing more than “landscapes” without water involved. Moreover, you have massive sandy deserts, mountains and molehills.

When you change the undersea “topography” you do not necessarily do more than cause ripples and, sometimes, unbalanced circumstances and “displacement”.

If a land quake opens a trench big enough to swallow a city then the displacement is not an empty hole-in-the-ground—IF THE CITY FALLS INTO IT.

How do you think “trenches” and “troughs” are formed in ocean beds?

Water shifts masses far more easily than does air unless the air is in typhoon or whirlwind velocities (tornados).

There is “drift”, shifting and turning of everything from the living tectonic plates already discovered to the upsurge of forces which impact from “below”, as in volcanic activity.

I had set out on a teaching venture many years ago and thousands of hours were given to actual textbook lessons on these “natural” events so that TODAY you could be informed, recognize the circumstances and manage yourselves AGAINST the death-rays and activities of a planet shifting for WHATEVER reason might be causing the events.

Perhaps you are eating and you would like some FAT to go to the underlying wrinkles in your neck. Fine, you can “wish” all you like and you can blame the government and still you will keep your wrinkles and simply get more and more overweight which will place every part of your body at risk—not just the appearance of your chinny, chin, chin.

You can REPLACE a kidney, for instance, with one of approximately the same size of your own if yours fails. However, if that kidney were the size of a normal liver or two or three—you have inner problems because your “space suit” is going to compress your entire digestive organ and you might just even notice the abrupt change “up your nose” or in your ears. Moreover, it will not be that which you can now “hang it on your ear” for your suit is built to keep it all INSIDE the container.

If the replacement is absolutely too small then expect some sloshing about until muscles grow properly and supporting structures recover “holding” strength.

The WORLD is no different, students.

In the area of the Indian Ocean with its recent and interesting events—it doesn’t take a rocket scientist to understand what happened there and places SOUTH—OR WHY it happened exactly where it did.

The area itself is within a very reasonably recognized POWER GRID where MAN can bombard for his own purposes (GOOD OR BAD) as either a “test section” or for actual more intensively ignorant and invasive-pervasive purposes.

The “hits” were against Muslim locations but the damage was presented and responses were actually regarding OTHER “RELIGIONS” AND PEOPLE. The ENEMY always goes to where HE GETS RESULTS, SLEEPY STUDENTS. He also hits where he CAN produce a desired result. FOR EVERY EFFECT THERE IS FIRST A CAUSE.

“Straits” are interesting things in their own right. There is always a push-pull to delete them and regain attachments to other, and larger, “above the sea” land masses. POWERFUL water flows are in those areas as whole areas of thousands of miles ebb and flow and, like forest covered mountains, stability comes with good tree root systems and stable rock foundations. Denude the mountains and the top crust will simply wash off and then give up the mountainside in the first heavy rains. Undersea activity is only different in the flora and fauna present.

Add to that circumstance of volcanic (of which we wrote equally on that specific topic) activity and you will find more massive shifting. Moreover, if the crust can be reduced as in a vibrating chamber and heavy chipping away at fault lines, those pressured volcanoes WILL MORE EASILY ERUPT and whammo—a really HOT problem has evolved and since the “overflow” will take to the air as well as within the sea—YOU HAVE PROBLEMS, FRIENDS. INFORMATION ABOUND AND TO CHOOSE NOT TO USE IT IS YOUR PREROGATIVE AND NONE OF MY BUSINESS.

I have no permission in MY CODE to interfere with YOU. I do not coerce; I offer—no more or less. I can’t force you to learn ANYTHING—I can only offer information and hope YOU have gained, through your choices of priorities, ability to use that which I might share.

Let us go back to the “vibrating table” concept and the potential for INTERVENTION or counter-balance in outrageous events thrust upon you as in Man against Man. Our pulse waves are, indeed, greater and more controlled than are YOURS. Is this some “nanny-nanny” comment? No, it is fact without fancy.

Let us consider the Malaccan Straits and the depth changes now proven to have occurred recently. Well, it wasn’t so RECENT as in immediately popped onto you. It was quite gradual and managed by pulse and frequency WAVES. Our only input was to COUNTER in order to keep some semblance of BALANCE as manipulated impulses were directed specifically for purposes not unusual in Man’s game of “get-it-all” but the consequences so massive as to be UNACCEPTABLE to the alternative plan of a balanced playing field. MAN SMUGLY ACTS IN WAYS TO PROTECT HIS INTERESTS AS “SELF”.

People, read the first *PROTOCOL* of those infamous managers of the human experience and you will note that it advocates ECONOMIC CONTROL. It certainly did not and does not start or end with a tsunami in the Indian Ocean.

WATER DEPTHS IN MALACCA STRAITS ALTERED

The Hindu News Service, 1/12/05

Kuala Lumpur, Jan. 12. (PTI): The northern section of one of the world’s busiest shipping channels, the Straits of Malacca, may have had its draught altered by several metres in the aftermath of the December 26 sub-sea earthquake, according to reports.

The reports said water depths in parts of the Straits of Malacca could have dropped from 4000 feet before the quake to as low as 100 feet.

Thousands of navigational aides, such as buoys held in place by mushroom-shaped anchors were carried off to new locations by 50-100-foot waves following the quake, a report in shipping journal *Portsworld* quoted by the *Star* newspaper said.

According to the U.S.-based National Geospatial-Intelligence Agency it may take months if not years to re-chart altered coastlines throughout the region.

Old shipwrecks marked on charts had been relocated, joined by new wrecks that would have to be salvaged, moved or charted, *Portsworld* said.

The U.S. agency, which analyses spy satellite imagery and produces maps and charts for the Defence department, has received an unconfirmed report that one area of the Straits of Malacca, which separates peninsular Malaysia from the Indonesian island of Sumatra had its depth cut from 4060 feet to 105 feet, the *Star* said.

In another area of tsunami-affected waters, a merchant marine ship had logged that the depth was cut from 3855 feet to just 92 feet, the *Star* said.

The U.S. Navy would be sending two ships to begin efforts to re-chart the waters, it said.

When a mountain or a molehill is pulverized, as are those now loosed as are the now shaken AND stirred Nicobar and Andaman island chain, you have INSTABILITY and full recognition that in nearly 140 quakes above the magnitude of 5-R you have chaos and pending destruction greater than anything on the Christmas vacation.

Critical volcanic forces are ready to burst out as the crust was thinned and ready to slip at approximately 10 kilometers depth. That was the FIRST attack with the heavy hits at onset in THAT area. This does not even address the Aceh area of Indonesia or consider the landmasses present that buffered the “other side of the islands.”

Without help you would have at the least a 90-foot wall of water and not the piddling little 40-foot washout. It has happened before and it WILL HAPPEN AGAIN.

As a countering measure we could indeed hit the area with frequency bombardment that simply vibrated a more level seabed while sifting and shifting SAND into a more stable seabed as deep-seated masses rose abruptly.

Try, for instance, putting a pile of dirt in a dish and cover with water very carefully and see that you basically have a mountain. Now, put that on a vibrator and watch the mountain become a very balanced distribution of silicon substance. You can

accomplish a similar result but with a quite rough distribution by pouring on the water in large quantity directly on top of the “mountain” of dirt you had with which to begin this exercise. The SEABED is no different and please do not discount the fact that the same “frequency vibration” didn’t take place in the island chain above mentioned in order to regain a better BALANCE in order to not have those mountain tops slide and wipe out everything in their path under thousand feet altitude.

I note many with rulers and calculators in hand making calculations regarding something TOTALLY CONTROLLED FROM SPACE (ATMOSPHERE, AS IN “AIR”). It no longer matters whether or not a thing begins as a natural shift from built-up stresses, or from pulse waves through laser spotting.

Some panic-negators even have gone to far as to say that a change in Earth axis rotation will not change much of anything. Are they, and YOU WHO LISTEN to such incredible garbage, INSANE? Are you so blind and foolish as to actually think that a change in your very rotation and axis change will do NOTHING? Have you already died?

WHY WERE SOME OBVIOUS SPOTS SPARED?

Some will like the answer to that and some will poo-poo until hell freezes—but we certainly can INTERVENE in necessary events to alleviate total impact on OUR PROGRAM. We do not INTERFERE (big word difference).

I would recognize right here as a by-side interesting factor of why animals were spared or seemed forewarned in the tsunami areas. They “were”. No, it was not an “act of God” or cosmic brethren blowing horns—but the very noise frequency of such pulses AND WAVE ACTIVITY are of such frequency as to be heard only by animals as it is out of the range of HEARING of the human dumbed-down entity. A dog, for instance, can hear the high-pitched steady whine of a very high frequency laser hit and the elephants, as further example, communicate through those, unheard-by-humans, low-rumble frequencies of the same wave activity. Furthermore, they FEEL IT. YOU IGNORE IT.

Shall you have warning systems? YOU HAVE WARNING SYSTEMS. You simply choose to build your sillies on the beaches to MAKE MONEY. So, blame whom? Oh yes, of course, GOD!

Do you have ability to measure ocean depths? Of course, but not by those silly buoy-bobbers hooked to equally silly anchors. We can measure to a gnat’s eyebrow from a zillion kilometers into space—as can your guys at the dial control. The nonsense is set forth to fool as many as possible ALL THE TIME, all of you SOME OF THE TIME and everywhere possible ALL OF YOU ALL OF THE TIME. Ah BUT, you can’t fool GOD any of the time. Nor can you fool anyone who KNOWS the subject and the physics of any given scenario or fact of PHYSICS. Changing definitions does NOT change fact—only fiction.

Are YOU “near” the “end”? No, you are simply in the middle of a power play of Man in the form of physical manifestation run by Satan (for lack of better description) to manipulate, hold and enslave the other guys around on your manifest placement. Is it the balance challenge of “good” vs. “evil”? It isn’t even THAT, readers, it is the reality of Truth in REALITY vs. the manipulations of very “manifest” control

interests, perhaps better explained as the egotistical opinions and attached capabilities of individual forces of the “physical” expression. It doesn’t equate even to that “pile of sand” in the deep trench—but expands its illusion as to control EVERYTHING in both heaven and on terra-islands where human expresses. Now, if that is a SPIRITUAL lesson, for which I was not asked, please overlook my inability to segregate or sever the two realities—you and your soul from that space suit apparatus.

So, old Soltec is back? No, I was never gone so how figure? If you followed the loudest piper and his call to the ego, so be it. When we could have 90-page papers every week or more frequently, we covered lots—even from one set of fingers on a keyboard. That luxury has been removed and remains only bi-monthly papers with limited space and the same human fingers now weary and not too interested in these things of repetition—or my presence representing hours more work which will bring denial or appreciation depending on who did what to whom!

I am interested to note, however, that the interest in, for instance, tsunamis as being in the midst of current happenings dwindles as the term is misused and you get saturated with it and the SAME PICTURES run until your minds are mushed. That is the tool of the adversary to deaden your senses and put you right back to sleep while they further perform surgery on your brains. The surgeons are the very same as the “economic hit-men” so please, sleep well, your “dead-zone pills” are ever available for your further distraction.

Those of you who have some respect and belief in my person and/or this conduit of presentation will like this writing; you who do NOT, won’t. It is simple deduction, Dr. Watson—just as is the explanation of the recent “disasters”. In that perception: “You certainly aint seen nuthin’ yet!” For instance, if you suck up the water from the already established trenches just around the Philippines—the world is a gonner, my friends, along with the deuterium which would negate the need for fossil fuel.

Now, to you who think this a rare or unusual form of “communication”, I ask you to pick up your telephone and see what you hold, for with a cell phone or that computer THIS MESSAGE CAN TRAVERSE THE GLOBE IN LESS THAN 4 SECONDS AND COUNTING.

So, again, who am I? I AM! Who are YOU?

Those who cover their insults by words of mush and “only supporting you” are the very worst parties of which to beware. They lie on the very face of it and averting the eyes or scratching the old head simply does NOT cut the Truth in fact OF ILL-INTENT. If you practice this scheme of fool the suckers on YOUR list of tattle-accepters, shame on you. Excuses are ill-received by those who KNOW TRUTH and of we who know INTENT and upon which we base our very expression and presentation. An apology might work sometimes, but excuses and denials are less than grease on a pole to truth.

In such circumstances, YOU write your excuses and scatter them like chaff in the winds for YOUR PURPOSES and it actually fools none other than those in foolish coalition WITH YOU.

I, and my compatriots, are not come forth to humor you or your individual ego-demands. The end times (AS YOU KNOW THEM) “are” at hand, and drifting in your own narrow stupor hitting at your “perceived” antagonists is a waste of time and of precious energy better spent typing out, yeah, even my

Tsunami—from *Wikipedia*, the free encyclopedia

A tsunami is a natural phenomenon consisting of a series of waves generated when water in a lake or the sea is rapidly displaced on a massive scale. Earthquakes, landslides, volcanic eruptions, and the impact of extraterrestrial bodies such as meteorites, can generate tsunamis which can rapidly and violently inundate coastlines, causing devastating property damage, injuries, and loss of life.

The term “tsunami” comes from the Japanese language meaning harbour (“*tsu*”) and wave (“*nam*”). The term was created by fishermen who returned to port to find the area surrounding the harbour devastated, although they had not been aware of any wave in the open water. A tsunami is not a sub-surface event in the deep ocean; it simply has a much smaller amplitude (wave heights) offshore, and a very long wavelength (often hundreds of kilometers long), which is why they generally pass unnoticed at sea, forming only a passing “hump” in the ocean.

Tsunamis were historically referred to as tidal waves because as they approach land they take on the characteristics of a violent onrushing tide, rather than the sort of cresting waves that are formed by wind action upon the ocean (with which people are more familiar). However, as they are not actually related to tides, the term is considered misleading, and its use is discouraged by oceanographers.

message regarding something as mundane as tidal waves vs. tsunamis. And oh indeed, the difference explains both and one is not synonymous with the other.

By the way, Inquiring Minds, you have had ability to absolutely manipulate STORMS for nearly a century. Why do you play such critically silly games on yourselves and then stand in SHOCK AND AWE? Ah yes, “no weapons of mass destruction”? Oh, children of the LIE, you are now encountering THE weapons of mass destruction all covered in camouflage. Walk gently, friends, for you are not and never shall be alone (unless of course, you choose to be). However, the muck gets thicker and deeper and soon the cement boots will be stuck in the mud beyond recovery.

In that instant neither God nor Satan will grieve for you. God will offer free-will lack of judgment and Satan will laugh himself silly at your lack of growth and understanding in the very struggle to maintain your ignorance. Sometimes it appears you have come to the “end” of wisdom vs. stupidity. You wish to remain ignorant and blame the magicians for fooling you; you accept them for their input without basis while demanding to maintain your very superficial “druthers”. So be it—something has to give...!

To you who did not receive the last centimeter of change of the oceans, currents or volume—please overlook because it is NOT in the sea that you must measure. Neither is it in soul WITHIN. It is physical; it is REALITY, and it is PROOF of that which IS and not that with which you tinker constantly. Water can drown you but with proper boats and floats—it is your salvation—after all, you are made of, nearly all of you, “water”. It is NOT water that actually kills—it is lack of oxygen! It is not, either, the fall from an airplane that kills—it is the landing. Is it not time to consider the consequences of your circumstances?

Soltec to clear, thank you for indulging my input at YOUR invitation.

I salute you who are growing and stay this most uncomfortable course. The warnings are there if you but use them.

SOLTEC
dharma 

Geophysical Comments: Why Stick To 'Mission'

1/17/05—#1 (18-154)

MON., Jan. 17, 2005 12:44 P.M. YR 18, DAY 154

Manila, Philippines

RE: COMMENTS ON GEOPHYSICAL MATTERS
AND WHY WE STICK TO "MISSION"—GCH/D

* * *

CAUTION

Professor Soltec is a hard act to follow and the information he would share with you is quite overwhelming in quality and quantity if Dharma only had three sets of hands. We are certainly, however, extremely pleased to have as many lectures as he might be willing to offer.

The reason for the input by Cmdr. Soltec was in response to several directed petitions regarding information being floated about the Internet and in the media/press relative to the depths of waters in the Malacca Straits being altered by recent quakes and tsunamis. It is stated that there are resulting changes of as much as 4,000 feet. People, that is a LOT of "feet" and would displace the entire region in point.

There was indeed a major shift in the water depth, which actually allowed the "turning" of a floating island mass having broken off underneath the shifted areas. The change actually relocated the markers and floating buoys in the area as well. Four thousand feet rise, however, is incorrect as an event resulting immediately on impact in that given area for the tsunamis would have washed more to the SOUTH than in the direction of obvious flow had this been correct. This is just about the MOST IMPORTANT waterway in the entire area so please don't miss the importance potentials.

I also suggest that most readers in areas other than in South Asia or Southeast Asia will not recognize the importance or the location of said Straits. Perhaps you are going to need a map as well

I speak of this topic only because so many are not proficient in geography OR geophysics and in specific reference as response to direct inquiries it is probable that the general reading audience will be a bit confused. I trust this clarifies, somewhat, "through the glass darkly".

It reminds me of the fact that the Mojave desert area of California and adjacent to the area of Tehachapi which has great meaning to our readers, is going to RISE more than the floor as presented here in the Malaccan Straits and NOBODY pays attention. I offer it here so that some of you may well wish to check it out in the books and especially in our early Journals. What you "don't know or see"—CAN HURT YOU VERY BADLY. What you DO

KNOW can make you very comfortable about formations of inland seas from massive coastal "tsunamis". The break, by the way, will come between Tehachapi and Mojave where the fault line crosses the highway in the area around Sand Canyon and Cameron Canyon. Is THAT specific enough?

If the area rises "as a block" it will be "an act of God" so count your blessings, local friends. I ask, however, that you be warned about the areas around "over-ground" gas lines, etc. Fire will be a major and explosive factor in breaks in the area in point here and, say, the coastal plate subduction areas. The gas will pour into the lower areas and ignite with a very large

"boom" and yes indeed, the spark for ignition will come directly from toppled wind turbines lining the sides of the transport conduits. You can expect most of the pass to be closed (plugged) in the bottleneck area as the pass goes through the foothill "narrows". So be it and may you shake, rattle and roll safely.

What about crystals and protection of, let's say, the Tehachapi area?

It is no longer of great importance as a geologic focus as the crystal itself is now quite isolated and will ride out shifting with hardly a chip off the old block. Never mind the chip off THAT block but please, old friends gone away, check out the chip on the shoulder as you ponder possibilities.

If you think taking care of all these tsunami victims in Asia is interesting, try the entire coastline of Baja, California, Oregon and Washington—right up into Canada. The sucking sound will be heard for hundreds of miles but it IS THE WAY landmasses change their topography.

The expectation is that much of the San Diego area of California will break away from the mainland and float quite safely to the NORTH and that change

might very well shift Catalina free to move as well. Or the outer islands such as Catalina may very well topple, giving more depth (or height) to the tsunami which WILL follow.

Terror tactics? No, just the "facts Ma'am". And when? Well, check out your psychics, you are long overdue the BIG ONE as the scientists continue to warn you DAILY. Perhaps you might wish to look again at Scallion's map and consider some options between high ground and the deep blue sea.

Ah, and by the way, there are far more dangerous shakers expected in your unstable shifting masses—try New York where 9-11 will be wiped from memory. What in the world do you think formed Niagara Falls, tourists? You have built your world on shifting sands and it is not "IF"—it very definitely is only a consideration of "WHEN", and no, I am NOT YOUR GURU and my secretary is NOT PSYCHIC.

We have worked diligently to GIVE YOU INFORMATION BASED ON FACTS. What you do with that information is solely up to YOU. So, where will YOU be when the sky seems to fall? Exactly wherever you ARE at the moment. Security is up to YOU. The warning system is up and running but you can't hold your breath long enough to survive very long.

Now, don't consider that somehow we are going to miss those big banks and control centers—but you might well have a day or so of inconvenience without those empty dollar notes and banking tellers.

Can the banking octopus live without its central control centers? No, the tentacles will simply wither after a while and the rest of the globe just might recover somewhat. But that is another story for another fireside chat for which so many of my closest friends wait and anticipate.

I also remind you of Tehachapi to check out the level of growth "line" of the Germain flowers as they were FIRST NOTED and you will have your line of probable safety as the up-thrust will also give higher altitude to the immediate areas. Ah BUT, all the safety and security things we built right to the grain farm (WITH UNDERGROUND SHELTER) are now GONE. "They" also laughed at old Noah so "long live the myths".

Professor Korton is equally respected in the field of communications and yet you have to remain "stuck" with me until the myriad details of this program are worked through.

I would clarify one geophysical misperception now passing around the grape-vines of respected or disrespected psychic seers and that is that somehow the RING OF FIRE has been triggered into action by the Indonesian quake. NO, the ROF was already on the move and is an entirely different "plate" than in the Indian Ocean or even, for that matter, attached to Australia which is often impacted by movement of that Pacific Plate.

Another error in speculation is regarding the so-called "axis shift". Your psychics and great speculators casually speak of shifting poles and "rip-aparts" like talking about a Spring Rain in expectation along about April or May. Everybody wants on that Bandwagon heading for the headlines. You can't have enough panic to encompass everything thrust at

you so please take it a bit more slowly.

The West Coast rifts (faults) of the U.S. and Canada are spectacularly ready for massive change with accompanying upheaval in every strata of life.

Indeed, someone has come forth and speculates a massive break on the coastal fault zone running from mid-British Columbia, Canada to northern California with a build-up of 300 years of stress. This is so, and spectacular shifts can be expected but no more so than along that San Andreas Fault along the West Coast of the U.S., which can trigger every other fault along the zone.

Just please be careful, stay prepared, and USE INTELLIGENT WISDOM.

I caution you again, however, to be careful with all the psychics and speakers, oracles and gurus—just because you are a “native American”, for instance, does NOT a true psychic make.

We are backing off from the wacky speculations of our own relationships with writers and receivers as the overwhelming number of quacks and nonsense is truly unexperienced before in history. We give you information but we want no notion or notice of extraterrestrials playing games or phantom voices from outer space somewhere.

Daily there are some who read my writings and if they don't like the content simply blast Doris for whatever I might have observed. We could, however, spend endless hours into infinity bickering, arguing and spending countless ego-hours in self-defense of attitudes, service and/or self-excusing.

If a point does not further our position with holdings in the task at hand, overlook, please, our shortcomings of not kibitzing further. I will give you facts which sometimes include “intent” regarding some incidents but we run no “debate service”.

Neither are we here to argue with geologists passing out information, false or otherwise. If we see errors we will tell you and outrageous scare-tactics for political reasons will be addressed as soon as we have time or space. The Indian Ocean and Indonesian Malaccan Straits incidents were politically motivated and orchestrated for the distractions they presented. Shock and awe have little to do with it.

We must keep our eyes on the bouncing balls here as the President (Estrada) is now back in security here in Manila and the natives remain restless and Christmas only stirred them further instead of calming their souls.

I am reminded of watching as an entertaining TV program presented a handsome, tall man from the U.S., of middle-age years, arguing with a Canadian T-shirt salesman-manufacturer (of printed shirts).

The Canadian was quite insulting about the U.S. from just about every aspect while the U.S. citizen finally made a bet with the Canadian. The bet was that the U.S. man could wear the “damned painted shirt”(big red maple leaf, flag and emblems) and actually very FEW would even notice the thing.

OK, good bet because the shirt was outrageously overdone.

So, the U.S. man donned the T-shirt AND NOTHING ELSE.

The shirt came down to the you-know-whats, back and front.

Surely enough, he pranced smartly along up and down and all around the city and guess what, nobody took a second look at the SHIRT but everything “hangin' out” got full attention until stopped by the police.

So, everything is all in the perception and

perspective—and how clever your adversary can be in any given incident requiring distraction.

The very next program showed dancing girls in less than a T-shirt and male models skydiving in their brand-name underpants and nothing else except the parachute and somehow those were good and entertaining—well, not quite as entertaining as the T-shirt.

Can any of you even guess how serious the mess is in Israel-Palestine? I thought not, and meanwhile Syria has acquired missiles which can now be fired all the way to the Nuclear facilities of the Negev bunkers in Israel. They picked up those cute toys from Russia whose spokesmen simply smiled and “denied” such interchange.

How difficult do you think it might be for two old folks to get this incredibly “impossible” program up and running here in Corruptionville?

I am the miracle in point? Interesting this is as a concept but in the objection to my comments, since credited to “Doris”, I was not even given honorable mention and that very clearly indicates that dancing on marbles is an interesting pastime. If you do not “believe me” then you actually never believed me and thus, how can you believe anything we offer or try to bring into operation? We are, however, reminded of how much we somehow “owe” parties involved for some services considered rendered.

We are humbly grateful for any and all help given, for it has been a rather difficult journey.

By the way for you Inquiring Minds as to Russell Herman and how GAIA came into being. I BROUGHT HIM. I MET WITH RUSSELL AND HERE WE ARE! If VK doesn't like the flavor of those apples then I can't help her or “save” her from herself.

Have “we” heard anything back from our recent contact with “Bush”? I HAVE! Do not confuse that with “we have”. We may well be the “same, same—but different” but don't assume that we ARE “THE” SAME.

Dubya Bush is just about overwhelmed in Iraq and he hasn't even yet had his inauguration for this second term, already badly warped and loaded with discontent. It certainly becomes bargain day on the “hill”. Ah BUT, it is the waiting at the stop signs that is the hardest part of the journey. Running those lights and signs, however, most often ends up DEADLY. I suggest you keep two things working: your accelerator and your brakes—especially those brakes. Pushing ahead with only your horn working is showing very little wisdom in any circumstance. However, that is the “horn” blowing attitude of the Philippine Society.

I marvel that in such a society of pecking order that any bird ever gets off the ground and thus is born the actual classification of a “crab society” where all just go down together in order to stop anyone from gaining success and freedom.

I do not want this to become a long lecture on annoying behaviors but I do want to remind you to be mindful of TRUTH. No matter wherefrom truth flows, it IS and ultimately all the babbling and quibbling about any point is only important in its outcome IN TRUTH. Therefore, you can take all the data and information you can possibly consume and absorb—and process it so that the truth is utilized and the disinformation put aside after careful consideration. This is the way that proper and good conclusions are achieved. It doesn't matter if the TRUTH happens to flow through the games of Satan “itself” for that is the working advantage of the cunningly shrewd player at

work. You can, for instance, call me anything you like or choose—it won't make an iota of difference in the facts of who I AM.

Valerie just sent through a note as is quite usual on Mondays. She included something, however, that I would share with you because some people are paying attention and I am grateful.

From the RAINBOW MASTERS (Phoenix Journal):
“Millions shall perish for they will not see nor hear of the Truth nor of the warnings. They shall be placed anew on other places appropriate to their level of progression in the spirit growth. Because of the remnant that must remain, the Earth will be purified and raised to a new dimension and vibration frequency.”

We can only offer and tell you what the warnings might well be—you have to choose to use them and the information as you will. Be reminded that in every tsunami, for instance, first the SEA MOVES OUT UPON ITSELF RIGHT TO THE OCEAN BED ALONG THE SHORE. IT JUST HAPPENED RIGHT IN THE RECENT DISASTER. HOWEVER, MOST PEOPLE DID NOT RUN FOR HIGH GROUND BUT RATHER TO THE OCEAN ITSELF, WHICH PROMPTLY TURNED AND “ATE THEM”.

I suggest that you pick all you choose at who I might be and see if it serves you as well as simply accepting some good input and living to perchance experience another day. If the local “psychic” tells you to pack a basket and remain ready for instant departure to a safe place, I suggest you do it in the presumed events speculated to be ready to hit you.

I suggest you do more than that in studying your best move for the happening in point of probability, the length of time you might need to “survive” and have a couple of extra aspirins with you in case your neighbor forgets his.

I note that in Tehachapi, for instance, you have let your security housing go to heck. Oh well. There aren't many remaining to matter much except to the one with no place to run, along with nothing to eat or drink. Sometimes all you need is ten minutes as in the case of tornadoes. Ten minutes can make THE difference in life and death of that Space Suit of yours. Moreover, ten feet in mudslides or snow slides or raging rivers—is all it takes for safety vs. disaster. So, when the sea sucks out—run for the high ground. That giant sucking sound can be your last available breath—going the other direction.

You want specifics? No, you want titillation and in that fact we address what some of those more primitive parties of the “psychic” or “religious” nature have to say about the Nicobar incidents of recent days.

[QUOTING: “FEATURE”, REUTERS, January 16, 2005:]

CAR NICOBAR, India—The earth hasn't stopped shaking in India's Nicobar Islands because a giant boar-like animal that slept below has been turning on its sides.

Or, so believe a group of Nicobarese people, living in a relief shelter in Car Nicobar Island that was flattened by the giant waves.

Nearly three weeks after the tsunami slammed into India's eastern shores and killed over 15,000 persons, thousands are still struggling to come to terms with an unsettled sea and earth.

“Some people are saying these are the last days of the world,” said Zepha Edwin, as he gathered his family in a tarpaulin camp set among banana trees.

Deeply traumatized by the disaster, many islanders, including Stone Age tribes, who have been living on the far-off tropical paradise for thousands of years, are turning to age-old superstitions and religious rites to deal with the crisis.

Devout Hindu settlers from mainland India offer flowers and pour fresh water from brass [In the Philippines we find that these are called gold.] containers into the sea, praying to the gods to protect the pristine cluster of islands deep in the Bay of Bengal from the angry sea. [It worked, not one island was damaged even if changed a bit.]

The archipelago, which is 1,200 km from mainland India, has been hit by 130 tremors of more than 5.0 magnitude since the biggest earthquake in 40 years on Dec. 26 triggered the tsunami.

In the beginning, every tremor sent people rushing out of homes and hospitals. Some, haunted by memories of the tsunami, even climbed trees in relief camps.

But nerves are jangling less now.

Edwin said the elders in his devastated seaside village of Malacca believe the tremors will stop only after the giant animal living below the earth goes back to sleep. [Ah yes, but what if that pig has insomnia?]

In older times, the Nicobarese, who are the biggest tribe in the island chain of some 300,000 persons, would stamp a broom on the ground to pacify the animal within.

“People are going through tremendous trauma. It affects everyone, whether they are in the Stone Age or Metal age or in the high-tech age,” Anstice Justin said, the island’s chief anthropologist.

Justin said the primitive people on the islands, who are totally dependent on nature, also invoke a variety of gods for protection against the sea.

The hunter-gatherer Onge, who number less than 100, believe there are gods in the sea, beneath the earth and in the sky.

The Onge, who all survived the tsunami waves on their island of Little Andaman, are known to appease the gods by offering intestines of wild boar—which they hunt—wrapped in a leaf and placed on a tree.

Others smear their faces with white mud, which they believe will drive away evil spirits.

The elders of the Great Andamanese tribe, who have been evacuated to a special government-run guesthouse in Port Blair, are also known to invoke a goddess named Bligu who they believe used to descend from the sky on a giant ladder in the past.

The Great Andamanese are less than 50 in number.

“The elders among them will doubtless be praying to propitiate the goddess,” Justin said.

[END QUOTING]

* * *

So, what should you do, oh dear oh dear?

Well, I guess I will tell Dharma to get some pig tripe, wrap it in a banana leaf and put it on her balcony while calling on Bligu and painting her face white—oops, already white—well, there goes the neighborhood. I can guarantee it will work, though, because from the 25th floor of a “tested” building it will take REALLY DEEP WATER to drown these birds. But, readers, it is as good as anything the religious gurus offer for your saving or salvation. Rapture is but a ding-a-ling away!

May wisdom guide you occasionally along your way.

GCH

The Real Scandal: No Alert Notifications

As journalist-at-large Soltec wrote in the lead article for this issue, telecommunications technology is such that an email message can be received half a world away in a matter of four minutes—and the telephone is even faster. So why, oh why, was there no warning of the tsunami spawned by the “megathrust” earthquake on December 26, 2004?

We appreciate permission to reprint the following article by Austrian Academic Director of the European University Center for Peace Studies, Dietrich Fischer, who poses some hard questions and points to other excellent sources of information on this subject.

[QUOTING:]

THE TSUNAMI—THE REAL SCANDAL AND SOME LESSONS

By Dietrich Fischer, 1/16/05

The Hard Facts of the Scandal

Here is an article by TFF Associate Michel Chossudovsky that shows that “Washington was aware that a deadly tidal wave was building up in the Indian Ocean.”

It forms an important part of Richard Norton-Taylor’s article ... in the *Guardian*. There is also [a] news report by *MSNBC*, “Tsunami spares U.S. base in Diego Garcia”. And, finally, read Eric Wadell’s “Why weren’t they warned?”

These reports confirm that the U.S. military base on Diego Garcia in the Indian Ocean received a warning of the impending tsunami, but civilians did not. As we know now, the warning was not passed on.

This is a crime of unprecedented proportions and should be exposed.

Diego Garcia, as a U.S. Navy Base, is a member of the PACIFIC tsunami warning system, even though it is located in the Indian Ocean. Its members were informed by the National Oceanic and Atmospheric Administration (NOAA) in Colorado that there is a tsunami in the Indian ocean, but that there is no danger in the Pacific. (There is a 56-minute video by John Pilger about Diego Garcia, *Stealing a Nation*. The island has been central in the military operations against Afghanistan and Iraq).

This exposes the military’s justification of itself as “protecting lives” as a sham. Someone who shoots a policeman receives the death penalty in the United States. But if someone bears responsibility for a large portion of the estimated 200,000 who died in the tsunami by withholding life-saving information from those who need it, that is not now considered a crime, even though it is far more serious.

Someone who lost a relative or friend in the tsunami ought to file a lawsuit against those who knew but failed to inform the people in danger, including the commander of the military base in Diego Garcia, and perhaps the Pentagon.

There is little chance that they could win the case, but it would get a lot of publicity and help invigorate the debate about the role of the military in our world.

The following column argues that even without an official tsunami warning system in place in the Indian

Ocean, a warning could have been given in time to many of those who were affected.

THE LESSONS FROM THE TSUNAMI *Inter-Press Service, 1/4/05*

In an interview on *CNN* on January 2, the head of the National Oceanic and Atmospheric Administration (NOAA) in Colorado was asked the question on everyone’s mind: Why was no warning issued to the countries that were hit by a tsunami after NOAA detected the strong earthquake off the west coast of Sumatra on December 26? He responded that first of all, there was no warning system in place, there was nobody in those countries to receive the message. Second, NOAA did not have a precise model of the tsunami and could not have known how many need to evacuate.

It does not take an expensive warning system to suspect that this magnitude 9 earthquake under the sea might be followed by a tsunami, and that thousands of people’s lives along the densely populated coast lines facing the epicenter could be in danger. A magnitude 8.3 earthquake in Lituya Bay off the Alaskan coast in 1958 generated a wave sweeping up to 516 meters altitude, washing trees off mountain slopes, fortunately in an unpopulated area. True, not every earthquake under the ocean generates a tsunami, but the precautionary principle tells us to prepare for the worst in case of uncertainty.

Even if the job description of the scientists who detected the earthquake did not include warning those whose lives were in danger, it was their moral responsibility to do so. They may not have had phone numbers of government agencies in charge in the affected countries. But if they had informed anyone who could pass on the warning, even at night, including friends and relatives, they may have been able to reach some people in the affected areas who could have forwarded the information to others. If someone called ten others, and those in turn each called ten more, and so on, a billion people could be reached in principle in only nine steps. Even if some fail to pass on the warning, others will.

People without telephone can be warned by neighbors. Radio broadcasts and Internet messages will also be picked up by some, who can inform others in person and by phone. Helicopters could have beamed warnings by megaphone along the endangered shorelines.

Why nothing of that sort was done is incomprehensible.

The U.S. State Department could have contacted its foreign embassies in the region, and governments directly. Some governments did have information, but failed to act on it, fearing its adverse effect on tourism. It took the tsunami 3 hours and 52 minutes to reach Sri Lanka, less for Thailand, but plenty of time for a warning. There is enough blame to be shared.

It is not necessary to know precisely what areas are in danger and need to be evacuated. What mistake is more serious: going to higher ground when in retrospect it may turn out unnecessary, or to stay and drown?

For the people on the West Coast of Sumatra, time

for a warning was short, only about 20 minutes for Banda Aceh, one of the most affected areas. Moreover, some phone lines were destroyed. But people should have been educated that strong earthquakes are often followed by destructive waves. Those who were not seriously injured by the quake itself could have reached safer ground.

...It is welcome that many governments and individuals have made available over \$1 billion for the rescue effort. But that still represents only 1/10 of 1 percent of the world's annual military budget. Much more will be needed, and can be made available before more lives are lost to thirst, hunger, injuries and disease.

In this enormous tsunami disaster, over 155,000 people are already known to have died, tens of thousands are missing, and many more could die from diseases caused by contaminated drinking water. This immense suffering, which has been covered widely by the media, has for once vividly shown the magnitude of the structural violence that goes on unreported: an estimated 125,000 people per day, or 45 million per year, mostly children and the elderly, die needlessly from hunger and preventable diseases in our world of plenty. What consumers in the West spend for ice-cream, cosmetics and pet food would suffice to cover adequate nutrition and health care for all the people in the world who now lack it!

Let us redouble our efforts to end this horrible injustice.

[END QUOTING]

Dietrich Fischer <fischer@epu.ac.at> is Academic Director of European University Center for Peace Studies in Stadtschlaining, Austria, and Co-director of TRANSCEND, a peace and development network.

Next, let's turn to some excerpts from the writings of Michel Chossudovsky, Professor of Economics at the University of Ottawa and Director of the Centre for Research on Globalization which hosts the <www.globalresearch.ca> website, as referenced by Mr. Fischer.

[QUOTING:]

DISCREPANCIES IN THE TSUNAMI WARNING SYSTEM

By M. Chossudovsky, <www.globalresearch.ca>, 1/14/05

We are dealing with one of the most serious humanitarian disasters in recorded history. It is therefore essential that any failure or recorded discrepancy in the Tsunami warning system be the subject of careful analysis and investigation.

Magnitude of an earthquake is defined as:

"...a measure of the strength of an earthquake or strain energy released by it, as determined by seismographic observations. This is a logarithmic value originally defined by Charles Richter (1935). An increase of one unit of magnitude (for example, from 4.6 to 5.6) represents a 10-fold increase in wave amplitude on a seismogram or approximately a 30-fold increase in the energy released. In other words, a magnitude 6.7 earthquake releases over 900 times (30 times 30) the energy of a 4.7 earthquake—or it takes about 900 magnitude 4.7 earthquakes to equal the energy released in a single 6.7 earthquake!" (USGS <http://neic.usgs.gov/neis/general/glossary.html>)

"A Major Earthquake", according to the U.S. Geological Survey (USGS), has a magnitude of 7.00 to 7.99 on the Richter scale.

When an earthquake has a magnitude of 8.0 or more, it is categorized as "a Great Earthquake".

The magnitude 9.0 earthquake off the coast of Northern Sumatra on the 26th of December 2004, belongs to the category of "Great Earthquakes".

However, earthquakes with a magnitude of 9.0 or

above, on the Richter scale, are recognized as "rare great earthquakes" capable of causing major damage over an area in excess of 1000 km (Chile 1960, Alaska 1964, and west coast of British Columbia, Washington, Oregon, 1700) <www.pgc.nrcan.gc.ca/seismo/eqinfo/richter.htm>.

In this regard, the USGS has categorized the 26 December earthquake as "a megathrust earthquake": the fourth largest earthquake in the world since 1900.

This categorization of earthquakes is an integral part of the tsunami warning system, applied by different national and international bodies, including the Pacific Tsunami Warning Center (PTWC) based in Hawaii. The latter categorizes earthquakes according to their magnitude and bases its "evaluation" of the danger of a tsunami on the recorded magnitude on the Richter scale. It then emits a "bulletin", which includes an "evaluation".

Discrepancies in the Tsunami Bulletins

Although the complete archive of PTWC bulletins is not available, recent bulletins exhibit a consistent pattern in the evaluation of earthquakes in the Pacific basin as well as in regions adjacent to the Pacific. The "danger of a tsunami" is based on the parameters of the earthquake, namely its magnitude on the Richter scale, with one significant and noteworthy omission: the evaluation on the 26th of December 2004 constitutes an exception to this routine procedure, when compared to the pattern of reporting and evaluation of recent earthquakes, each of which is carefully categorized for the purpose of establishing a tsunami warning.

In other words, one would expect that the danger of a tsunami associated with an earthquake of magnitude 9.0 (i.e. 26 December 2004) would be evaluated according to the same criteria / standards as those pertaining to previous and subsequent earthquakes, all of which were of lesser magnitude.

But this is not what happened!

The fourth largest earthquake since 1900 was neither subject to routine categorization nor to "evaluation" with a view to establishing the "danger of a tsunami".

It is worth noting, in this regard, that three days prior to the M-9.0 earthquake, a M-7.9 earthquake was recorded with an epicenter off the South Pacific MacQuarie islands on the 23rd of December. The PTWC issued the following routine advisory:

"THIS EARTHQUAKE HAS THE POTENTIAL TO GENERATE A WIDELY DESTRUCTIVE TSUNAMI IN THE SEA NEAR THE EARTHQUAKE. AUTHORITIES IN THAT REGION SHOULD BE AWARE OF THIS POSSIBILITY."

Bear in mind that a M-9.0 earthquake is ten times greater in magnitude than a M-8.0 earthquake, to the extent that one would at least expect a similar statement to that provided in relation to the MacQuarie islands earthquake.

According to Columbia University's Earth Institute, the M-9 earthquake of December 26 released energy equivalent "roughly to the energy released in 700 million Hiroshima bombs. An event of this type and of this size is known as a 'megathrust' and occurs in this location approximately every few hundred years." Ironically, for earthquakes of significantly lesser magnitude (6.8 and above), the PTWC had, as a matter of routine, issued a tsunami warning, with the notorious exception of the M-9.0 earthquake of December 26.

Why?

December 26, 2004: Omission and Exception in the Pattern of Reporting

The following pattern can be observed in recent PTWC bulletins, for earthquakes in the Pacific Basin or in a region adjacent to the Pacific:

1. For an earthquake of M-6.6 on the Richter scale, the following advisory was issued:

ORIGIN TIME - 0626Z 01 JAN 2005
COORDINATES - 5.0 NORTH 92.2 EAST

LOCATION - OFF W COAST OF NORTHERN SUMATERA MAGNITUDE - 6.6)

THIS EARTHQUAKE IS LOCATED OUTSIDE THE PACIFIC. NO TSUNAMI THREAT EXISTS TO COASTLINES IN THE PACIFIC.

EARTHQUAKES OF THIS SIZE DO NOT USUALLY PRODUCE DESTRUCTIVE TSUNAMIS. HOWEVER SMALL SEA LEVEL CHANGES MAY BE OBSERVED IN THE VICINITY OF THE EPICENTER.

2. for an earthquake of M-6.8:

ORIGIN TIME - 1415Z 06 DEC 2004
COORDINATES - 43.0 NORTH 144.9 EAST
LOCATION - HOKKAIDO JAPAN REGION
MAGNITUDE - 6.8

NO DESTRUCTIVE PACIFIC-WIDE TSUNAMI THREAT EXISTS BASED ON HISTORICAL EARTHQUAKE AND TSUNAMI DATA.

HOWEVER - EARTHQUAKES OF THIS SIZE SOMETIMES GENERATE LOCAL TSUNAMIS THAT CAN BE DESTRUCTIVE ALONG COASTS LOCATED NEAR THE EARTHQUAKE EPICENTER. AUTHORITIES IN THE REGION OF THE EPICENTER SHOULD BE AWARE OF THIS POSSIBILITY.

Note: The same phrase has been used in previous warnings: "EARTHQUAKES OF THIS SIZE SOMETIMES GENERATE LOCAL TSUNAMIS THAT CAN BE DESTRUCTIVE ALONG COASTS LOCATED NEAR THE EARTHQUAKE EPICENTER" is a standard evaluation of the U.S. Geological Survey (USGS) applied to earthquakes of M-6.8 - 7.3 (see <www.fema.gov/emanagers/2004/nat050304.shtm>)

3. for an earthquake of M-7.9 (subsequently revised to 8.1):

ORIGIN TIME - 1459Z 23 DEC 2004
COORDINATES - 50.1 SOUTH 161.1 EAST
LOCATION - NORTH OF MACQUARIE ISLAND
MAGNITUDE - 7.9

THIS EARTHQUAKE HAS THE POTENTIAL TO GENERATE A WIDELY DESTRUCTIVE TSUNAMI IN THE SEA NEAR THE EARTHQUAKE. AUTHORITIES IN THAT REGION SHOULD BE AWARE OF THIS POSSIBILITY.

4. for one of the largest earthquakes in recorded history, M-9.0, initially assessed at M-8.0 (which is ten times lower than a M-9.0), no Tsunami warning was emitted:

ORIGIN TIME - 0059Z 26 DEC 2004,
COORDINATES - 3.4 NORTH 95.7 EAST,
LOCATION - OFF W COAST OF NORTHERN SUMATERA MAGNITUDE - 8.0)

THIS EARTHQUAKE IS LOCATED OUTSIDE THE PACIFIC. NO DESTRUCTIVE TSUNAMI THREAT EXISTS BASED ON HISTORICAL EARTHQUAKE AND TSUNAMI DATA.

In other words, there was no routine statement in the case of a M-9.0 earthquake, which had originally been identified as an 8.0 on the Richter scale. As mentioned earlier, the routine statement should have been similar to the MAGNITUDE- 7.9 of 23 DEC recorded North of MacQuarie.

Moreover, the bulletin was released at 01.14 GMT after the Tsunami had already hit the Sumatra coastline.

There were two subsequent bulletins released by the PTWC, the second did not acknowledge the existence of a Tsunami in the Indian Ocean.

The second bulletin was issued at 02.04 GMT on the 26th. It revised the Magnitude to 8.5 and stated that there "is the possibility of a Tsunami near the Epicenter". This statement is mistaken. By 02.00 GMT, the Tsunami was no longer in the realm of "possibility", it had already hit the coasts of Indonesia, Malaysia,

Thailand and Myanmar.

MAGNITUDE - 8.5

EVALUATION: REVISED MAGNITUDE BASED ON ANALYSIS OF MANTLE WAVES. THIS EARTHQUAKE IS LOCATED OUTSIDE THE PACIFIC. NO DESTRUCTIVE TSUNAMI THREAT EXISTS FOR THE PACIFIC BASIN BASED ON HISTORICAL EARTHQUAKE AND TSUNAMI DATA. THERE IS THE POSSIBILITY OF A TSUNAMI NEAR THE EPICENTER.

The third bulletin issued the following day on the 27th at 15.35 GMT acknowledges the tsunami and revises *ex post facto* the Magnitude from 8.5 to 9.0.

MAGNITUDE - 9.0

EVALUATION: SOME ENERGY FROM YESTERDAY'S TSUNAMI IN THE INDIAN OCEAN HAS LEAKED INTO THE PACIFIC BASIN... PROBABLY FROM SOUTH OF THE AUSTRALIAN CONTINENT. THIS ENERGY HAS PRODUCED MINOR SEA LEVEL FLUCTUATIONS AT MANY PLACES IN THE PACIFIC.

The Need for an International Inquiry

Why was the routine practice of evaluating the dangers and consequences of a Tsunami not followed on December 26th?

Why was the routine practice of establishing the danger of a Tsunami not followed on that particular day (26 December 2004), when in previous and subsequent bulletins, the danger of a tsunami was consistently evaluated in relation to earthquake magnitude? We are dealing with one of the largest earthquakes in recorded history.

A detailed investigation/inquiry under international auspices as well as by the countries affected by the tsunami, should be established without delay with a view to investigating this matter.

[END QUOTING]

Michel Chossudovsky is Professor of Economics at the University of Ottawa and Director of the Centre for Research on Globalization which hosts the <www.globalresearch.ca> website. He is the author of The Globalization of Poverty and the New World Order, and is a contributor to the Encyclopaedia Britannica. His writings have been translated into more than 20 languages.

In a prior article posted immediately after the December 26 earthquake and tsunami and updated on December 30, Professor Chossudovsky provided additional background information.

[QUOTING:]

FOREKNOWLEDGE OF A NATURAL DISASTER:

By M. Chossudovsky, <www.globalresearch.ca>, 12/29/04

...The U.S. Military and the State Department were given advanced warning. America's Navy base on the island of Diego Garcia in the Indian Ocean was notified.

Why were fishermen in India, Sri Lanka and Thailand not provided with the same warnings as the U.S. Navy and the U.S. State Department?

Why did the U.S. State Department remain mum on the existence of an impending catastrophe?

With a modern communications system, why did the information not get out? By email, telephone, fax, satellite TV... ?

It could have saved the lives of thousands of people.

The earthquake was a Magnitude 9.0 on the Richter scale, among the highest in recorded history. U.S. authorities had initially recorded 8.0 on the Richter scale.

As confirmed by several reports, U.S. scientists in Hawaii had advanced knowledge regarding an impending catastrophe but failed to contact their Asian counterparts.

Charles McCreery of the Pacific Warning Center in Hawaii confirmed that his team tried to get in touch with

his counterparts in Asia. According to McCreery, director of the National Oceanic and Atmospheric Administration's center in Honolulu, the team did its utmost to contact the countries. (The NOAA in Hawaii's Report at <www.noaa.gov/stories2004/s2357.htm>).

"We started thinking about who we could call. We talked to the State Department Operations Center and to the military. We called embassies. We talked to the navy in Sri Lanka, any local government official we could get hold of," Hirshorn said. "We were fairly careful about who we called. We wanted to call people who could help." (quoted in <http://the.honoluluadvertiser.com/article/2004/Dec/29/ln/ln05p.html>)

We Did Not Know!

...Nine (9.0) on the Richter scale: The Director of the Hawaii Warning Center stated that they did not know that the earthquake would generate a deadly seismic wave until it had hit Sri Lanka, more than one and a half hours later, at 2.30 GMT (see Timeline below).

"Not until the deadly wave hit Sri Lanka and the scientists in Honolulu saw news reports of the damage there did they recognize what was happening... 'Then we knew there was something moving across the Indian Ocean,' said Charles McCreery." (quoted in the *NYT*, 28 Dec 2004).

It is impossible that the movement of the seismic wave could have gone unnoticed following the initial devastating impact of the tidal waves in Aceh and North Sumatra immediately after 1.00 GMT on the 26th.

Moreover, according to expert opinion, known to the scientists who were monitoring seismic activity, an earthquake of more than 6.5 on the Richter scale has the potential of triggering a tsunami. In other words, there should have been no hesitation by scientists or government officials on the likely impacts of an earthquake which was initially assessed at 8.0 on the Richter scale.

Moreover, the Hawaii Center's statement is at odds with the Timeline of the seismic wave disaster, which no doubt was also being monitored on a continuous basis, once it hit the Indonesian and Thai coastlines by satellite imaging using the Global Positioning System (GPS). These satellite images are available to a number of agencies including the U.S. military and intelligence. It should be noted, however, that the energy of a tsunami is transferred through open water, it is therefore not easily detectable in the Ocean.

It is the extreme seismic activity which provides advance warning prior to the tsunami reaching the coastline. But as pointed out above, the tsunami had already hit the Indonesian coast shortly after 01.00 GMT:

...Thailand was hit almost an hour before Sri Lanka and the news reports including photographic evidence were already out. Surely, these reports out of Thailand were known to the scientists in Hawaii, not to mention the office of Sec. Colin Powell, well before the tidal wave reached Sri Lanka.

"We wanted to try to do something, but without a plan in place then, it was not an effective way to issue a warning, or to have it acted upon," Dr. McCreery said. "There would have still been some time—not a lot of time, but some time—if there was something that could be done in Madagascar, or on the coast of Africa."

The above statement by Director of the Hawaii Center is also inconsistent.

The seismic wave reached the East African coastline several hours after it reached the Maldives islands. According to news reports, Male, the capital of the Maldives was hit three hours after the earthquake, at approximately 4.00 GMT. By that time everybody around the World knew.

It is worth noting that the U.S. Navy was fully aware of the deadly seismic wave, because the Navy was on the Pacific Warning Center's list of contacts.

The Military also has its own advanced systems including satellite images, which enables it to monitor in a very precise way the movement of the seismic wave in real time. In other words, in all likelihood the U.S. Military had information on an impending catastrophe.

Moreover, America's strategic Naval base on the island of Diego Garcia had also been notified. Although directly in the path of the tidal wave, the Diego Garcia military base reported "no damage".

"One of the few places in the Indian Ocean that got the message of the quake was Diego Garcia, a speck of an island with a United States Navy base, because the Pacific warning center's contact list includes the Navy. Finding the appropriate people in Sri Lanka or India was harder." (*NYT*, 28 Dec 2004, emphasis added)

Now how hard is it to pick up the phone and call Sri Lanka?

According to Charles McCreery, director of the Pacific Tsunami Warning Center:

"We don't have contacts in our address book for anybody in that part of the world."

..."We didn't have a contact in place where you could just pick up the phone," Dolores Clark, spokeswoman for the International Tsunami Information Centre in Hawaii said. "We were starting from scratch."

The Issue of the Ocean Sensors Is a Red Herring

...We are not dealing with information based on Ocean sensors: the emergency warning was transmitted in the immediate wake of the earthquake (based on seismic data). The earthquake took place at 00.58 GMT on the 26th of Dec. The report was transmitted to The State Department and the U.S. Navy following the earthquake.

With modern communications, the information of an impending disaster could have been sent around the World in a matter of minutes, by email, by telephone, by fax, not to mention by live satellite Television.

Coastguards, municipalities, local governments, tourist hotels, etc. could have been warned.

According to Tsunami Society President Prof. Tad Murty of the University of Manitoba:

"[T]here's no reason for a single individual to get killed in a tsunami,' since most areas had anywhere from 25 minutes to four hours before a wave hit. So, once again, because of indifference and corruption thousands of innocent people have died needlessly." (*Calgary Sun*, 28 Dec 2004)...

Key Questions

1. Why were the Indian Ocean countries' governments not informed?

Were there "guidelines" from the U.S. military or the State Department regarding the release of an advanced warning?

2. Did U.S. authorities monitoring seismographic data have knowledge of the earthquake prior to its actual occurrence at 00.57 GMT on the 26th of December?

The question is whether there were indications of abnormal seismic activity prior to 01.00 GMT on the 26th of Dec.

3. Why is the U.S. military Calling the Shots on Humanitarian Relief?

Why in the wake of the disaster is the U.S. military (rather than civilian humanitarian/aid organizations operating under UN auspices) taking a lead role?

[END QUOTING]

As covered in World News Insights in this issue, Indonesia has asked the U.S. to remove its troops from Indonesia within 90 days. As Joe Vialls reported, many of these troops had just completed a 12-month training program, training for humanitarian relief, coincidentally (?).

The Mystery Of Satan & The Devil (Part Five)

For the key distinction between Judaism and Zionism from a goodly Jewish perspective, readers are directed to <www.JewsAgainstZionism.com>. With that disclaimer, let us continue:

Death came to our tree after the parasitical Jew Devil got control of our Press then radio and television through which he put forward subtle hidden suggestions for us to follow and arrange ourselves in the Beast System for our own destruction, yet we blamed it all on an intangible Devil standing behind us while silently whispering inaudible instructions. *James* 1:14, 15, however, proves those instructions are our own evil thoughts emanating from lusting after the slimy spiritually and mentally-sabotaging baubles (trinkets) dangled before our eyes by the Jew Devil.

The only power a Jew Devil has over our people is FEAR on our part of what the Jew MIGHT do to us personally or to our national finances and economy. In the political, he uses blackmail to create fear of what he might do to one in office who has erred in judgment in the past and is ashamed of it. The Jew Devils discovered the error, then through subtle propaganda they caused us to vote the man into office where the Jew Devils use FEAR to compel the man to do the very bidding of the Devils for the ultimate destruction of our Nation in accordance with Jewry's protocol No. 8 which says it is done "in order to make them defend our interest to their last gasp".

Resist the Devil: hate him because of his crawly parasitical evilness. Accuse him publicly of being a traitor. Openly oppose his subversive blackmailing, murderous methods of boycotting, ransacking, sabotaging and destruction of our people and Nation. Stand up like men, you Congressmen in Washington, D.C.! You Congressmen who are being blackmailed into voting the Jew Devil's ticket to abolish the United States, our *Constitution*, our Flag, our Armed Forces and force our people into a mongrelized world of heathens in which our sisters, mothers, wives and sweethearts would become common community property subject to the whims of any Asiatic beast, stand up like men! Go on the radio and tell our people: "Yes, I have been in error in the past. I was ashamed of it, but I believed I could erase it through service to our Nation. However, I have increased the error by betraying our Nation because I have been blackmailed by Jews, and the fear of being removed from office has kept me silent and a traitor. My fear of the Jew is now past. My only fear now is anxiety that our Nation will be destroyed. I have work to do in Congress to prevent as far as my ability the destruction of our Nation. If you have lost confidence in me because my secret has been revealed by blackmailing Jew commentators masquerading as patriotic citizens, it is your constitutional right to remove me in the next election. Yet, as long as I remain in Congress I shall devote my entire time and ability in efforts to preserve our Nation."

The Jew Devil could do nothing about it. Your fear of him would be broken, his power over you would be gone and when the work to save America is finished, our people would have forgotten long ago about your secret, or had forgiven it out of due respect of a job well done.

The Jew Devil is the most nauseating coward ever to stand amidst men. It is his Mark of Cain, and the

flight of the Cockatrice and Crocodile in *Isa.* 14:29 and 27:1. He has no more courage than a sick chicken. His apparent bravery is your FEAR of what he MIGHT do. With the truth going out over the radio, television and Press telling our people that Jewry and Communism are synonymous; Jewry, alone pushed us into the Revolutionary War, the War of 1812, the Civil War, a Jew assassinated President Lincoln, pushed us into World Wars I and II and the so-called police action in Korea in order to destroy our Christian faith in God and our race; the truth that Jews murdered James Forrestal, General George S. Patton and Walton H. Walker because they were in cognizance of Jewry's communistic conspiracy to destroy Christendom and they were contemplating on telling our people about it; the truth that Jews in Washington, D.C. working hand in glove with Jews in the Kremlin ordered General Douglas MacArthur stripped of his command because he was winning the war in Korea which the Jew Devil does not want us to win.

With that truth going into every home in America on the radio and television, Jewry would not dare to murder another patriotic Christian American or blackmail our Press into further silence.

The power vested in the United States Congress by the *Constitution of the United States* is real POWER. It is a portion of the "hands" of the living creatures in *Ezek.* 1 and *Rev.* 4 and the "power of the holy people" in *Dan.* 12:7. Yet, today, the "hands" are down and the Jew Devil has all but destroyed the power. The minor power allowed our people by the blackmailing Jew Devil is a portion of that real power. Yet, in the face of Jewry's power over the United States government, Jewry's strength seems greater. However, Jewry's apparently great power is absolutely nothing. It is a false power based on lies and fear, and they rely entirely on lies and fear for their domineering position. Jewry admits they are a nation within our Nation and a state within every state of our Union, and now is even a colonial Power. The colony is the illegitimate State of Israel. Therefore, Jewry's very presence in the United States directly violates Article IV, Section 3 of the *Constitution of the United States*. Therefore, why tolerate the Jew Devil's blackmailing subversiveness any longer? By Divine Law and the Law of the United States *Constitution* they should be disenfranchised then kicked out of our Nation. The little power remaining in the hands of the United States Congress and our people in general and Jewry's false power is precisely what Christ Jesus is speaking about in *Matt.* 13:12 which says: "For whosoever hath, to him shall be given, and he shall have more abundance, but whosoever hath not, from him shall be taken away even that he hath."

There will occur before the end of 1953—the end of Jacob's Trouble brought down on us by the Jew Devils Era of Kali in which they purpose to extirpate the Kingdom of God (Yahweh) from the face of the Earth in accordance with *Psalms* 2:1-4 which says: "Why do the heathen rage, and the people imagine a vain thing? The kings of the Earth set themselves, and the rulers take counsel together, against the Lord, and against His anointed, saying, Let us break their bands asunder, and cast away their cords from us. He that sitteth in the heavens shall laugh: the Lord shall have them in derision."

"Bands" in that Psalm is *moser*, in Hebraic. It means, fetter. Cord, is *aboth*, band, or cord. Form is *panim*, in the face of. Those fetters, bands and cords are one as the cable tow tied around the neck of the lion of Judah. It is held in the hands of Michael, the Archangel of Divine Truth, the Great Prince of Israel, in order to restrain the lion. It is the shock-absorber for David's Throne. It is the blood-line of Israel in Manasseh's great people. Manasseh is the Anglo-Saxon-Celtic, Scandinavian and Nordic people in the United States of America. David's Throne is the Throne of England, and the lion is the Royal House of Britain.

In *Psalms* 2:1 the word "people" is *leom*, nation. In 2:2 Earth is *erets*, a certain land. That certain land and the nation is Jewry's Soviet Union and all countries behind Jewry's "iron curtain" in which a Jew is at the head of every government. Those heathenish Jews are the consummation of the ten kings of *Rev.* 17:12, 13 as the power of the Jew Beast of Desolation crushing in his coil Hungry, Lithuania, Estonia, Latvia. Czechoslovakia, Poland, Rumania, Bulgaria, China-Manchuria and Mongolia. Those Jews have one mind, and give all their power and strength to the Beast. All are conspiring against the Lord and His anointed of Israel. While drawing the last string taut, the Jew Devil believes he cannot fail and he walks about America like a roaring lion seeking to devour everyone in cognizance of his conspiracy to destroy Christendom and rear on the debris the World Empire of THE Devil Prince Abdul Baraba Baha, as *I Peter* 5:8 prophesies.

I John 3:8 is confirmation of *Heb.* 2:14 and all of Israel's prophets in the *Old Testament* that Jesus Christ came into the material plane to make a new covenant with the children of Israel in order for us to destroy the Devil and his race of Jews. In verse 10 of *I John* it says, "In this the children of God are manifest, and the children of the Devil." Now that "children" is *teknon*, in the Greek. It means one born, and it further proves our people are the children of God and Jewry is the children of the Devil, inasmuch as an Israelite cannot be born of the Devil unless a Jew is his father or mother, yet even then, the mongrel is not an Israelite, because the Satanic deadness of the Jew blasts out of the child everything human. It is no more possible for a mongrel of a non-Jew and Jew parentage to have a spiritual body than you can parallel a direct current generator with an alternator and expect to generate normal power: The direct current and the alternating current are diametrically opposite, and any attempt to parallel them will inevitably result in a destructive explosion. Relative conditions are in humans and Jews: The cosmic force of a human is direct and positive. In a Jew, it is diametrically opposite and electronic instruments prove it, and also prove the force in Jews is destructive. When one attempts to parallel the two forces in mongrelization the direct force of the human imparted in the conception is blasted by the destructive force of the Jew. Electronic instruments also prove the latter and it is further manifested in the mongrel child by the bone marrow being incapable of generating red blood corpuscles, and the ability to generate red blood came from the non-Jew parent. If the mongrel and his subsequent line withdraw within the Satanic race, that ability to generate red blood will gradually become weaker and in 360 years that line will perish.

That mongrel is a Devil and one born of THE Devil. An Israelite cannot be spiritually-born of the Devil because Israel's children are born into this manifest world spiritually-alive and a child of God; ... but Jewry is born spiritually-dead from the womb, and there is no spiritual salvation for him.

In *Rev.* 2:10 the Devil was Artabanus II. Down the centuries he has been the Wandering Jew Devil of *Rev.* 12:12. In 35 A.D. his seat of conspiracy against God and man was Pergamos, Greece. He remained there until 79 when God chased him out by destroying the city

with the earthquake He set in motion by the eruption of Mt. Vesuvius. He then moved to Byzantium (Constantinople) where he remained until 1552 then moved to Madrid Spain. In 1790 he went from Madrid to Paris, France where he remained until 1814 then moved to London England. In 1871 he left London and went to Berlin, Germany where he lived until 1881 then moved to St. Petersburg, Russia. He remained in the latter city until December 1927 and January 1928 he moved to the United States of America and inscribed his signature of a black king cobra's head on houses on Flushing Avenue, Brooklyn, N.Y. It is not known by us whether or not he is still alive, yet we do know the current Devil is Prince Abdul Baraba Baha as THE Devil or his co-regent. Whatever position Prince Abdul occupies he claims to be Almighty God and is the king of fierce countenance in *Dan.* 8:23-25, the Jew god in *Zech.* 8:23, the king of all Jew anti-Christians in *Matt.* 24:24; the current Jew god in *John* 5:43; the man of sin, the embodiment of all evil in *II Thess.* 2:3-9 and the Dragon in *Rev.* 13:13-18.

Now the "devils" cast out of the non-Jews in the New Testament record by Jesus Christ and His disciples were manifest as unclean spirits of pernicious habits, epilepsy, insanity, deafness, blindness and dumbness. In most instances the record makes that delineation quite distinct. In the Greek, those devils are *daimonion*, which means demon, Shades. We have observed the Shades relative to Beelzebub, yet the Devil in *John* 10:20, 21 is one of them. The "Jews" in verse 19 are Cainites, which we will prove in Book IV of this study when we take the "Jew" apart in order to show the difference between an Israelite who was a Jew only because he made a curse of his worship in the sight of the nations and a Jew by blood who was, and is, cursed by God. In *John* 10:20 Christ Jesus is accused by the Cainite Jews of being the reincarnation of a Rephaim (Shade), yet the Israelites, as the "others" in verse 21 say: "Can a Rephaim (Shade—devil) open the eyes of the blind?" In many sections of Anglo-Saxondom today, that type of devil is known as a haunt, or ghost. Yet in ancient Palestine the Israelites had been subject to the Cainite Luciferian Doctrine so long they believed the shady devils were disembodied spirits seeking humans to live in.

The places where the demons of unclean pernicious habits, epilepsy, insanity, deafness, blindness, and dumbness are found are: *Matt.* 4:24; 7:22; 8:16, 28, 33; 9:32-34; 10:8; 11:18; 12:22, 24, 27, 28; 17:18; *Mark* 1:32, 34, 39; 3:15, 22; 5:15, 18; 6:13; 7:26, 29, 30; 9:38; 16:9, 17; *Luke* 4:33, 35, 41; 7:33; 8:2, 27, 30, 33, 35, 36, 38; 9:1, 42, 49; 10:17; 11:14, 15, 18-20; 13:32; *John* 7:20; 8:48, 49, 52; *I Cor.* 10:20, 21; *I Tim.* 4:1; *James* 2:19; and *Rev.* 9:20 says we should not worship the Shades (devils).

One illustration will suffice to show the nature of those devils. We select the record in *Matt.* 8, *Mark* 5 and *Luke* 8 where an insane man is cured by Jesus Christ bringing to bear His Holy Ghost of Creative Energy which purged the devils and they entered a herd of hogs which ran into a lake and drowned. The man was so mad he was a pernicious beast. The Greek for the devil in *Mark* 5:15, 16, 18 is *diamonizomai*, to be demonized. That goes to show the man had been hypnotized into insanity and he acquired habits of a rabid animal. The power of demonizing in that era was handled only by Cainite Jews making use of black magic. In verse 12 the devils are *daimon*, deified spirits, which shows they were spirits of religious fanaticism. They were truly devils and spiritually-tangible in their dimension as the man was materially-tangible in this world. It is denoted in *Matt.* 8:29 where the devils ask Jesus Christ: "Art thou come hither to torment us before our time?" That word "torment" is *basanizo*, in the Greek. It means pain. The "time" is *kairos*, opportunity. It graphically shows the opportunity in which Christ would have to pain those devils of insanity would be when He

passed back into the dimension of spirit where the Divine radiation from His Being would pain those living in the lowest depths of the dimension of spirit to escape the light of God. That spiritual region is shown in *Luke* 8:31 as the "deep", which is *abussos*, bottomless pit.

The conversation of those demons is manifest through the voice of the man who had delusions of being the reincarnation of several so-called gods he formerly worshipped while under the influence of the Luciferian priests of the cults in which he had been snared. The manifestation of Christ giving the demons permission to enter the hogs can be observed today: When hogs are frightened, they utter a hoarse sound for an alarm, and the sows and pigs will scamper for cover, yet the boars will stand and attack anything in sight. A human uttering the same sound can obtain the same results, and if the boars cannot discover the source of the sound they, too, become frightened and will flee away with the others. That sound made by humans, obviously, sets in motion spiritual energy of sufficient strength and wave length which reacts on the brains of the hogs and excites them into momentary madness, because, if prolonged at frequent intervals, domesticated hogs become so excited they will even crash through barbed-wire fence totally oblivious of the pain produced by the rending barbs. Jesus Christ uttered the coughing sound to demonstrate to the man that his demons were only a mental condition. When the man saw the hogs fleeing away and were drowned, he collapsed with fatigue, and Christ then restored sanity to the man by bringing His Holy Ghost of Creative Energy to bear on the wounded brain cells which restored them to their former healthy condition. A mild form of the healing today is known as "faith healing", yet some of the "healers" are in league with the Devil even though they cure the patient in the Name of Jesus Christ. That is done through black magic, and when the person is cured by what he believes is the power of Christ, his faith is gradually perverted through the philosophy of the cult, and the person becomes a thorough Luciferian disciple believing in a deity diametrically opposed to Christ's Doctrine. Thus, by Satan falsely curing in the Name of Christ, the Devil drags another human away from Christ and spiritually-kills him if he was not already spiritually-dead. The doctrine of the cult is the distinguishing mark of whether it is Christian or Luciferian masquerading as Christian.

In the *Old Testament* THE Devil when recorded under that name appears only at *Deut.* 32:17 and *Psalms* 106:37 in which the word "devil" is Shed. It means the Destroyer. It shows the theory of an intangible Devil come into usage in the fourth century when occultism was first introduced into the Church by Jews, because our ancient progenitors knew the Devil was tangible. The Devils were called by their clan names of Emin, Zumzummim, Anakim, Amalekites, Akkads (accads). They were known as the Nephilim and Rephaim most of whom were giants, yet others were the size of humans who have come down to us today as the living-dead, Shades, whom we know as Jews. In *Lev.* 17:7 and *II Chron.* 11:15 the word "devils" is *sair*, in Hebraic. It is nothing more than a hairy goat.

In conclusion, the devils in *Rev.* 16:14 and 18:2 are damons, defiled spirits.

(Note: I believe the author is wrong on *Revelation* 18:2 as "foul spirit" and "unclean and hateful birds" are idioms meaning tangible "Jews". Many times in Scripture, "Jews" are referred to as "birds".)

Those in 16:14 are Anarchistic-Bolshevism, Communistic-Socialism and Fabianism which came out of the mouth of the Red Dragon, or Serpent, of Jewry, out of the mouth of the Jew Beast System and out of the mouth of the False Prophet who is Jewry's current god, Prince Abdul Baraba Baha, who is prophesying that, before the end of 1953 he will destroy God's Kingdom of Israel and rear on its debris his Satanic World Empire.

The unclean defiled spirits in *Rev.* 18:2 are the above Jewisms and every species of bats, owls and vultures evilness born, hatched and reared in the spiritually-dark belfry of the upside down Synagogues of Satan, namely Jewry's head. They exist in the lowest depths of the dimension of spirit in order to escape the Light of Christ, because if they were to come up to the high planes of spirit they would perish in the Divine radiation, which would be manifest in the material plane by Israel repudiating and totally rejecting Jewry's abominable evilness.

However, *I Cor.* 2:14 seems to declare our race is naturally evil. The word "natural" in that verse, however, is *psuchikos*, in the Greek, meaning, sensuous. Thus, St. Paul says a sensuous person receives not things spiritual that are the Spirit of God, because such are foolishness to him. A sensuous person in our race, however, at this hour on God's time table, desires things material above things spiritual, only because we have been so mercilessly mentally debilitated by the Satanic race of Jews until the average person does not know how to think about anything concerning the destiny of our race and Nation. Purge Christendom of that parasitical counterfeit race and *Jer.* 31:33, 34 would be consummated with ease, because the dormant spiritual seed put in our race by God would automatically sprout and draw our race as one person to God, and evilness would die of starvation. God's Kingdom would then be ready for consummation in which our people would be changed in the twinkling of an eye to tangible, visible, living spirit as Paul proves in *I Cor.* 15:51-56, which cannot be consummated as long as there is sensuousness in our House, because that condition will have to come through racial spiritual discernment.

Now as we have observed in this study, one has no Biblical authority to further believe the Devil is purely a spiritual being. The Bible proves he is tangible, and the word "Satan" is applicable to humans in opposition to good or evil. The word "Devil" (*Diabolos*, Shed), however, can be applied only to THE Devil and his race of counterfeit humans. Nowhere in the *Bible* is it recorded that God created the Devil. However *Ezek.* 28 alludes to the fact that God created Lucifer. We have observed Lucifer was the eighth good archangel. God created him even though He knew Lucifer would rebel against Divine Law and become His adversary in the spiritual plane then transpose himself to the material plane deliberately to create chaos in human relations in order to get revenge against God by destroying man. Then why did God create Lucifer? Some say he was created in order for God to obtain a victory, and without a Devil, victory could not be obtained. No! That was not the reason God created Lucifer! There was no need for a victory, because there was perfect harmony in the spiritual and material planes before God created Lucifer. Desire on God's part to destroy that peace and harmony by creating a Devil to do it at the expense of pain, torture, tears, sorrow and death unto man, a creature of God's hand, in order to obtain a victory was not God's purpose for creating Lucifer. Instead, the four colored races (symbolized in *Gen.* 2:10-14 as four rivers) were created materially-perfect, yet to consummate the Kingdom it was essential to "polish" man and make him spiritually-perfect in order for him to be spiritually and mentally-synchronized with God so he would be living, tangible, spiritual light in the image of God. The "polishing" had to be composed in three stages. Lucifer was created for the governor of the first stage. However, he failed to accomplish anything, and after being cut off from God and cast into the lowest depths of the dimension of spirit he transposed himself from the dimension of spirit as a tangible material Beast then enslaved the four colored races and exalted himself as God. That Beast was the Devil who proposed to prevent God from consummating His Kingdom by destroying

God's influence in human relations by destroying everyone not worshipping him. God then set in motion the second phase of His Great plan for man's ultimate destiny and created our Adamic progenitors spiritually-perfect from the start. They were the first White men (Adamites) on Earth. The Devil then destroyed that portion of God's plan, yet God (Yahweh) created out of the Adam our Israelite progenitors and sent His Christ-Son of Righteousness into that House to start the third phase of the plan, at the end of which God's Kingdom will be consummated a tangible spiritual reality by Israel doing God's work in human relations and destroying the Devil.

II Esdras 4:36, 37 shows why God permitted our former Jew-imposed idea of the Devil to stand—the “polishing” of man required time, and He measured those “times” according to number, and until the “times” had run their course, our former idea of the Devil served God's purpose to teach Israel doctrine for reproof unto righteousness, which was a portion of the work of Israel's Master Masons building the Temple of God and polishing the outer spiritual casing stones for the edifice.

(At this point, it is necessary to break into this treatise to make some explanations, for the author goes somewhat astray with his comments. In order to see what his errors are, here, I will continue to quote him word for word. He has done a tremendous job so far pointing out the Cain satanic connection. However, what he is about to say almost destroys his whole presentation which otherwise is quite good.)

Despite those facts, however, perhaps one is not yet convinced, and still believes the Devil is an angel, and Christ Jesus says the angels are sexless. Therefore, it would have been impossible for the Devil to mongrelize with women in order to father children for an exclusive race of destroyers. Perhaps one will also point to *Eph.* 4:9 which says Christ Jesus descended into hell after death in order to conquer the Devil, then after gaining the victory He preached to the imprisoned spirits of the people drowned in the deluge in 2345 B.C., which *I Peter* 3:19, 20 tells about. Again one may point to *Eph.* 2:2 and declare there is proof positive that the Devil is the prince of the air above the Earth whose power Christians are wrestling with as recorded in *Eph.* 6:12. Again, one may go back to the Serpent in *Gen.* 3 and declare Adam named the tempter of Mother Eve, serpent, because he was more subtil [sic?] than any beast of the field which the Lord had created. The word “any” makes him a BEAST of the field. He (Nachash), therefore, was named after the Serpent, the Devil, because of his craftiness. Therefore, the serpent in *Gen.* 3 is a snake given the faculty of talking in human voice. Again, one may point to *Isa.* 45:7 which says God creates evil and *Isa.* 54:16 says He created the waster to destroy, and *Ezek.* 28 says God created the Devil.

First, let's consider the statement here that the angels are sexless. This may be true when they are in their own dimension or sphere, but when they transfer to the physical tangible realm they are always recognized as men in Scripture. There is not one case, ever, where they appeared as women. *Hebrews* 13:2 says: “Be not forgetful to entertain strangers: for thereby some have entertained angels unawares.” If you were to meet an angel, you would not be able to distinguish him from an ordinary man. The angel would have all the characteristics of a man, therefore, he would not be sexless and it isn't too absurd to understand that Satan was very capable of seducing Eve and fathering a satanic race which we have in Cain and his descendants. Secondly, when Yahshua the Messiah descended into hell (the grave) he did not preach to “spirits of the people drowned in the deluge”, but to Israelites who had died before his death and resurrection. You can read where many were resurrected and were wandering around Jerusalem at that time, *Matthew* 27:52-53: “And the

graves were opened; and many bodies of the saints which slept arose, And came out of the graves after his resurrection, and went into the holy city, and appeared unto many.” Those drowned in Noah's flood were *mamzers* (mixed-breeds). Thirdly, when it is speaking of Satan being the prince and power of the air, it is not talking about the atmosphere which surrounds the Earth. It is talking more of a political air. Fourthly, The beast of the field was Satan and he was called a “serpent” because it isn't possible to get any lower than that, and it wasn't a talking snake! Now we will get back to B. F. Jackson's article:

Now the purpose of this expose is to construct a beacon in the jungle of Satanic confusion in order to illuminate the inner court of God's Temple during the darkness of the death watch from 2400 midnight, until 0600 (6:00 a.m.) at the dawn of the New Age (22 Jan, 1952 to Aug. 1953 (*Joel* 2:2). Therefore, let us observe the above citations which may bring on disagreements and we remain in darkness until the Devil and his Rephaim strike us down without us knowing what hit us.

Eph. 4:9 says: “Now that He (Christ) ascended, what is it but that He also descended first into the lower parts of the Earth?” Now “tis” is the Greek for that word “what.” It means, who. But, is *ei*, if not. Descended is *katabaino*, come down. First is *proton*, at the beginning. Into is *els*, unto. The first “the” is *hoti*, that. Lower is *katoteros*, lowest. Parts is *meros*, portion. The second “the” is *tauten*, this. Earth is *ge*, world.

Thus, the original translation of *Eph.* 4:9 is: “Now that He ascended, who is it if not (He) that also came down at the beginning unto that lowest portion of the world? He who descended (came down) is the same also that ascended up far above all heavens, that He might fill all things” (verse 10).

The lowest portion of this world was the two-tribed House of Judah as the heel of the seed of our Mother-spirit (*Gen.* 3:15) bruised by the head of the Serpent race who was the Devil. Artabanus II, who bruised the Israelite House of Judah through the tyranny of the Cainite-Akkad-Idumean Herodian Dynasty who usurped power over Judah in 37 B.C., and relegated that portion of God's Kingdom of the lowest position of any nation in the Roman Empire in order to spiritually and mentally-debilitate them so thoroughly they would be unfit for Yahweh to send His Christ-Son of Righteousness into that House in order to re-organize His Kingdom on Earth to destroy the Devil and his kingdom.

Then, *I Peter* 3:19 says: “By which also He went and preached unto the spirits in prison.” *Poreuomai* is the Greek for the word “went”. It means to pass on. Preached is *kerusso*, a herald. The is *taita*, these. Spirits is *pneuma*, lives. In is *en*, within. Prison is *phulake*, ward as protection. In verse 20 “sometime” is *poti*, even yet. Were is *enimi*, are.

Now let us review that passage from verse 15 through 20 and observe what Peter is talking about: “But sanctify the Lord God in your hearts: and be ready always to give an answer to every man that asketh you a reason of the hope that is in you with meekness and fear: Having a good conscience; that, whereas they speak evil of you, as of evildoers, they may be ashamed that falsely accuse your good conversation in Christ. For it is better, if the will of God be so, that ye suffer for well doing, than for evil doing. For Christ also hath once suffered for sins, the just for the unjust, that He might bring us to God, being put to death, in the flesh, but quickened by the spirit: By which also He passed on a herald unto these lives within protection (of God). Which even yet are disobedient, which once the longsuffering of God waited in the days of Noah, while the ark was a preparing, wherein few, that is, eight souls were saved by water.”

Thus, we observe instead of Christ Jesus descending into hell down in the bowels of the Earth to fight and

conquer the Devil then preached to disembodied spirits languishing in hell fire since 2345 B.C., He descended into the House of Judah, His death and resurrection passed on a herald of His return unto the children of Israel within God's protection who even yet were, and are today, disobedient unto that herald even as the mongrelized Adamites were disobedient unto God's warning while Noah prepared the ark.

Not that the “mongrelized Adamites” will ever have redemption!

Then, *Eph.* 2:2 says: “Wherein in times past ye walked according to the course of the world, according to the prince of the air, the spirit that now worketh in the children of disobedience.” *Aion* is the Greek for the word “course”. It means beginning. World is *kosmos*, arrangement. Prince is *archon*, magistrate as a person with power of Jurisdiction. Power is *dunamis*, ability. Spirit is *pneuma*, spirit of a movement—like the “spirit of Christianity”, “an enthusiastic spirit of something.” Air is *aer*, yet it is not air as the expanse of space, known as the atmospheric zone, extending a few miles above the Earth in which it is said the demons exist. In the Greek, that zone is the “air” (*ouranos*) in *Matt.* 6:26; 8:20; 13:32; *Mark* 4:4, 32; *Luke* 8:5; 9:53; 13:19; *Acts* 10:12; 11:6. The Greek “*ouranos*” is synonymous with the Hebraic “*shamayim*”. They refer also to the dimension of spirit or heaven, yet when the latter is meant, it is things spiritually exalted to the high planes of spirit in which is the spiritual portion of God's Kingdom built there by the material hands of God's Kingdom people of Israel doing His work in human relations—our Christian endeavor. On the other hand, the “air” in *Eph.* 2:2 is synonymous with the Hebraic “*ruach*”, meaning, Mind. It is the “air” in *I Thess.* 4:17; *Rev.* 9:2; 10:17. In *I Thess.* 4:16 “the” (dead in Christ) is *hosos*, all. Dead is *nekros*. It means spiritual death. In is *en*, unto. Shall is *mello*, be at point. Rise is *anistemi*, rising. First is *protos*, before. In verse 17, alive is *zao*, active. Remain is *perileipomai*, around. Be is *ginomai*, be ordained to. The compound word “caught up” is *anatello*, spring. In is *eis*, into. Cloud is *nephele*, fine mist. It is synonymous with the cloud in *Rev.* 10:1 and the “heaven” (*shachaq*) in *Psalms* 89:6, 37 and the “cloud” (*shachaq*) in *Job* 35:5 meaning fine dust. In other words, it is the atomical construction of the microcosmical order of things material.

Thus, *I Thess.* 4:16, 17 says: “For the Lord Himself shall descend from heaven (the dimension of spirit) with a shout, with the voice of the archangel, and with the trump of God: and all spiritually-dead unto Christ (will) be at (the) point (of) rising before (the return of Christ): Then we which are active around (in the National Rule With God) shall be ordained to spring into (spiritual illumination—changed in the twinkle of an eye, *I Cor.* 15:51, 52) together with them into the changed atomical construction of our bodies to meet the Lord in the Mind: and so shall we ever be with the Lord.

In other words, at the moment of Christ Jesus' return our entire race will be at a point of spiritual discernment in which the mortal mental veil will drop forever and the dimension of spirit and the dimension of the material will be merged in our consciousness as one dimension of tangible spirit in which we will be spiritually and mentally synchronized with God, yet formerly (as now) the veil separates the two dimensions in our consciousness, but after the veil drops we will fully know the truth and observe our bodies suddenly changed to living tangible, brilliant spiritual light. It is the rapture (but not as taught by present day churches). It will be the consummation of father Jacob's dream of the ladder extending from the dimension of spirit to the dimension of the material with angels walking up and down on it as recorded in *Gen.* 28:12-15. It is also the city of God symbolized as coming down from heaven in *Rev.* 21.

[End Part Five]

Public Notice

In compliance with regulations regarding sufficiency of notice, this is the second of three required publications of this notice.

GLOBAL ALLIANCE INVESTMENT ASSOCIATION PUBLIC NOTICE

This notice will be construed as a continuation of compliance with provisions necessary to establish presumed fact (Rule 301, Federal Rules of Civil Procedure, and attending State rules). If all interested parties fail to rebut any given allegation or matter of law addressed herein, the position will be construed as adequate to requirements of judicial notice, thus preserving fundamental law. A true and correct copy of this Public Notice is on file with and available for inspection at the newspaper CONTACT (P.O. Box 27800 Las Vegas, NV 89126, USA) which is responsible for publishing the instrument as a legal notice. In the Republic of the Philippines, comments and objections may be filed in writing by addressing Global Alliance Investment Association at 6751 Ayala Avenue, Makati City, Metro Manila, Philippines. Others may be addressed to Global Alliance Investment Association, 3132 West Post Road, Las Vegas, Nevada, 89107 USA.

MEMORANDUM OF INTENT USE OF GLOBAL ALLIANCE INVESTMENT ASSOCIATION HOLDINGS FOR INTERNATIONAL RELIEF FUNDING

January 4, 2005

This notice is addressed to and for the attention of Governor Jeb Bush of the great state of Florida, U.S.A. Governor Bush is certainly one who will recognize GAIA-CSEML (Global Alliance Investment Association-Cosmos Seafood Energy Marketing Ltd.) holdings as associated and validated by his father, George Herbert Walker Bush, in his former capacity as Director of the CIA and former Vice President then President of the United States of America.

You, Jeb Bush, were the FIRST "Bush" contacted after the holdings of Bonus 3392-181 in the turnover of same "all interests" of agent-holder of said asset.

The asset was first in the form of a Peruvian Bearer Certificate, later turned over to and fully qualified as an "individual and identified" holding of CSEML by holder, *RUSSELL E. HERMAN*, in support and backup for continued use by Mr. Bush and his colleagues and recognized as his "Super Fund".

This holding has been qualified and validated fully. Full turnover to GAIA came in 1993 and was made operative in 1994, fraudulently, by one Vina Katherine Durham who falsely claimed to be the widow of Russell Herman and 100% holder of the asset in point. This has all been PROVEN to be fraudulent, forged, and presented completely in criminal intent and actions.

In or around 1996, you Mr. Jeb Bush, were contacted in reference to handling the asset assignment by none other than Lt. Cmdr. (Ret.) Al Martin who was most recognized for his involvement and your association during the Iran-Contra days. This is for identification and verification without intent to distract.

Page 1 of 5
GCH-BUSH, ET AL. 1/4/05

GAIA-CSEML was told exactly how to give legal creditability to the documents and to the holding itself. These instructions were carried forth in detailed presentation--through the Department of the Treasury of the U.S., the President (and all those following George Bush), Secretary of the Treasury from Mr. Baker the IIIrd and all since in place. All was registered with full information and intent of action with, at the time, second highest Treasury person who then became Secretary of the Treasury, William Summers. All information was also forwarded to and through Mr. Robert Rubin who was also at the time Governor of the Inter-American Development Bank in conjunction with Inter-American Investment Corporation, which was not incorporated until 1997 in order to cover our own assets and keep VK Durham from seizing the asset (corporation) for her own unlawful purposes.

We offered the asset to the United States and were met with "We will not deal at this time," by President Bush (Sr.). There have been no further "dealings" although misuse of the asset holdings were unlawfully utilized and brought great damage to the banking systems globally. We have never denied nor have we refused interchange at any time. Neither have we declined potential sharing of all assets with the people of the global community.

We have continued to form a very feasible program whereby the asset represented in GAIA is FULLY BACKED with GOLD COLLATERAL as is represented as a holding in the CENTRAL BANK of the Philippines, but a major shift to private ownership in 1993 changed the Central Bank into the Bangko Sentral ng Pilipinas under the instructions of Fidel Ramos.

Part of those holdings are remaining holdings of Ferdinand Marcos who was in association with the United States of America in global planning for currency coverage through gold based currencies. The story of F. Marcos has no need for repeating in this document. This is in spite of the fact that we have a major holding position in the Tallano-Acop Foundation (FDN) of registration in both the Philippines and in the United States of America, Nevada incorporation. We control some 40% of the assets of the FDN, under law, and are fully represented as to assist in the recovery of the COURT ORDERED RES JUDICATA ISSUANCES.

The gold holdings first registered as 617,000 (minimum) METRIC TONS in shelter and holding by that Central Bank was last inventoried more recently as only having 400,000 metric tons remaining while the rest was smuggled unlawfully from the bank itself.

This is not our concern other than to establish through valid public notice that at least 400,000 metric tons of gold SHOULD be intact and in holding in the Philippine Central Bank VAULT. The gold was used for leasing and payments were made to the Prior Administrator of the estate in point. Although the payments ceased being made it is further noted, however, that the gold was ready to be released for use of the Estate and FDN in year 2000.

Page 2 of 5
GCH-BUSH, ET AL. 1/4/05

This asset is now committed to support the GAIA co-venture which is now fully qualified and far more established than you might at first surmise.

GAIA's agreement is to use the assets "off shore of the domestic United States" to shelter individual parties and to only issue some 5 TRILLION dollars in "assignments" (used as collateral, for reserves and consideration) annually. This now presents since inclusively 1996, as some \$50 Trillion US Dollars.

This also assumes that since 50% of the total assets accrued, mostly in interest alone, have been placed in CSEML and kept intact in holding for the use and reconstruction-reclamation of the United States and adjacent countries thereof, that there is unquestionably \$50 TRILLION assignable to these entities just referenced.

The asset itself is so massive as to have given us cause to "cap" the sums into useful size to be actually backed by gold metal or other precious metals as qualify for tender.

We do NOT have to have gold available at the moment of entry of reserves but the GAIA assets will be fully backed by gold which will also be held in banking reserves and used for collateral but retained in the Central Bank of each participating sovereign nation.

The program, basically simplified for example, is as follows: GAIA will issue a Deed of Assignment for Consideration (Deed) in a predetermined agreed upon amount, i.e., for example, 1 million dollars exchange value relevant to any sovereign nation. The "Deed" will be issued in ORIGINAL form and document to authorities established along with a Memorandum of Agreement (MOA) delineating use guidelines and instructions for operative management and banking requirements to obviate ANY POSSIBILITY OR POTENTIAL OF ILLICIT USE OR HANDLING OF FUNDS.

The Deed will be issued at the amount referenced times 2-1/2. Example: a Deed for one million dollars will be issued in the amount of \$2 and a half million. One million goes to the project co-venturer, one to GAIA for gold PURCHASE and to be held in the bank of choice with only consideration for less than 20% used by GAIA for expenses and holding. (The withdrawals will be further handled as loans to GAIA to prevent any potential of "money laundering".) The sums remain as useful reserves for the bank and while in holding before immediate need for release for project funding, we ask and suggest that the "venture partner" also purchase gold against which he can draw as needed for fundings, allowing additional security for the bank as well as cutting costs of individual project. The project, in other words, is not placed in jeopardy by failure of ability to repay but the gold is held as collateral to secure any loans. The value of the gold should present adequate coverage of any "interest" requirements. The remaining \$500,000 is utilized in the same manner but will cover expenses, management, facilities and operating procedures, i.e., planning, engineering, accounting, and personnel necessary for the project or program in point.

Page 3 of 5
GCH-BUSH, ET AL. 1/4/05

GAIA, wishing no notoriety of any kind prefers that this program as established can be handled without particular reference to individuals but as an international benefit and service through AN ALLIANCE established in its name.

We would be greatly pleased to have the United States receive recognition as to facilitating this program and would be equally pleased to have President George Bush receive ample personal credit. The asset, however, will not be utilized other than for the benefit of mankind of all creeds, colors or locations.

This is the time in historical evolution whereby this can be a massively important survival support system in basically UNLIMITED funding for the benefit of mankind--ALL MANKIND.

I have addressed this to you, Jeb Bush, because you can be the recognized source of credibility of assets available but without any personal involvement as to what came before now in historical evolution or holding responsibility for that which will now present except as in credit and appreciation.

This program SHOULD NOT come as a surprise to anyone for it has been made amply public even to the United Nations and personally to Kofi Annan. It is fully anticipated that all parties to the point will offer "plausible deniability". So be it.

We would further suggest that this be expedited in all possible haste as people continue to be lost and dying. We can stop the onset of infectious epidemics and have immediate rebuilding underway in less than a week.

We do not need to meet and confer as our guidelines and requirements are spelled out in detailed instructions and we can produce backup support of the FDN although gold is not necessarily to come from the Philippines holdings. The gold is for security, support as in collateral but to fully BACK any currency put into the public as printed against these reserves.

This is presented from the individual, Gyeorgos Ceres Hatonn who is well known by those participants in the Bush circle of associates.

Thank you for your immediate attention, Gov. Bush, and may your legacy be long-lived on the global list of appreciated entities who "passed this way".

This will be published, in addition, as an "OPEN LETTER" and, as well, as a PUBLIC NOTICE to meet lawful requirements for registration and documentation. GCH

[Post Script from EJ Ekker: Late breaking news is that the two Presidents Bush and William Clinton have accepted the challenge of raising money for those Nations having suffered losses from the Tsunamis. All three of those gentlemen are familiar with the CSEML/GAIA asset and with their cooperation and that of the afflicted nations, we will be able to make the repairs and create the systems required to protect the people. If the nations will use the GAIA program all of the assistance received can be fully repaid, not only to nations such as the USA, but also to all organizations and individuals.]

Reflections Of A Moment: 'My Daughter, In Love'

The following poignant editorial is presented in answer to a special request from a very special contributor to this paper, DJE, someone you naturally want to call "Mom" because of her mothering, supportive nature.

This piece superbly captures one of those priceless moments in time, when a father's young girl has "suddenly" become a young woman facing the prospect of marriage.

[QUOTING from The Daily Tribune, January 16, 2005, Commentary: "My daughter, in love" by Demaree J.B. Raval:]

On days like this, when the news tomorrow is nothing but a rewritten version of yesterday's press releases, I tend to get moody, introspective. Call it a case of burned-out enthusiasm: At the moment I find myself at a lack of anything praiseworthy—or blameworthy—to say about people of consequence, places of interest and things of importance. And that leaves me with nothing but myself.

I know I should not feel guilty about this egoism. I guess this is what happens when one nears the mid-century mark. At work, I think of the wife and children I have left at home. At home, I worry myself sick with the thought of the work I

have left unfinished at the office. Today such a struggle is raging in my mind. And it tears my heart apart.

The rent in my heart is torn some more when I contemplate that my daughter is in love and is about to get married. What!!! Is this now the little girl my wife and I gazed at so adoringly as she came into this world some twenty years ago? I can't remember growing older. So just when did this little girl decide to discard her dolls and, later, her books, and start thinking of leaving home after living with us for so many years?

Concerned parent that I am, I could probably tell her: "My dear girl, love is a temporary insanity." And very much the daughter of her lawyer-father that she is, she would probably counter: "Yes, Dad, I know it is; and it is curable by marriage."

Years ago, while yet in law school, I went through similar temporary insanity, and a close friend told me: "My advice to you is to get married. If you find a good wife, you'll be happy; if not, you'll become a philosopher." I did, and my wife has been more than good to me and I've been happy—and as you, daughter of mine, can see in the letter below, have become an awkward armchair philosopher of sorts.

To my daughter, on marrying young: You will vow to love each other and to live together for better or for worse, now and forever. It is easier said than done. Much of your happiness will depend on how well you keep these vows. Yours will be a relation in which independence is equal, the dependence mutual and the obligation reciprocal.

Marriage is your last, best chance to grow up. Start by getting to know each other—warts and blemishes and all. You will learn to admire each other even with those imperfections. What you are as a single person, you will be as a married person, only to a greater degree. Any negative character trait will be intensified in your relationship, because each of you will feel free to let your guard down—one has committed one's self to the other and no longer has to worry about scaring the other off.

All weddings are similar, but every marriage is different. May you not wake up one morning to realize that the one you married is

not the one you love. Do not worry; you have a lifetime to learn to love the one you have married.

Share everything, especially the good times and the blessings. Include the bank deposits; you never know when they might run out.

Spare time to talk to each other as often as possible. And always speak from the heart. The words come easy. But be careful with words that could break hearts. They are hard to erase. And even if you succeed, they leave scars."

Words of love do not go out of style just because you're already married; like wine, they come sweeter with age.

Hold hands whenever you could. It keeps you close to each other. It bridges the gaps and keeps other people from getting between you.

Trust each other. But if trust is not there, do not impose. Trust is something that you must earn. The same is true with respect and love. There is nothing nobler or more admirable than two people who see eye-to-eye, keeping house as man and wife; it will confound your detractors and delight your friends.

Fall in love many times over, always with each other. Make love as often as you can. You will miss the fun when you no longer could. And remember that the love you give should always be equal to the love you make. These things are fun.

Keep your love notes and the things you have given to each other as tokens of love. You will treasure them when the memories start to fade and you're too old to remember.

Take time to be alone together, even in a crowd. You are each other's best friend. Let no one come in between. Sad as it may be, friends and acquaintances come and go, but in the end there's really just the two of you. The goal is not to think alike, but to think, and love does not consist of gazing at each other, but in looking together in the same direction.

Appoint each other as guardian of your shared solitudes and keep the flame of hope burning even in your darkest moments. It will light your way to salvation.

Keep a home that will always welcome you and your loved ones. And make a paradise of it, no matter where it is or what it's made of.

Half-wit, I will conclude: Don't worry about the past. Don't worry about the future. Don't worry about triumph. Don't worry about failure unless you brought it upon yourselves. Don't worry about disappointments. Don't worry about satisfactions. Be happy.

With dearest love, your father.

Errata: "Collectable"

On the front page of the January 12, 2005 issue the date was given as January 12, 2004. Future print runs of this issue will show the correct date, so if you want back copies of the "collectable" version, order them soon before they sell out! **1-800-800-5565**

Pursuant to the rules governing Public Notices under the Uniform Commercial Code this notice will be published in a newspaper of wide circulation. Copies of this Notice will be available at any of the three addresses provided above.

IN WITNESS WHEREOF, the undersigned have executed and sealed this notice as of the date hereof. For the Corporation, dated at Makati, Manila, the Philippines, this 4th day of January 2005.

E.J. Ekker, President & Director

Doris Ekker, Secretary & Director

Ronald Kirzinger, Executive V. P.

For the Foundation, dated at Makati, Manila, the Philippines, this 4th day of January 2005.

World News Insights

U.S. "benevolence" in the wake of the disaster on Sumatra has apparently been a little too much for mostly-Muslim Indonesia, which (by the way) is rich in resources in need of exploitation, er, ah, development:

INDONESIA WANTS FOREIGN TROOPS OUT, DEFENDS RESTRICTIONS ON TSUNAMI AID
AFP, 1/13/05

Indonesia told foreign troops helping tsunami victims to get out of the country soon and defended tough new restrictions on aid workers, while rich nations prepared to freeze Jakarta's debt repayments.

Vice President Yusuf Kalla said foreign troops should leave tsunami-hit Aceh province on Sumatra Island as soon as they finish their relief mission, staying no longer than three months.

"Three months are enough. In fact, the sooner the better," Kalla was quoted by the state Antara news agency as saying.

The armed forces of Australia, Japan, Malaysia, Singapore and the United States have all rushed task forces to Aceh in the wake of the December 26 disaster, which killed at least 106,500 Indonesians out of a total of more than 159,000 deaths in Asia.

United Nations officials struggling to coordinate a massive relief operation have welcomed their participation, particularly to deliver aid to isolated coastlines accessible only by sea or air.

But their presence in Indonesian territory has been a sensitive issue for the world's largest Muslim-populated nation, which has traditionally kept foreign military, particularly the United States and Australia, at arm's length.

The vice president said Aceh in the near future would need foreign medical workers and engineers instead of military assistance.

"Foreign troops are no longer needed," he said....

While mostly Western relief forces are being shown the exit, however, Russia is being welcomed to participate in the development of Indonesia's gas:

**RUSSIA URGED TO TAKE PART IN
INDONESIAN GAS DEVELOPMENT**

By Mikhail Tsyganov, RIA Novosti, 1/17/05

JAKARTA—Mr. Simanjuntak, President of Indonesia's State Gas Company, has called on Russia to take part in the development of the country's gas industry.

"It is time to boost cooperation within a wide range, from staff training to investment and business interaction," Mr. Simanjuntak said in Monday's interview with RIA Novosti following the beginning of a session on the issues of infrastructure, which is to last for 2 days in the capital of Indonesia.

The session is attended by 540 delegates from 19 states, including Australia, Canada, the U.S., South Korea and Japan. Russia enjoys the observer status and is represented by the trade mission of the Russian Federation.

The company is interested in sending its middle managers and technical experts to Russia for training. "We would like to borrow from Russian Gazprom's rich experience," the head of the company pointed out.

Other spheres of cooperation may be the extraction, transportation and distribution of gas, the interlocutor believes.

Supplies of Russian pipes and equipment for gas

extraction and transportation could be highly important for the "country of three thousand islands". The company's president assumes that it would be less expensive to buy from Russia than from other countries with the same high quality.

"Now that foreign investors are being attracted to participate in the implementation of a number of projects on gas pipeline construction in Indonesia, it is high time the State Gas Company turned to Russian investors," the official said.

"The project of building a gas pipeline to link the isles of Sumatra and Java alone is estimated at \$1.7 bln," the interlocutor stressed.

According to the president, Indonesia takes particular interest in Russian investment because Russia has great experience in gas extraction and transportation. Mr. Simanjuntak also admitted that Russian companies, which are ready to carry out the total cycle of work, would join the projects....

Russia continues to be very busy in developing international relations to new levels. Could France be added to the Russia-China-India-Brazil alliance? How about "most of the European states" as alluded to in the following article?

**RUSSIAN-FRENCH COOPERATION ELEVATED
TO ENTIRELY NEW LEVEL**

RIA Novosti, 1/21/05

Russian-French cooperation has been elevated to an entirely new level, Russia's Foreign Minister Sergei Lavrov said the other day, after his talks with French Foreign Minister Michel Barnie wound up at the Nakhabino golf club.

Our dialogue makes it possible to discuss and settle any issue, the Russian Foreign Minister noted.

In his words, the Presidents of both countries facilitated this atmosphere of Russian-French interaction.

These talks, which precede the fourth regular session of the joint Russian-French council for security issues involving national Foreign Ministers and Defense Ministers, discussed a wide range of issues pertaining to our bilateral relations, Lavrov added.

According to Lavrov, both countries agree that they must expand their interaction in such hi-tech spheres as the space industry and aircraft construction.

...Talking about international issues that were discussed in the course of talks between Russian and French Foreign Ministers, Lavrov noted that the sides had attached priority to enhancing and overhauling the UN, so that it could fight terrorism, as well as other new threats and challenges, more effectively....

"Enhancing and overhauling the UN"—so it can deal with a rogue member of the Security Council, perhaps? Russia certainly seems to be getting along well with many nations these days.

**RUSSIA WILL NOT BE PROVOKED INTO
GLOBAL CONFRONTATION—LAVROV**

RIA Novosti, 1/19/05

Russia will not be provoked into confrontation on the world stage, said Russia's Foreign Minister Sergei Lavrov.

"There are some who look at Russia with suspicion, and call for all but confrontation with and opposition to Russian activity in the international arena. We assess such approaches as a call to renew confrontation and will not yield to this. We won't be provoked," the foreign minister told a news conference

in Moscow.

Lavrov said that Russia continues "firmly but in a constructive spirit and without sliding back to confrontation" to pursue its line in the international arena.

He said that it is the tasks facing the entire world community that are preventing a slide towards confrontation.

...*"Economic growth is giving this country more opportunities to develop political dialogue, which we back with concrete projects,"* the minister told the news conference.

He said this concerns Russia's relations both with its closer partners—CIS member-countries—and most of the European states, countries of the Asia-Pacific region, the Middle East, and Latin America, and the U.S. whose administration, Lavrov is firmly convinced, will not depart from its course of strengthening partnership relations with Russia.

"Our policy rests on real possibilities," the minister gave an assurance.

Those possibilities could be quite real—IF they hinge on "the" solution presented through the Global Alliance Program. Note that Mr. Lavrov includes the U.S. in Russia's "strengthening partnership relations". Meanwhile, however, Russia does not appear afraid to back one of the countries on the U.S. "hit list":

**THROUGH ARMS TO SYRIA, PUTIN CHALLENGES
U.S. MIDDLE EAST GAME RULES**

DEBKAFfile, 1/12/05

Disturbing reports were coming out of the Russian capital Wednesday, January 12 about Russian president Vladimir Putin's plan to accede to Syria's request for advanced weaponry during president Bashar Assad's visit to Moscow on January 24. DEBKAFfile's U.S. and Israeli security sources quickly contradicted reports that 18 Iskander-M or SS-X-26 surface-to-surface missiles were on the table. The items for sale, they revealed, are advanced SA-10 air defense systems of the type that protects Moscow and shoulder-held SA-18 anti-air missiles, whose transfer to the Hizballah and/or Iraqi guerrillas would move at least two sets of goal posts in the Middle East balance of strength.

The SA-10 is an effective defense against Israeli warplanes and missiles, including cruise missiles. Its presence in Syria would therefore knock a serious hole in Israel's deterrent ability against Assad and the Hizballah.

The Kremlin's willingness to sell these items to Israel's northern neighbor and backer of Iraqi insurgents is a rocket from the Putin to the White House in Washington, a declaration that he has had enough of sitting on the sidelines and watching U.S. move the January 30 election pieces around the Iraq board and tilt the Palestinian ballot in favor of Mahmoud Abbas (Abu Mazen) as Yasser Arafat's successor.

The Russian president's exasperation boiled over when he saw Washington's hand in the Ukraine presidential election stirring up the anti-Moscow Orange Revolution that brought opposition leader Viktor Yushchenko to office, and, again, in the sale of the Russian oil concern Yukos. The Russian leader felt he had been made the target of a well-orchestrated campaign for undermining him personally and politically.

Israeli prime minister Ariel Sharon is also put on notice that Washington's backing alone does not lend him the status of unilateral player for disengagement in the Palestinian arena.

The Russian leader has another large bone to pick with Sharon. He has complained often on the basis of

intelligence received that Israel provides a backstairs rendezvous venue for Jewish Russian oligarchs conspiring against him, among them Berizovsky who lives in London, and Khodorovsky, founder of the oil giant YUKOS who sits in a Moscow jail.

Each of those moneyed plotters, he charges, maintains a representative in Israel to look after the transfer of his wealth to Israeli banks. More than once, the Russian president asked Sharon to put a stop to this activity. When the Israeli prime minister informed him that the Law of Return forbids prosecution or extradition unless laws are broken, Putin was disbelieving. He later sneered to his aides that he had not known that the Law of Return applied to members of the Russian Christian Orthodox Church, a veiled reference to the Russian oligarchs' hired personnel who relocated with them to Israel.

The Kremlin's decision to supply advanced SA-10 and SA-18 missiles to Syria constitutes a direct threat to Israel. But it is also a shot across Washington's bows.

DEBKAF's Russian and Israeli military experts described the SA-10 ("Grumble") as an advanced surface-to-air missiles system capable of seriously limiting Israel's aerial activity over Syria and Lebanon. It can engage more than one target and counter low- and high-flying aircraft, cruise missiles and ballistic missiles. "Grumble" can outperform the U.S. Patriot anti-missile missile system supplied to Israel and counter the aircraft and most of the missiles in the Israel Air Force's arsenal, to the detriment of its deterrent capabilities.

The SA-18 "Grouse" is a highly effective shoulder-held missile. If it reaches Iraqi guerrillas it will constitute a direct threat to U.S. troops. In Hizballah hands, it would add to U.S. troubles in Lebanon.

Now that the cat is out of the bag, Putin and his top strategists can sit back and see how Washington and Jerusalem react.

We recently ran a copy of the United States Organizational Chart, which underscored the importance of the office of Secretary of Homeland Security. As Joel Skousen points out in the following article, Michael Chertoff, nominated for Secretary of Homeland Security, is a "dangerous man".

CHERTOFF NOMINATED FOR HOMELAND SECURITY CHIEF

By Joel Skousen, *World Affairs Brief*, 1/16/05

In the wake of the embarrassing withdrawal of Bernie Kerik, President Bush has nominated federal appellate judge Michael Chertoff to head Homeland Security. Chertoff is another black-side operator within the bowels of government. He helped draft the nation's antiterrorism laws after the Sept. 11 attacks, and was responsible for rounding up and incarcerating without trial over 700 Arabs after those attacks. None were found to be guilty of any crime. Chertoff was minority counsel in the first Senate investigation related to the death of Vincent Foster and majority special counsel in the second such Senate investigation. He was therefore partly responsible for the cover-up of the Foster murder in those investigations. Interestingly enough, he also comes from a close association with [Sir] Rudolph Giuliani, just like Bernie Kerik. Looks like Giuliani may have more say in dictating who gets this job than I previously realized.

Chertoff, 51, has publicly stated that the *Bill of Rights* is obsolete. He was in charge of the criminal division of the Justice Department for the first three years of Bush's presidency and was ruthless in his pursuance of anyone that could be labeled a terrorist supporter. He made sure that every one of Ashcroft's press releases about criminal suspects added the

proverbial "has suspected links to al Qaeda". Many critics point to Chertoff as the bad guy within the DOJ who "trampled on civil liberties while prosecuting a legal war on terrorism". With the government's new plans for keeping suspects under permanent incarceration, without due process of law, Americans should not rest easy with the likes of Chertoff at the helm. Bernie Kerik would have been an incompetent joke at HS; Chertoff will be more like the KGB. This man is dangerous.

Next we offer a special book review by Michael Collins Piper, author of Final Judgment:

AUSCHWITZ: THE FINAL COUNT

By Michael Collins Piper, *The Barnes Review*

A thought-provoking new anthology edited by English historian Vivian Bird casts stark new light on what really happened at Auschwitz during World War II. As the evidence shows, the official "facts" just don't add up.

...Auschwitz is central to the Holocaust legend. If it can be proved that the official stories we have been told about Auschwitz are not true, the entire fabric of the Holocaust ultimately has to unravel. What, then, did happen at Auschwitz?

On April 18, 1945, in the immediate aftermath of World War II, the *New York Times* reported that 4 million people died at Auschwitz. This "fact" was reported over and over again during the next half-century, without being questioned.

However, on January 26, 1995, commemorating the 50th anniversary of the Auschwitz liberation, both the *Washington Post* and the *New York Times* itself reported that the Polish authorities had determined that, at most, 1.5 million people (of all races and religions)—not "4 million"—died at Auschwitz of all causes, including natural causes.

Yet this was not the first time this drastically reduced figure appeared in the major media. Almost five years previously, on July 17, 1990, the *Washington Times* reprinted a brief article from the *London Daily Telegraph*. That article stated:

"Poland has cut its estimate of the number of people killed by the Nazis in the Auschwitz death camp from 4 million to just over 1 million ... The new study could rekindle the controversy over the scale of Hitler's 'final solution' ..."

"Franciszek Piper, director of the historical committee of the Auschwitz-Birkenau Museum, said yesterday that, according to recent research, at least 1.3 million people were deported to the camp, of whom about 223,000 survived.

"The 1.1 million victims included 960,000 Jews, between 70,000 and 75,000 Poles, nearly all of the 23,000 Gypsies sent to the camp and 15,000 Soviet prisoners of war.

Shmuel Krakowsky, head of research at Israel's Yad Vashem memorial for Jewish victims of the Holocaust, said the new Polish figures were correct: "The 4 million figure was let slip by Capt. Rudolf Hoess, the death camp's Nazi commander. Some have bought it, but it was exaggerated."... [P]laques commemorating the deaths of 4 million victims were removed from the Auschwitz museum earlier this month."

This detail of history was intriguing since, after all, history books had said for a generation that of the 6 million Jews who died during the Holocaust, 4 million died at Auschwitz alone. Thus, if the new facts were correct, the actual overall number of Jewish Holocaust victims had to be considerably less than the much-talked-about figure of 6 million. Put simply: subtract the former 4 million Jews dead at Auschwitz from the popular 6 million, and that leaves 2 million Jews dead. Simple math—and a controversial conclusion indeed.

More recently, Walter Reich, former director of the U.S. Holocaust Memorial Museum in Washington, jumped into the debate over Auschwitz. On September 8, 1998, the *Washington Post* published an article by Reich in which he addressed Jewish outrage over a group of elderly Polish nuns who wanted to place crosses in memory of Christians who died at Auschwitz. Reich was responding to what he described as a "well-meaning" August 31, 1998 editorial in the *Post* about the affair.

Reich commented that the editorial "illustrates how old fictions about Auschwitz have been accepted as facts—fictions that have been used repeatedly to distort the camp's history". Evidently, the *Post* had forgotten its own report on the Auschwitz numbers that it had published three years previously and chose, instead, to repeat "old fictions... accepted as facts". What, then, were those "old fictions ... accepted as facts"? Here's what Reich had to say:

The *Post* identified Auschwitz-Birkenau as the death camp "where 3 million Jews and millions of others were murdered by the Nazis". Recent scholarship by a Polish historian has put the number of deaths there conservatively at about 1.1 million, with other estimates ranging to about 1.5 million. Approximately 90 percent of the dead were Jews.

The *Post's* numbers may have been derived in part from the inflated estimate—originally of Soviet origin and endorsed by Polish authorities after the war—of about 4 million dead. This number, and other numbers of similar magnitude, were repeated so often that they came to be accepted by many as true, even though historians in Poland and elsewhere have revised this number down considerably.

Honest people find no problem with Reich's call (in the essay) for "only words of accurate history" in reportage about Auschwitz. Today, a major first step toward "only words of accurate history" is the release of a new anthology on Auschwitz, assembled by English writer Vivian Bird.

Auschwitz: The Final Count examines the "new" reports in the mainstream media (outlined above) and provides essential additional facts that must be considered in order for the full story of Auschwitz to finally be told. Bird's 109-page book is a compendium (supplemented with commentary by Bird) of four complete, previously published works relating to Auschwitz and the Holocaust.

The book features a fascinating introduction by Bird exploring the little-known but thoroughly documented phenomenon in which the numbers of the official Auschwitz "death toll" have plummeted from a "high" of 9,000,000 dead to a rock bottom of 73,137 (of whom 38,031 were Jews). And readers will note that of the 26 widely varying figures cited by Bird, all come from a variety of "responsible" and mainstream sources. No figure Bird cites comes from any source accused of "denying the Holocaust", whatever that means.

This book can be obtained for \$15.95 including shipping and handling through The Barnes Review, 130 Third St. SE, Washington, DC 20003.

Errata: "Collectable"

On the front page of the January 12, 2005 issue the date was given as January 12, 2004. Future print runs of this issue will show the correct date, so if you want back copies of the "collectable" version, order them soon before they sell out! **1-800-800-5565**

NEVADA CORPORATIONS:

Nevada Vs. Delaware: Private Vs. Public

Budget's "Tip of the Week" #16:

Response to the Often-Asked Question: What About Delaware?

"My friend said that her attorney said that the best place to incorporate is Delaware because that's where all the big corporations are based."

The fundamental distinction between Nevada and Delaware is that while Nevada's statutes create benefits for **private** corporations, Delaware's corporate statutes have principally been designed to benefit shareholders of **public** corporations. Many large, public companies that trade on various exchanges across the country incorporated in Delaware because Delaware's statutes provide the best protection of the rights of shareholders. In recognition of the foregoing, Delaware's corporate law with regard to corporate takeovers is the strongest anywhere in the country. And if you want to "go public" with your corporation some day, Delaware's onerous disclosure requirements probably won't bother you.

On the other hand, Nevada's provisions for establishing and maintaining privacy of ownership and control is unparalleled. In Nevada, ownership of a corporation is not a matter of public record: There is no prohibition against the use of bearer shares; there is no requirement for stock to be issued; nor is there any requirement for an annual meeting of stockholders. In terms of privacy of control, the use of contract ("nominee") officers and directors has been a common practice since 1925. In addition, NRS 78.257 makes it a gross misdemeanor for anyone to even *attempt* to use a Nevada corporation's records for purposes contrary to the interests of the owners.

Delaware is NOT "tax-free". A Delaware corporation's taxable income is taxed at the rate of 8.7%. In addition, its franchise tax has a graduated rate depending on capitalization, amounting to a minimum of \$30 and a maximum of \$130,000.

Nevada's corporate law easily surpasses Delaware's in terms of protection of corporate officers and agents. Delaware has recently adopted a statute that allows a corporation to limit the liability of a director for monetary damages—but *officers* of Delaware corporations are still not covered. **The following acts of officers and directors would be protected under Nevada law, but are exposed to liability under Delaware statutes:**

1. Acts or omissions not in good faith;
2. Monetary damages occasioned by acts of officers (directors are now exempt);
3. Breach of a director's duty of loyalty;
4. Transactions involving undisclosed personal benefit to the officer or director;
5. Acts or omissions that occurred prior to the date that the statute which provides for indemnification of directors was passed and approved.

In summary, Delaware cannot match Nevada in providing shelter for small, private corporations.

CORPORATION SETUP AND MAINTENANCE FEES

Budget Corporation—includes:

- First-year resident agent fee
- Corporate Charter
- Articles of Incorporation
- Corporate Bylaws
- Corporate Resolutions
- Budget corporate record book
- 3.5" floppy disk of resources

TOTAL \$410

Contract Officers & Director	\$200
Obtain EIN	\$ 75
Bank Account Setup	\$100
Expedite (24-hr. setup)	\$175

Annual Resident Agent Fee	\$ 85
Budget Mail Forwarding (18 per yr)	\$ 95
Full Mail Forwarding (240 pcs/yr)	\$195

"Millions shall perish for they will not see nor hear of the Truth nor of the warnings. They shall be placed anew on other places appropriate to their level of progression in the spirit growth. Because of the remnant that must remain, the Earth will be purified and raised to a new dimension and vibration frequency."—from the Journal *RAINBOW MASTERS*
